SUSTAINABLE DEVELOPMENT GOALS

The image displays three smartphone screens showing the Cellbedell app interface. The left screen shows a 'Device list' with entries for 'Loki's office', 'Home101', and 'Cellbedell_N_kaws03'. The middle screen shows a hand holding a smartphone with the app open. The right screen shows a 'Loki's bnb' interface with various controls like 'Unlock the Door', 'Grant Access', 'Update Room Status', 'Check in / Out', 'Cell meeting', and 'Cell Box', along with a 'Create Key' button.

Mobile management

We integrated all manage functions into APP for hosts can grant access credentials, check room status and sync up with coworkers. In additions, host can directly produce keycards with their smart phones.

Rapid deployment on self check-in system

It only take 5 minutes to deploy a self check-in system with cellbedell smart card machine and APP.

We raise up the efficiency up to 70% while bringing down 80% on total installation cost on facility.
