

A detailed background image of space debris. Numerous fragments of various sizes and shapes, including satellite components and metal shards, are scattered across the black void of space. At the bottom of the frame, the curved horizon of the Earth is visible, showing a blue atmosphere and glowing orange city lights at night.

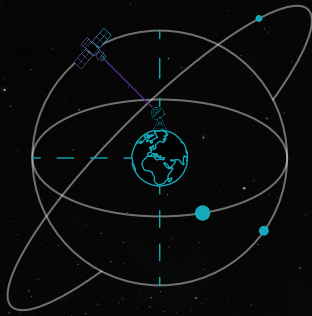

# DIGANTARA

New-age Space Cartographers

# Charting The Course For Safer Space Operations

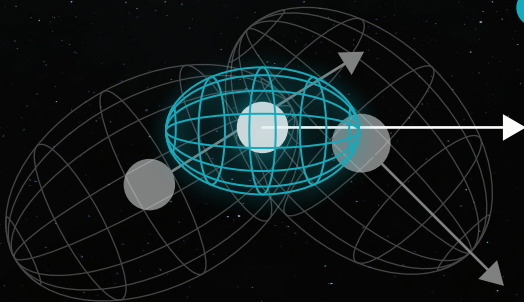

## 1 Dedicated SSA Sensor Network

Digantara SCOT Constellation (A patented space-based Sensor) and Ground sensors network optimised to track extensive lethal objects as small as 1 cm.

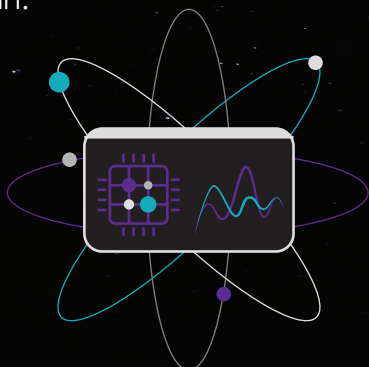

## 2 Data Agnostic Processing Engine

Next-Gen Object Identification and Data Fusion Process for more consistent and precise Orbital Information.

## 3 Analytics and Intelligence

High performance Orbital Analytics for enhanced decision making across the value chain.

# Enabling The Future Of Space Economy

## Spacecraft Operations

Supporting safer spacecraft operations at SCALE, enabling a sustainable space ecosystem.

## Defence

Modular air-gapped space command center will provide the government and defense bodies with a comprehensive view of national security.

## Launch

Supporting missions during the riskiest phase of a space craft mission life with the goal to reduce LCOLA gap.

## Propulsion

Deep integration of proprietary Flight Collision Avoidance System towards enabling safer space operations.

## Insurance

Bespoke insurance products focused towards minimising liabilities and incentivise spacecraft operators to pursue moonshot goals.

The background of the entire advertisement is a black space filled with various pieces of white and grey space debris, including satellite components and long thin rods. At the bottom of the image, the curved horizon of the Earth is visible, showing a blue atmosphere and glowing orange city lights at night.

We're the first line of defence  
against space threats, so you  
can focus on reaching for the  
stars!
