FFA TITAN

100 Actionable insights provided by FFA Titan

600 Terabytes processed by FFA Titan

0 Failures in data pipelines in FFA Titan

Our customers

BJORN MEULEPAS
CFO at Mola BV

“Food For Analytics has enabled Mola BV with actionable insights into our OEE.

Working with Food For Analytics is structured and very pleasant.

They always have a concrete plan of execution and deliver!"

ROALD HEINSBROEK
CFO at Luiten Food

“We have been working together with Food For Analytics for more than 5 years.

In this time they created a great BI platform and great insights into our data.

These insights helped us in making the right decisions to grow our business.”

SANDER PETERS
COO at PG Kaas

“Food For Analytics added a great deal of value to our business.

They implemented a compact but effective data & analytics platform.

Through these insights we optimized our production processes. ”

Next steps:

data & analytics roadmap

We start with a 2 day workshop to define your data & analyics roadmap for 1 to 3 years.

We will do this along the key pillars of 'people', 'process', 'technology', and 'data'

Giving us a clear view of what we want to achieve.

FFA Titan platform

Together we deploy the FFA Titan platform within Microsoft Azure (cloud) or on-premise

FFA Titan is the foundation for information products that will collect, connect, and visualize data.

Providing scalability, flexibility and robustness.

Information products

For each information product on the roadmap we identify requirements and the functional design.

Based on functional design we develop the information product in an agile way.

Allowing us to deliver business value quickly.

Eliminate waste

Yourself and your organization will start using the information products.

Providing you with actionable insights for sales, finance and production.

Letting you cut costs and increase margin.

Be the industry giant
With your own data
and FFA Titan
