

BELGIUM - WALLONIA

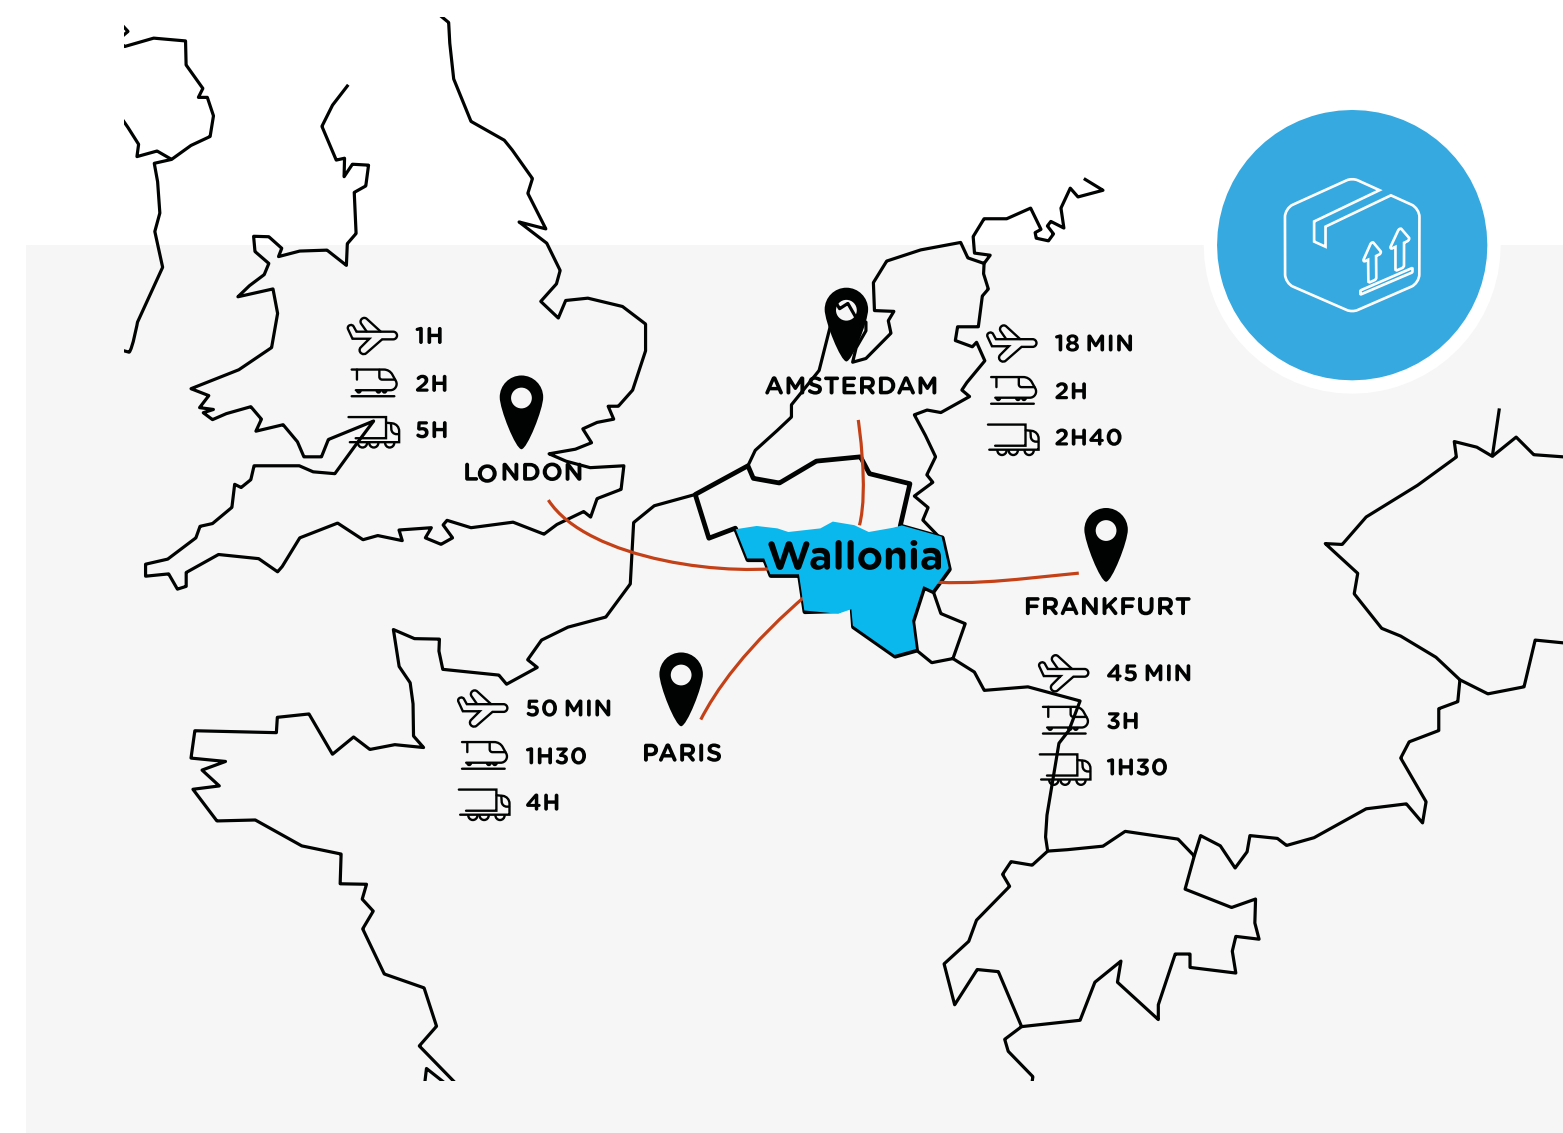

@VIVATECHNOLOGY 2023

PARIS EXPO PORTE DE VERSAILLES
Hall 1/D09 & Hall 2

JUNE 14-17, 2023

PARIS

Wallonia.be

Wallonia has an excellent logistics infrastructure and «multimodality» is the keyword. **Liege Airport** was awarded the title of **best cargo airport in the world** for the year 2020. You will also find yourself well supported : the actors of the sector are gathered in the «Logistics in Wallonia» cluster.

Wallonia.be

WALLONIA EXPORT & INVESTMENT AGENCY

The Wallonia Export & Investment Agency (AWEX) is the institution in charge of the development and management of Wallonia's domestic and international economic relations.

Through a personalized, innovative, and sustainable approach, AWEX supports Walloon companies - regardless of their size, sector, or target market - in every step of their international endeavors. This includes exports, technological partnerships, and development abroad.

The agency's vast network of connections ensures the best advisors are always by your side. Our local anchors and agents abroad are capable of providing unparalleled insight to take your company to the next level. In addition, our connections will help establish your business in the global marketplace and promote it throughout the world. Training, incentives, and international financing are also available.

AWEX is also committed to strengthening Wallonia's position as the premier gateway for international investors seeking success in the heart of Europe. We work closely with them to inform, convince, and advise in every stage of their development.

Feel free to get in touch with one of our local or international agents via our websites listed above.

In our network of more than 400 employees in nearly 100 countries around the world, there is always someone ready and willing to support you in your approach.

AGENCE DU NUMERIQUE & DIGITAL WALLONIA

The Agence du Numérique is the public service body responsible for monitoring technological innovation and habits relating to digital technology, advising the Walloon Government and its departments on this area, and leading or coordinating operational or communication measures to support Wallonia's digital transformation by drawing on the Digital Wallonia strategy approved in December 2015.

What is Digital Wallonia?

A Strategy. Framework programme for digital Wallonia, which sets public policy priorities and objectives and provides a framework for support for private initiatives in favour of digital technology.

A Brand. Identity of the numerical ambition of Wallonia and its citizens, which brings together the actors and public and private initiatives launched within the framework of the digital strategy.

A Platform. Showcase of the digital sector in Wallonia, which offers reference content and provides services to stakeholders involved in the implementation of the digital strategy.

TRAIL

Artificial Intelligence (AI) is a major opportunity for our institutions and companies. Based on data acquisition and information processing algorithms, processes in many sectors can be made more efficient. These developments have a significant impact on regional development in a wide range of sectors including medicine, media, mobility, manufacturing, and energy. They will transform the way businesses operate.

Five French-speaking universities and four Walloon research centers active in AI (namely UCLouvain, ULB, ULiège, UMONS, UNamur, Cenaero, Cetic, Multitel and Sirris) have joined to create the TRAIL (Trusted AI Labs) Initiative and pool their respective expertise in these sectors with three foreseen impacts: 1) training European talents in AI, 2) favouring the adoption of AI in the ecosystem where it operates, 3) having an international outreach by advancing research on strategic topics such as human-machine interactions, explainable artificial intelligence (XAI), or trusted AI protecting private data.

TWIST

TWIST (Technologies from Wallonia for Image, Sound and Text) is a business network of companies and a community platform that promotes innovation and growth in digital industries in southern Belgium, and mainly in digital sectors of Image and Sound.

In 12 years, TWIST has built a solid network of some 110 members (representing 4,500 direct jobs and a turnover of 1 billion euros), 80% of which are SMEs, 5 television channels, 6 universities & research centers, and 3 investment funds. TWIST is also supported by its public authorities and is an official partner of Digital Wallonia, the digital strategy adopted by the Government of Wallonia.

In this context, TWIST has developed a strong expertise in the “live sport & entertainment” industry (Sport & e-sport, Entertainment TV, Museum, Attractions/Theme parks, Live show, Live music, cinema).

AWEX EU OFFICE - Enterprise Europe Network (EEN)

AWEX is the coordinating partner of Enterprise Europe Network (EEN) for Wallonia. Indeed, for the Walloon Region, Enterprise Europe Network (EEN) is represented by a consortium composed of three partners : AWEX, Wallonie Entreprendre and the NCP Wallonia.

This network set by the European Commission helps businesses to innovate and grow on an international scale considering sustainability, digitization and necessary resilience in these hard times. It is the world's largest support network for small and medium-sized enterprises (SMEs) with international ambitions. The network is active worldwide, covering more than 60 countries. It brings together experts from member organizations that are renowned for their excellence in business support.

Team of Network experts in each member organization offer personalized services to businesses : advisory services mainly related to topics handed by EU and international partnership support services. They know the local environment and have contacts for business opportunities worldwide. The network can also offer a targeted approach aimed specifically at your business sector. Its expert groups cover all key economic sectors from healthcare to agrifood, from mobility to environment. In addition, the Network will help companies to increase their resilience and support SMEs in their transition to more sustainable and digital business models.

COMPANY BACKGROUND

Bounce was founded in 2019 by 3 friends who are passionate about tennis and padel, following the finding that tennis and padel together represent one of the most polluting sports in the world, due to the (over-) consumption of balls

ADDED VALUE

Bounce makes tennis and padel tennis sustainable by having an impact on the entire life cycle of the balls:

1. The bounce tube (for players) and the bounce pro (for clubs) multiply the life of the balls by 3
2. The bounce circular programme collects used balls and recycles them

RANGE OF PRODUCTS

The Bounce Tube is a product for tennis and padel players. The tube has an integrated pump and an hermetic lid and can hold up to 4 balls.

The Bounce Pro is a product for tennis and padel clubs and schools. It can hold up to 400 balls and is equipped with an electric compressor.

The Bounce Circular program was created to help clubs sort balls and collect them for recycling.

MAIN REFERENCES

Bounce is the first Belgian startup to be incubated by Decathlon. It has also won numerous innovation awards, and its products are used by prestigious clubs in Belgium and France, including Justine Henin's club.

CAPFLOW

Rue Jean Jaurès 10B

E-mail: pascal.repjuk@capflow.com

COMPANY BACKGROUND

Since 1995, the company specializes in Smart Parking Solutions using AI (ANPR and other image based algorithms). Since 2021, the Smart Parking solution integrates EV car chargers and green energy management (Solar panels).

ADDED VALUE

Based on user feedback, Capflow has developed unique management solutions tailored to customer needs. With two user interfaces based on Windows and the web, the company has added smartphone applications to the Flexipark, FlexiGuard and EVSmart software suites that allow users to stay connected to their solutions from anywhere.

RANGE OF PRODUCTS

Capflow integrates intelligent vision systems for quality control and safety. Since 2021, the company has offered a complete range of intelligent EV car chargers and solar carports for green energy. Capflow markets three software suite FlexiPark (access control software suite for parking lots), FlexiGuard (an intelligent video recorder) and EVSmart (a smart EV car charger solution)

COMPANY BACKGROUND

The Carbon Cockpit, our proprietary CO2 management tool, measures and reduces greenhouse gas (CO2e) emissions from companies.

We currently have under management a total of 5 million tCO2 emissions, which is equivalent to the emissions of a developing country.

With our product, companies can expect to reduce their footprint by 30% minimum by 2030.

ADDED VALUE

The Carbon Cockpit has the precision of a carbon auditing tool and the user-friendliness of an online app. It allows a multi-site company to drill down on site-specific total CO2-equivalent emissions.

The Carbon Cockpit also enables companies to track CO2 emissions related to their products through product life-cycle analysis. The Carbon Cockpit supports 5 languages.

RANGE OF PRODUCTS

Our proprietary solution, the Carbon Cockpit, allows companies to measure their carbon footprint and track the progress of their carbon reduction strategies.

We also provide advisory services to support our customers implementing an end-to-end carbon strategy.

COMPANY BACKGROUND

Digiteal is a Fintech helping European businesses to accelerate their digital transformation and optimize their cash flow. Authorized as a payment institution and as TPP, Digiteal brings added-value from payment collection to automatic reconciliation.

ADDED VALUE

By developing invoice presentment, payment and open banking solutions, in partnership with integrators, invoicing & accounting softwares, Digiteal allows companies to get paid faster, more regularly and at a lower cost.

RANGE OF PRODUCTS

- 1) Invoice's presentment: B2B: Peppol Access Point for real e-invoicing.
 - 2) Payments: split & merge payments for marketplaces, B2B BNPL, pay button, payment QR code, SDD, etc.
 - 3) Open Banking: PIS (Account-to-Account payments) and AIS (import European bank movements where you want).
- Our simple API allows you to integrate Digiteal's solutions easily in your own flows.

Andrew DE PREST, CCO
Mobile: + 32 (0) 488 89 80 51
E-mail: andrew@exthand.com

COMPANY BACKGROUND

Exthand was founded by two tech veterans, Jean-Gabriel and Michael, in 2018. They were friends since high school and have had diverging careers until they reunited and started Exthand, an Open Banking company focused on bringing the most secure solution on the market to innovative companies.

ADDED VALUE

Exthand allows their clients to access one API that connects to the API's of 95% of the banks in Europe, UK and Israel. These API connections allow for two things: instant, Account to Account payments and the retrieval of data from bank accounts in these banks. This can be used to make payments cheaper and faster, do credit scoring, improve accountancy flows and much more. Talk to us to learn everything!

RANGE OF PRODUCTS

Exthand Gateway : white label SaaS solution for non-licensed companies, allows access to 1600+ bank connections through our servers, build whatever you want with our support and knowledge.
Exthand Banking SDK: solution for licensed companies, runs on-prem of client and guarantees data security and sovereignty. Take the full control of our technology and make it the core of your platform.

COMPANY BACKGROUND

Gambit Financial Solutions was created in 2007 by a group of scientists at HEC-University of Liège. Our ambition – then and now – is simple: to put the customer at the heart of investment advice by the use of innovative technology.

ADDED VALUE

Gambit can help banks deploy multiple customer journeys based off the same platform. Benefits of this approach include economies of scale, faster time to market, investment strategies aligned to each segment, differentiated customer digital experience, increased revenue streams and customer loyalty.

RANGE OF PRODUCTS

The Digital Wealth Management Platform of Gambit is used by financial institutions in different use cases. The financial institution has the capability to provide to their customer a digital investment offering service or to implement supporting solutions for a financial advisor when she/he is facing a customer.

Maximilien VERITER, Head of Product & Marketing
Mobile : + 32 (0) 470 19 30 52
E-mail : max@glooh.media

COMPANY BACKGROUND

Glooh was founded 3 years ago by Dimitri Themelis and Maximilien Veriter, two creative minds active in the DOOH industry. The Glooh mission is to democratize Digital Out-Of-Home advertising with an easy to use self-service platform, which allows companies to book smart and inventive street campaigns.

ADDED VALUE

With the Glooh platform, you can book, create and monitor smart digital out-of-home campaigns all in one place. Thanks to a multi-network inventory, you can choose screens in more than 10 different atmospheres all over Benelux and France, with possibilities to go even further thanks to our planning experts, who can guide and advise you to make your campaign super smart and efficient.

RANGE OF PRODUCTS

The Glooh platform addresses two types of businesses : the Glooh Pro, for medium to big companies who are interested in planning smart campaigns at local level ; and the Glooh Basic, for small businesses who want to reach their target around them. Glooh also proposes a White Label formula for companies with a screen inventory.

MAIN REFERENCES

With partners like ClearChannel, JCDecaux, Basic-Fit, Brightfish, ImediaCenter and Oxialive, we've already worked on smart campaigns for Yust, Partenamut, Siemens, Galler, Lab9, Welinvest and many more.

COMPANY BACKGROUND

As interactive experience designers, we imagine and create custom installations aiming at provoking emotions, generating interactions and creating magic through innovative technologies. User experience is always at the heart of our creative process.

ADDED VALUE

Our creations break down the barriers between digital content and interaction in order to reinvent human experiences through new technologies. Thanks to our expertise in new technologies, coupled with our extensive experience in audiovisual content creation and furniture design, our extraordinary installations leave a lasting impression with new, captivating and robust experiences.

RANGE OF PRODUCTS

Conception and realization of interactive digital installations and customized manipulations; immersive spaces and interactive video-mapping; monumental tactile: large-scale or atypical tactile surfaces, interactive models; integration of new technologies: connected objects, artificial intelligence, augmented and mixed reality; creation of interactive audiovisual contents; development of applications; assistance in the definition/evaluation of technological solutions, specifications.

E-mail: maxime@inmersiv.com

COMPANY BACKGROUND

inMersiv Technologies is a company specialized in the development of immersive solutions at the cutting edge of technology. These technologies are essentially intended for the medical field

ADDED VALUE

We aim to reduce the drug burden of institutionalized patients through the use of immersive and interactive technology. Our solution does not require a VR headset or any wearable, offering a shared immersion in a multi-sensory environment. These experiences are generated according to each patient's medical profile in order to match their emotional needs.

RANGE OF PRODUCTS

Sam Therapy, the Stress and Anxiety Management, is an autonomous 4D device that generates real-time extended reality experiences. The immersion is visual, acoustic and caused by air flows. Users can move around in an open world and interact with AI-powered virtual humans and animals. A computer vision system allows to capture the movements and to retranscribe them in the virtual world.

E-mail : gwt@insens.eu

Guillaume FRANCAUX, Administrator
Mobile: +32 (0) 473 65 20 98
E-mail: gfx@insens.eu

COMPANY BACKGROUND

After 5 years of discussions with the industry and more than 3 years of research, Insens, a Belgian company, has created a predictive maintenance and energy optimization solution for industrial rotating machines based on the analysis of the 3-phases electrical signals.

ADDED VALUE

Insens proposes RED, a condition monitoring system based on the electrical signature of AC motors that allows you to eliminate unplanned downtime and reduce energy consumption of rotating production equipment such as pumps, fans, conveyors, mixers... RED is an AI based machine monitoring system and is installed inside the motor control cabinet far from hazard, submerged or ATEX environment of the machine.

RANGE OF PRODUCTS

RED is more than just a predictive maintenance system. Most condition monitoring solutions focus only on machine health diagnosis and detecting upcoming failures (e.g. vibration analysis, lubricant analysis or infrared thermography). Our cutting-edge technology allows us, with the same solution, to provide predictive maintenance diagnostics with high reliability but also to monitor energy consumption, offer optimization suggestions and report the savings made.

COMPANY BACKGROUND

Since 2002: we design CONNECTORS between heterogeneous software applications.

ADDED VALUE

In 2016: the company wanted to diversify by opening its CONNECTORS to electronic sensors, always with the aim of better managing information, by combining it with management data. We combine all types of plug&play sensors, controllable sensors, allowing real time statistics, for alerting in case of malfunction or for control. In 2021: a partnership is forged with the French company ConsultingIoT to increase the company's know-how. KeepIoT-ConsultingIoT assists you in the design, evolution and development of your need. We offer tailor-made support to ensure a simple, fast and efficient implementation. Our technological choices are in line with your budget constraints and target markets.

RANGE OF PRODUCTS

Hardware: KeepIoT Cool/Safe/Pool /Garden/AC-Survey data concentrator and transmitter. Custom map development.

Software: platform allowing the visualization of the data of the installed sensors, alert on malfunction and statistics (recording).

KeepIoT AC - Survey (remote monitoring): Ensure that there is power or not on the AC circuit breakers of the circuits to be monitored in an electrical panel with SMS alert in the event of a fault.

Delegate (present in HALL2):
Viviane PARASCHIV, Director of Business Development
Mobile: + 44 7445 84 51 74
E-mail: viviane@levita-magic.com

COMPANY BACKGROUND

Levita was born in Liege, Belgium in 2018 from the creative brains of two friends and magicians, Clement and Philippe. Our mission is to use the essence of magic to generate emotions and to anchor, in a strong and lasting way, a product or an experience in customers minds.

ADDED VALUE

For the first time ever, we offer a 100% controlled levitation to highlight your product without any visible support, creating a fully immersive visual experience and adding various types of movement to your display such as rotating the product to offer a full 360° rotating view to show its smallest details.

RANGE OF PRODUCTS

Levita offers high quality products made of high-quality materials.

Every day, our teams work on research and development to provide you with exceptional products.

MAIN REFERENCES

Plug and play : This product comes with a 35x35 cm levitation area, allowing for one object to rotate on itself and move up to down.

Bespoke : We can fully customize the levitation to your needs (customize the dimensions, backgrounds)

Facebook: www.facebook.com/mintt.care/
LinkedIn: www.linkedin.com/company/mintt-care/

Delegate:
Nicolas FAUTRE, COO
E-mail: nf@mintt.care

COMPANY BACKGROUND

When his grandmother suffered a severe fall, one of Mintt's founders created a company combining technology and healthcare. With other founders, they developed Mintt, an AI-based solution using 3D sensors and motion-tracking algorithms to detect falls and send real-time warnings.

ADDED VALUE

Our fall detection system offers older adults better quality of care while giving them greater autonomy. By alerting the medical staff in real-time in case of a fall or risk of falling, this technology helps take preventative measures. We offer comprehensive analyses of falls, allowing caregivers to propose personalised care and reduce the risk of falls.

RANGE OF PRODUCTS

Mintt's solution is a discreet fall sensor designed to detect, analyse and prevent falls. Equipped with state-of-the-art artificial intelligence, the sensors can precisely detect body movements and support seniors and caregivers in their daily activities.

MAIN REFERENCES

Mintt is installed in numerous hospitals and nursing homes in Belgium and is now expanding its horizon in France, and other European countries. Its team of experts assures the quality of its technology and services.

COMPANY BACKGROUND

Born from the Citizen’s Hackathon of Wallonia 2022, SafeXp was conceived by a group of friends who understood the potential risks of cycling alone. Our aim? To make cycling safer by fostering a thriving community of cyclists.

ADDED VALUE

SafeXp, an application designed with a focus on community and safety. Our platform is your bridge to connect with fellow cyclists, ensuring you’ll never have to ride alone, whether on weekend trips or daily commutes. Plus, SafeXp provides a unique opportunity for cycling events to engage effortlessly with our vibrant community. Connect, ride, and experience the world of cycling like never before, with SafeXp!

RANGE OF PRODUCTS

Discover the SafeXp universe: connect with other cyclist or groups, from real-time safety updates and shared routes to a vibrant event calendar and professional networking. Benefit from our marketing platform, bridging the gap between cycling enthusiasts, gear companies, and event organizers. All in one place, SafeXp revolutionizes your cycling experience.

Bastien TAQUET, CBO & Co-founder
Mobile: +32 (0) 487 99 79 99
E-mail: bastien@satochip.io

COMPANY BACKGROUND

Satochip provides high-end hardware security solutions to store, manage and exchange crypto-currencies (e.g. Bitcoin) and digital assets (e.g. NFT). It uses the smartcard technology to meet the highest security standards at an affordable price.

ADDED VALUE

Thanks to its pocket size, Satochip products are accessible to all and easy to use. The customization of the products gives an interesting attractiveness and, coupled with a price defying the competition, offers a highly secure solution for everyone. Last but not least, our solutions are compatible with mobile phones thanks to NFC connectivity.

RANGE OF PRODUCTS

Satochip.io, the hardware wallet to securely store and manage your crypto-currencies (private keys).
Satodime.io, the bearer crypto card that allows you to physically exchange crypto-currencies from hand to hand without a trusted third party.
Seedkeeper.io, the very first hardware device that allows you to store and manage your seedphrases.

E-mail : Laurence.janssens@selinko.com

Andre GHIGHI, Head of Sales
Mobile : +33 (0) 766 1776 28
E-mail : Andre.ghighi@selinko.com

COMPANY BACKGROUND

Building on more than 10 years' experience in secure NFC technology, Selinko's solutions currently protect 1.5 Bio\$ worth of assets in categories such as wines, spirits, design, high-end audio and collectibles. In 2022, Selinko was admitted by the LVMH group to its "Maison des Startups" acceleration program.

ADDED VALUE

Selinko gives luxury brands a digital identity and creates the link between the physical product and its digital twin by embedding either a secure NFC chip or a serialized QR code in products. Consumers can scan the products with their smartphone, giving them instant access to unique product and brand information. Selinko's innovative solution creates a trusted one-to-one communication channel which gives brands the ability to provide high-value added digital experiences pre- and post-sale. Our solution provides a stronger digital experience and endless opportunities for the brand to engage with their clients, whether they purchased in-store, online or second hand.

RANGE OF PRODUCTS

Our secure platform enables brands to provide their clients with additional after-sales services such as ownership certificates, warranty activation, NFT's, instant customer service, product resale, product recycling and more! Additionally, through the secure NFC chip, clients can ensure the authenticity of their products. Brands, in parallel, have access to more customer data and track & trace abilities.

MAIN REFERENCES

Our clients range from spirits & wines (Laurent Ponsot, Sazerac, Lafite) to luxury fashion (LVMH) and perfumes (Atelier des Ors, Artiris) to high end audio cables (IAH, Jorma)

COMPANY BACKGROUND

Regular social media platforms tend to decline our real-life social interactions. Since September 2022, WeShre does the opposite by providing its current 4000 users a tool to meet in real-life through festive, cultural, and sport events organized by users for users.

ADDED VALUE

WeShre is the only C2C platform that helps its users to organize festive, cultural, and sport events by users for users. Its competitive advantages lie in its user-friendly interface, centralization tool for each type of event, mix of virtual and real social life, all in a secure package. WeShre is the ultimate all-in-one tool for enhancing your social life.

RANGE OF PRODUCTS

WeShre is a C2C platform that aims at connecting people in real life through festive, cultural, and sport events organized by users for users. WeShre includes the necessary tools to make organization and participation simple, easy, and safe.
