Adapter

Vehicle API Layer

Powered by 2hire

# Adapter : connect all vehicles with a single integration

Vehicle API Layer

2hire enables digital services around connected vehicles through a single API platform.
Adapter provides digital access to countless vehicle types, makes and models through standardized and robust APIs.

2hire Box – Not connected vehicles

Though our proprietary hardware, we retrieve vehicle data and trigger remote interactions

CONNECTIVITY Multi-operator

INTERACTIONS Unlock/lock doors

DATA GPS | Fuel level/Battery | Odometer

- Non invasive installation (<10 min)
- Plug & Play device
- Compatible with all brands
- Invisible to the user

Connected vehicles

We partner with manufacturers of connected vehicles in the automotive and micro-mobility world.
With a single layer API, 2hire communicates with connected vehicles of all the major OEMs, creating mobility services with a universal and standardized access point.
