

Jooxter makes the hybrid workplace work

“The new Jooxter solution facilitates work organization for a more efficient collaboration thanks to innovative features to adapt to the new hybrid way of working.”

Facilitates team collaboration

Improve collaboration by facilitating employee on-site or remote work organization. Thanks to real-time floor plans and easy to use filters, colleagues know where their teammates are working from and can book a space to physically meet in the office.

Integrated to collaborative tools

Bridge and improve the gap created by remote work by integrating collaborative tools into your workplace management solution. Synchronize your professional calendar (Google or Office 365) and use videoconference tools (Microsoft Teams) to help employees work together.

Workplace occupancy analysis

Jooxter helps understand the patterns of the new hybrid way of working thanks to its occupancy data dashboard. Thanks to real-time data businesses can efficiently manage the rhythms between remote and on-site work.

Safety is key

Guarantee social distancing, traceability of positions, full GDPR compliance, safe mobility in the workplace and controlled office occupancy to ensure employee safety and well-being at work.
