

# PELICO

## Resilient factories, without the firefighting

Unplanned production blockers in today's context of extreme volatility create disconnections between the Supply Chain strategy and factory execution.

## Factory Operations Management System

Pelico's operations management system empowers factory and supply chain teams to manage unplanned production blockers at the factory level and deliver products on time, at cost.

### High user adoption

Our users love the intuitive UX of the platform  
(97% adoption rate)

### Unified operations management system

Analytics, insights, simulations & collaboration in one platform to align all factory operations teams

### Short time to value

6 to 12 weeks

*"Pelico is a cornerstone of our digital transformation."*

**Pauline C.**

- SIOP & Material Manager

**Collins Aerospace**

*"Thanks to Pelico, we reduced our parts shortages by 72% in 4 months."*

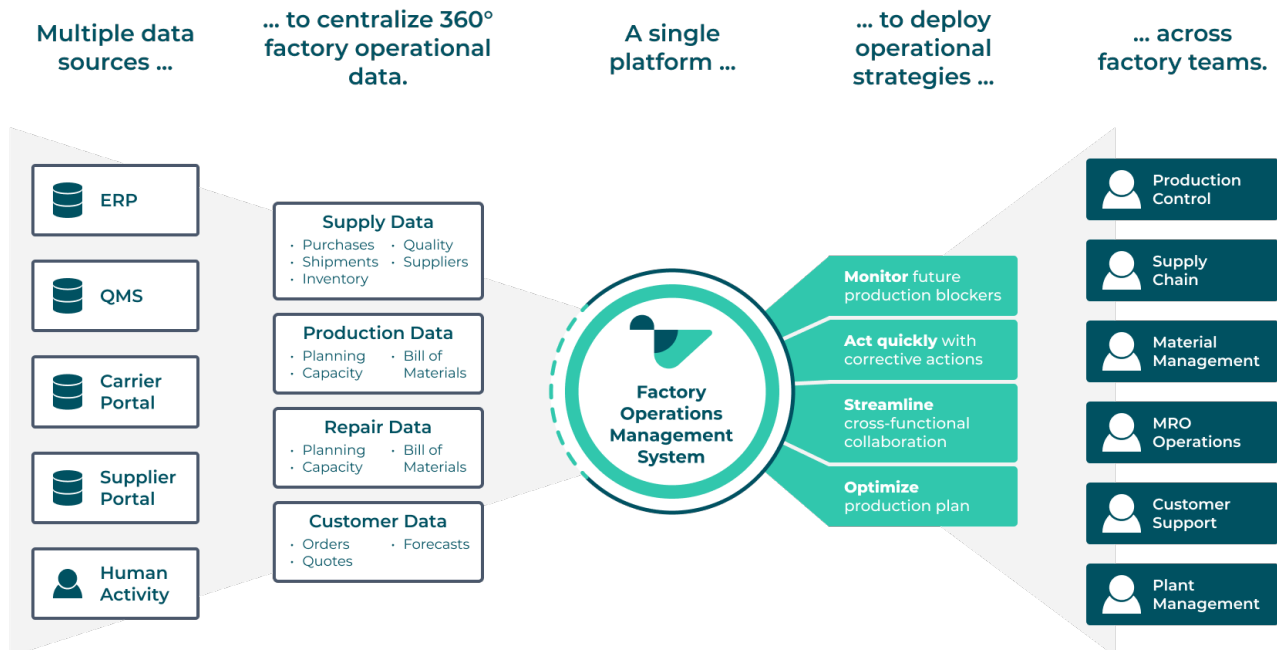

**Sammy Y.**

- Supply Chain Manager

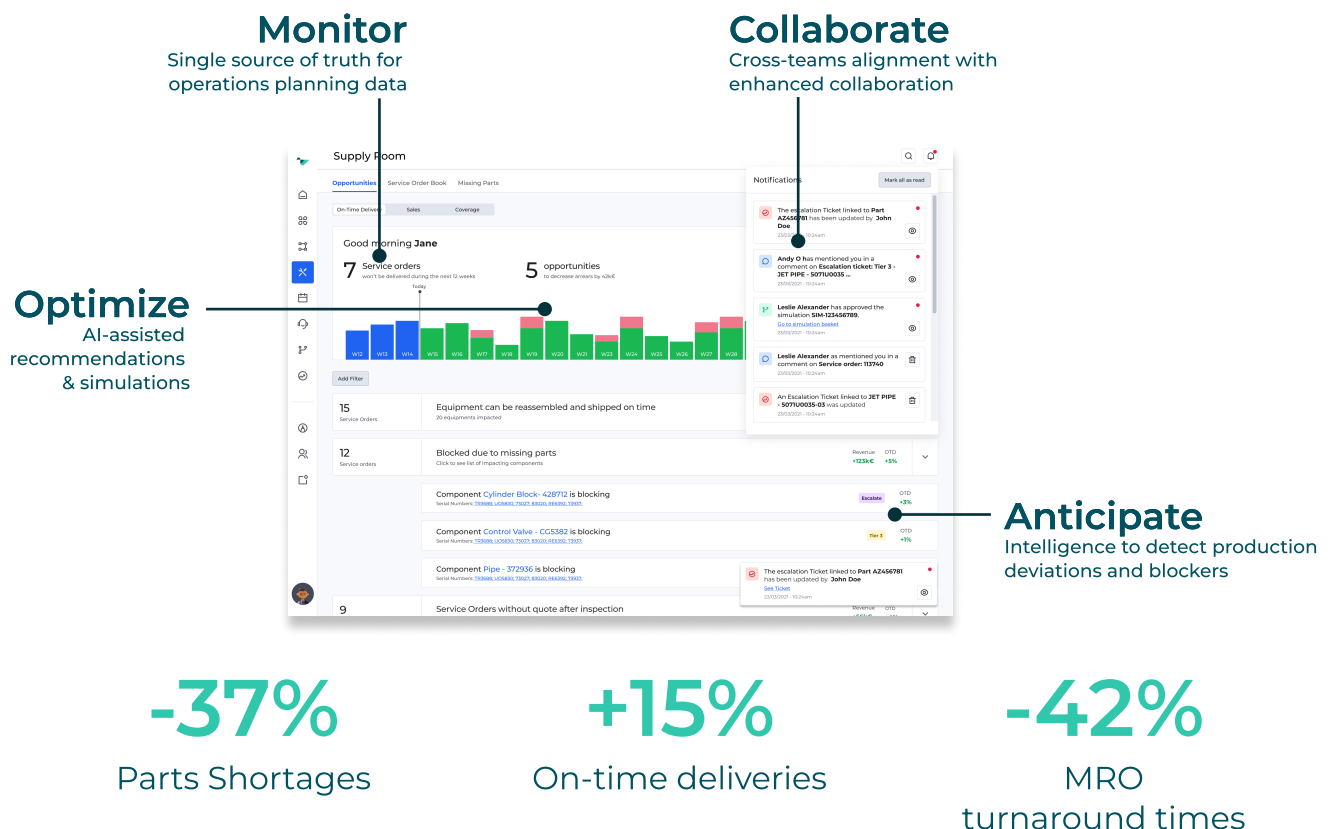

**SAFRAN**

## A data-based platform to streamline factory cross-functional collaboration

Continuously anticipate production blockers, act fast, and synchronize on key business priorities
