

HoZe Solutions GmbH introduces the:

Papageno System

Safe and water efficient extinguishing appliance for wildfires

Transforms bushland and roads into **effective fire lines**.

The **autonomous operating mode** means no personnel is required in the danger zone.

The system is designed to dispense **the right amount of water** to contain fires of increasing intensity.

The system can work **at night** and **under strong winds**.

The system has been **academically validated** to contain fires with flames exceeding 8 meters in height.
