

# Lucid visual collaboration suite

**Lucid is the only visual collaboration suite that gives teams the power to go from imagining the future to building it. Bringing clarity and connectedness together to help teams collaborate, ideate, and build projects in real time.**

# Navigate the next normal

In today's fast-paced, ever-changing business environment, the "next normal," centers on the digital workspace where dispersed teams can work together from anywhere at any time. Only organizations that embrace agility and effectively adapt to changing dynamics will not only survive, but thrive.

## Lucid's visual collaboration suite is built with the next normal in mind.

### Turn complexity into clarity

Visual collaboration helps teams brainstorm ideas, nail down vital details, gain context, and identify crucial insights to chart a clear path forward.

### Bring teams together from anywhere

Keep remote teams connected and aligned to combine the power of agility and alignment to move work from one stage to the next.

### Illuminate the best path forward

Align teams, behind the best ideas to keep projects moving forward with shared understanding, confidence, and communication.

# Lucidspark

Harness the power of freeform ideation, dynamic brainstorming, and strategic planning to launch the best ideas into action.

## Brainstorming & ideation

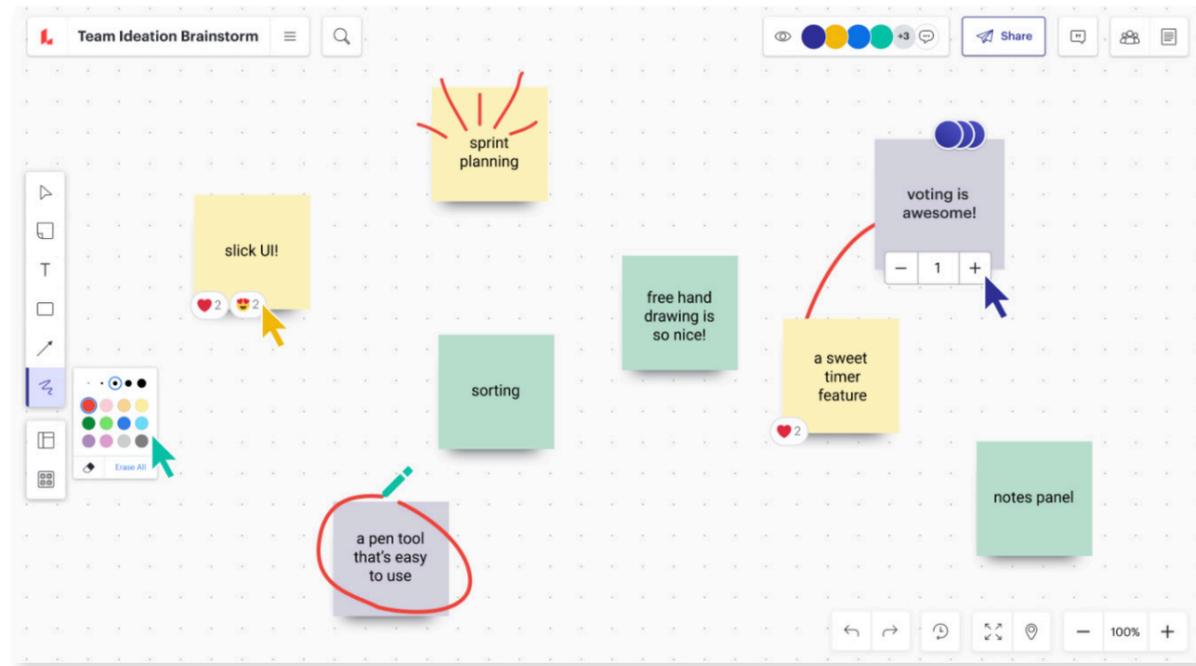

Work together with your team in real time hosting group brainstorming, workshops, and mind mapping sessions to drive innovation.

## Agile development

Revamp your remote standups, sprint planning sessions, PI planning meetings, and retrospectives to align your teams.

## Strategic planning & analysis

Plot your strategy, prioritize business needs, host big-room planning sessions, and start action planning to get stakeholder buy-in.

# Lucidchart

Create intelligent diagrams to empower teams to clarify complexity, align their insights, and build the future—faster.

## Process improvement

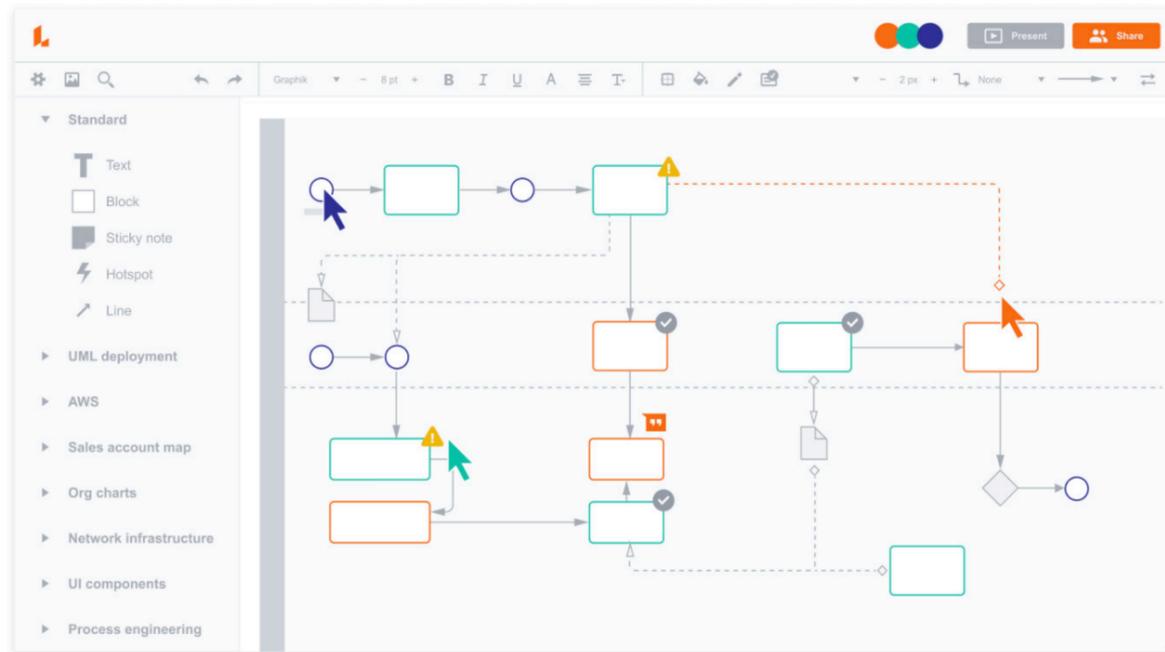

Easily chart out your organization’s process maps, value stream maps, users journeys, and more to identify risks, improve inefficiencies, and scale your business.

## System visualization

Gain visibility into your existing technology using data flow diagrams, wireframes, codebase diagrams (e.g., UML), and software architecture diagrams to create a vision for future innovation.

## Organization optimization

Utilize org charts during your organization and team planning sessions to align employees to your business strategy to maximize efficiency and drive better decisions.

# Lucidchart Cloud Insights

Automatically visualize your cloud environment to better understand, optimize, and govern your cloud environment through accurate, interactive diagrams.

## Automated cloud diagrams

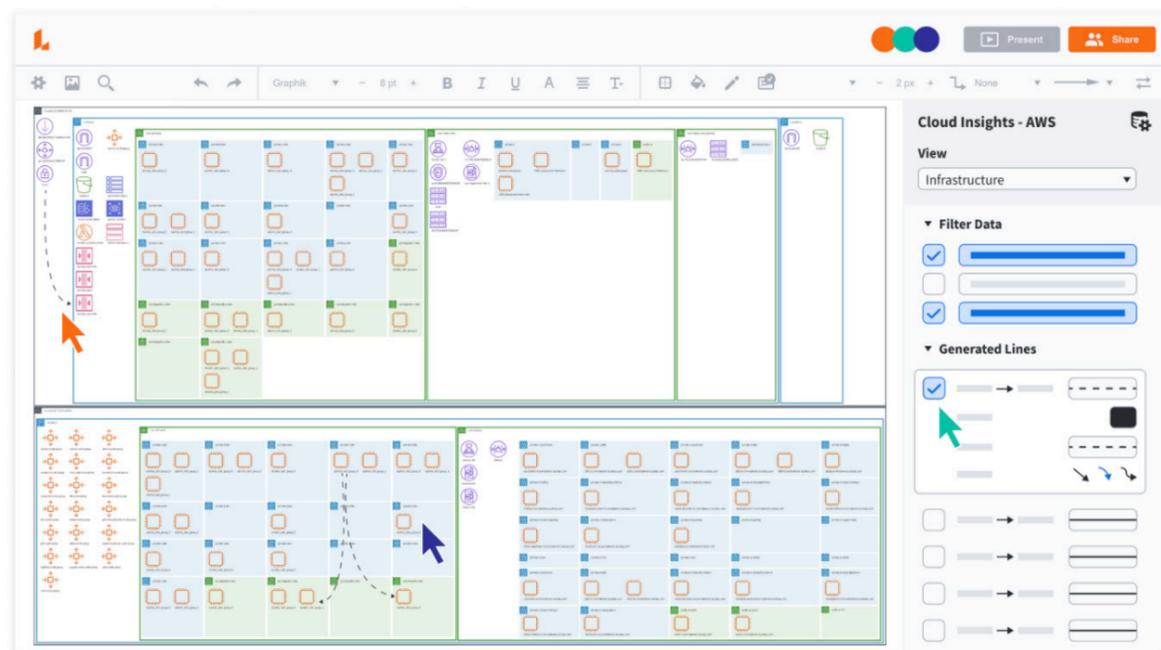

Automatically generate up-to-date, accurate cloud diagrams backed by data from all three major cloud-providers (AWS, GCP, and Azure) to create a snapshot of your cloud environment.

## Verify cloud implementation

Verify cloud architecture was built correctly, prep for internal and external security reviews and start future plans with confidence in your current state.

## Understand what's in your cloud environment

Visualize your infrastructure to extract crucial insights and determine if anything is orphaned or unidentified, helping you avoid risk and cut unnecessary cost.

**It's easy to make the switch  
to Lucid.**
