

Scale your business  
with the **Blockchain**

# We are **Scaling Parrots**, an innovative startup

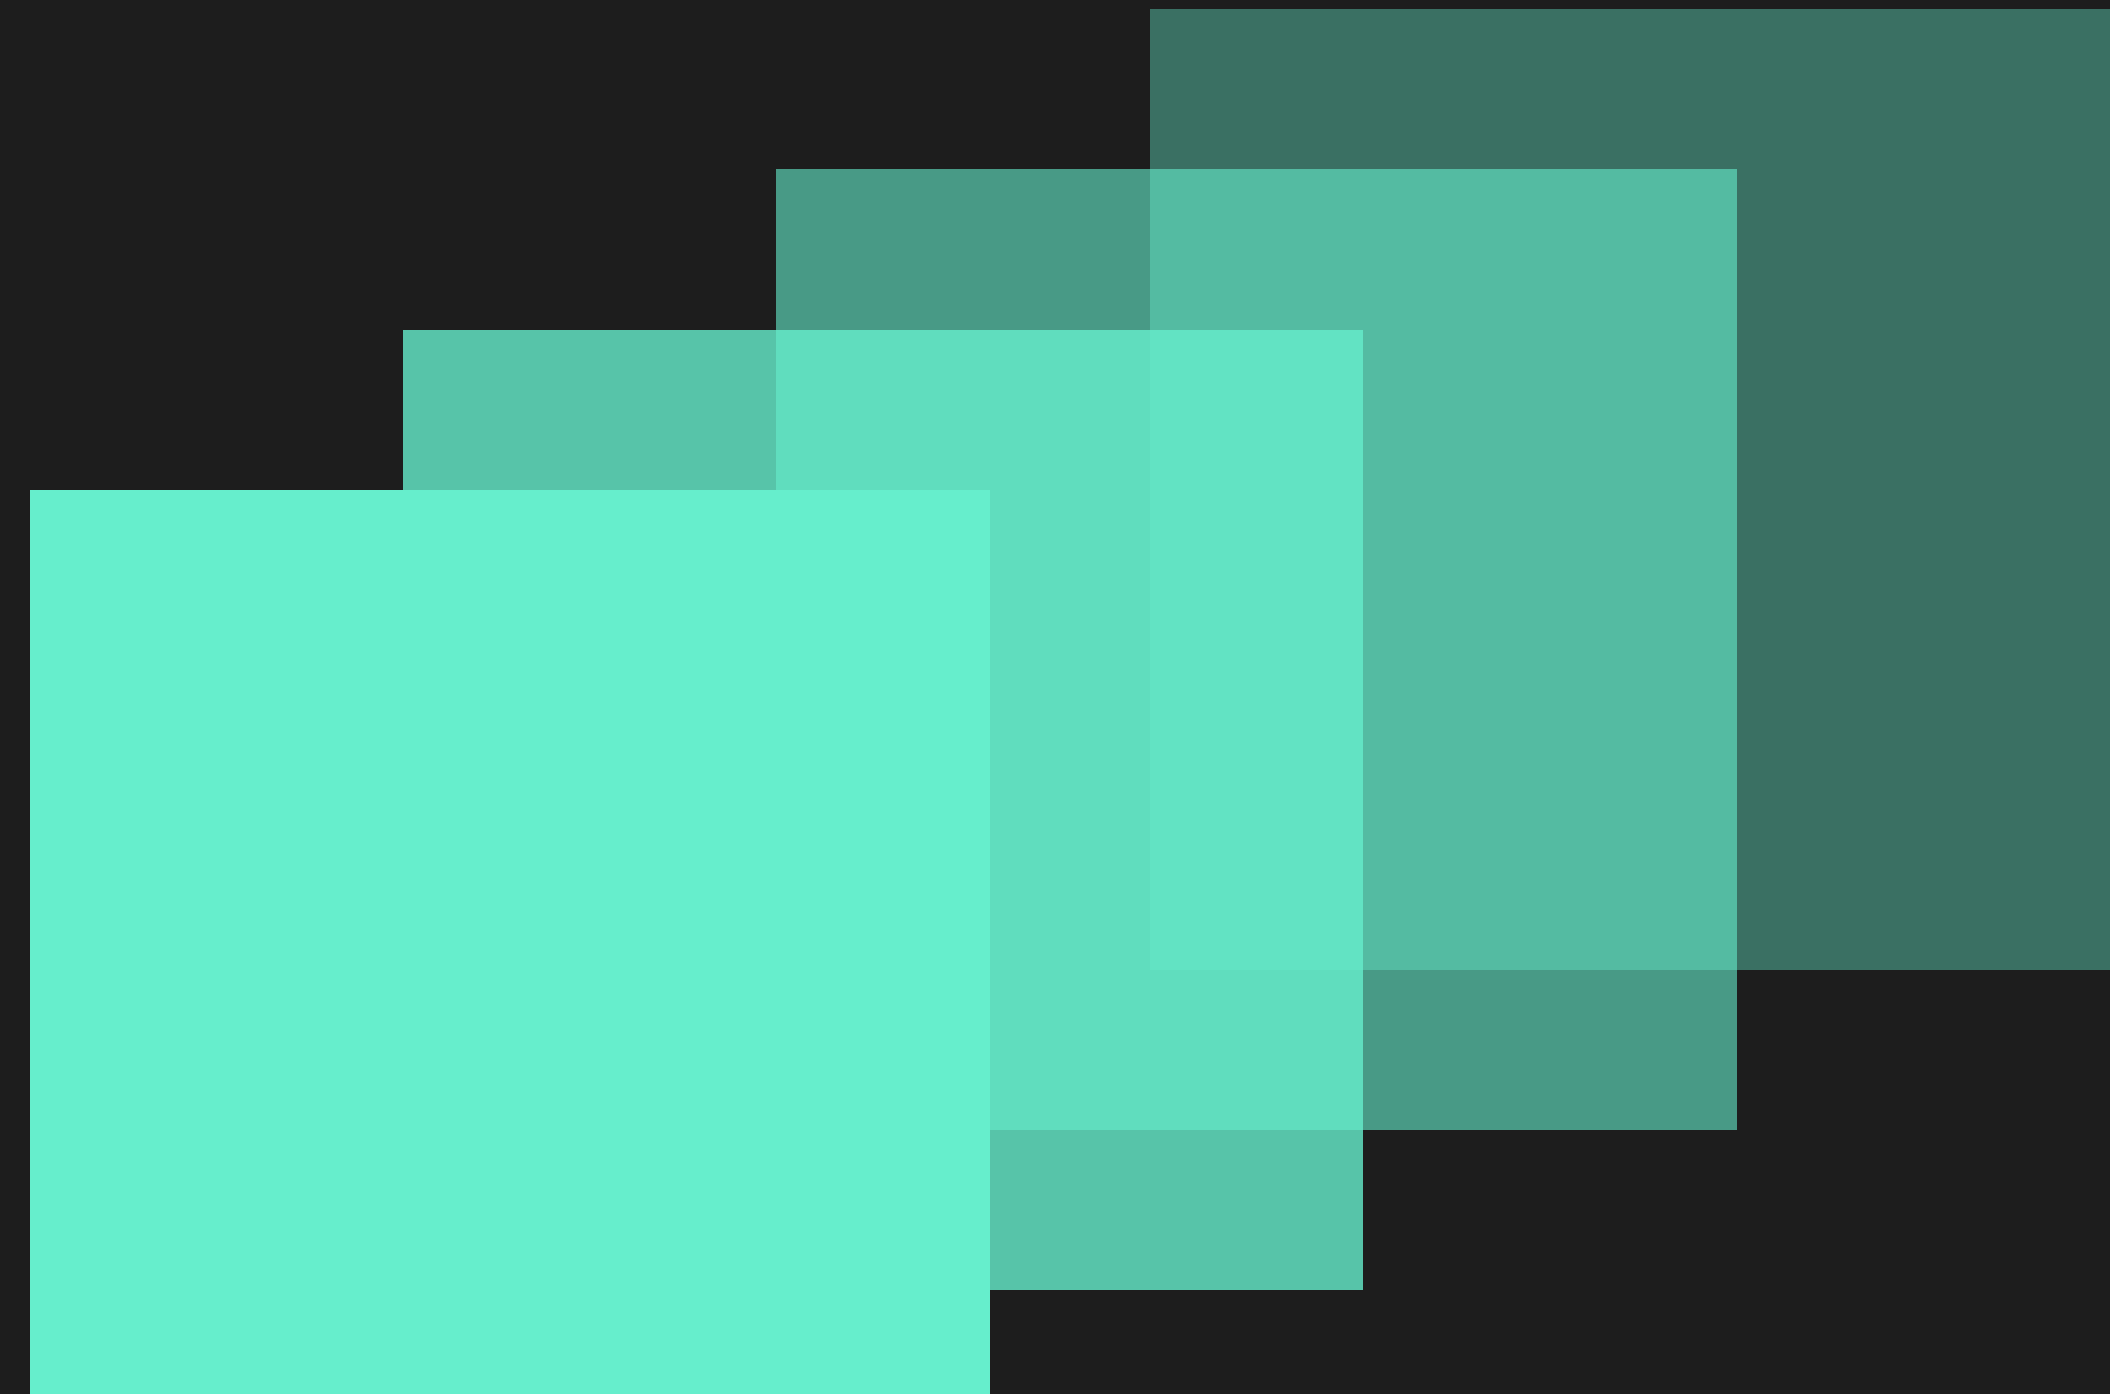

We deal with consulting and development  
in the Blockchain field, to **scale** and  
**enhance** businesses.

# Blockchain is our **specialty**

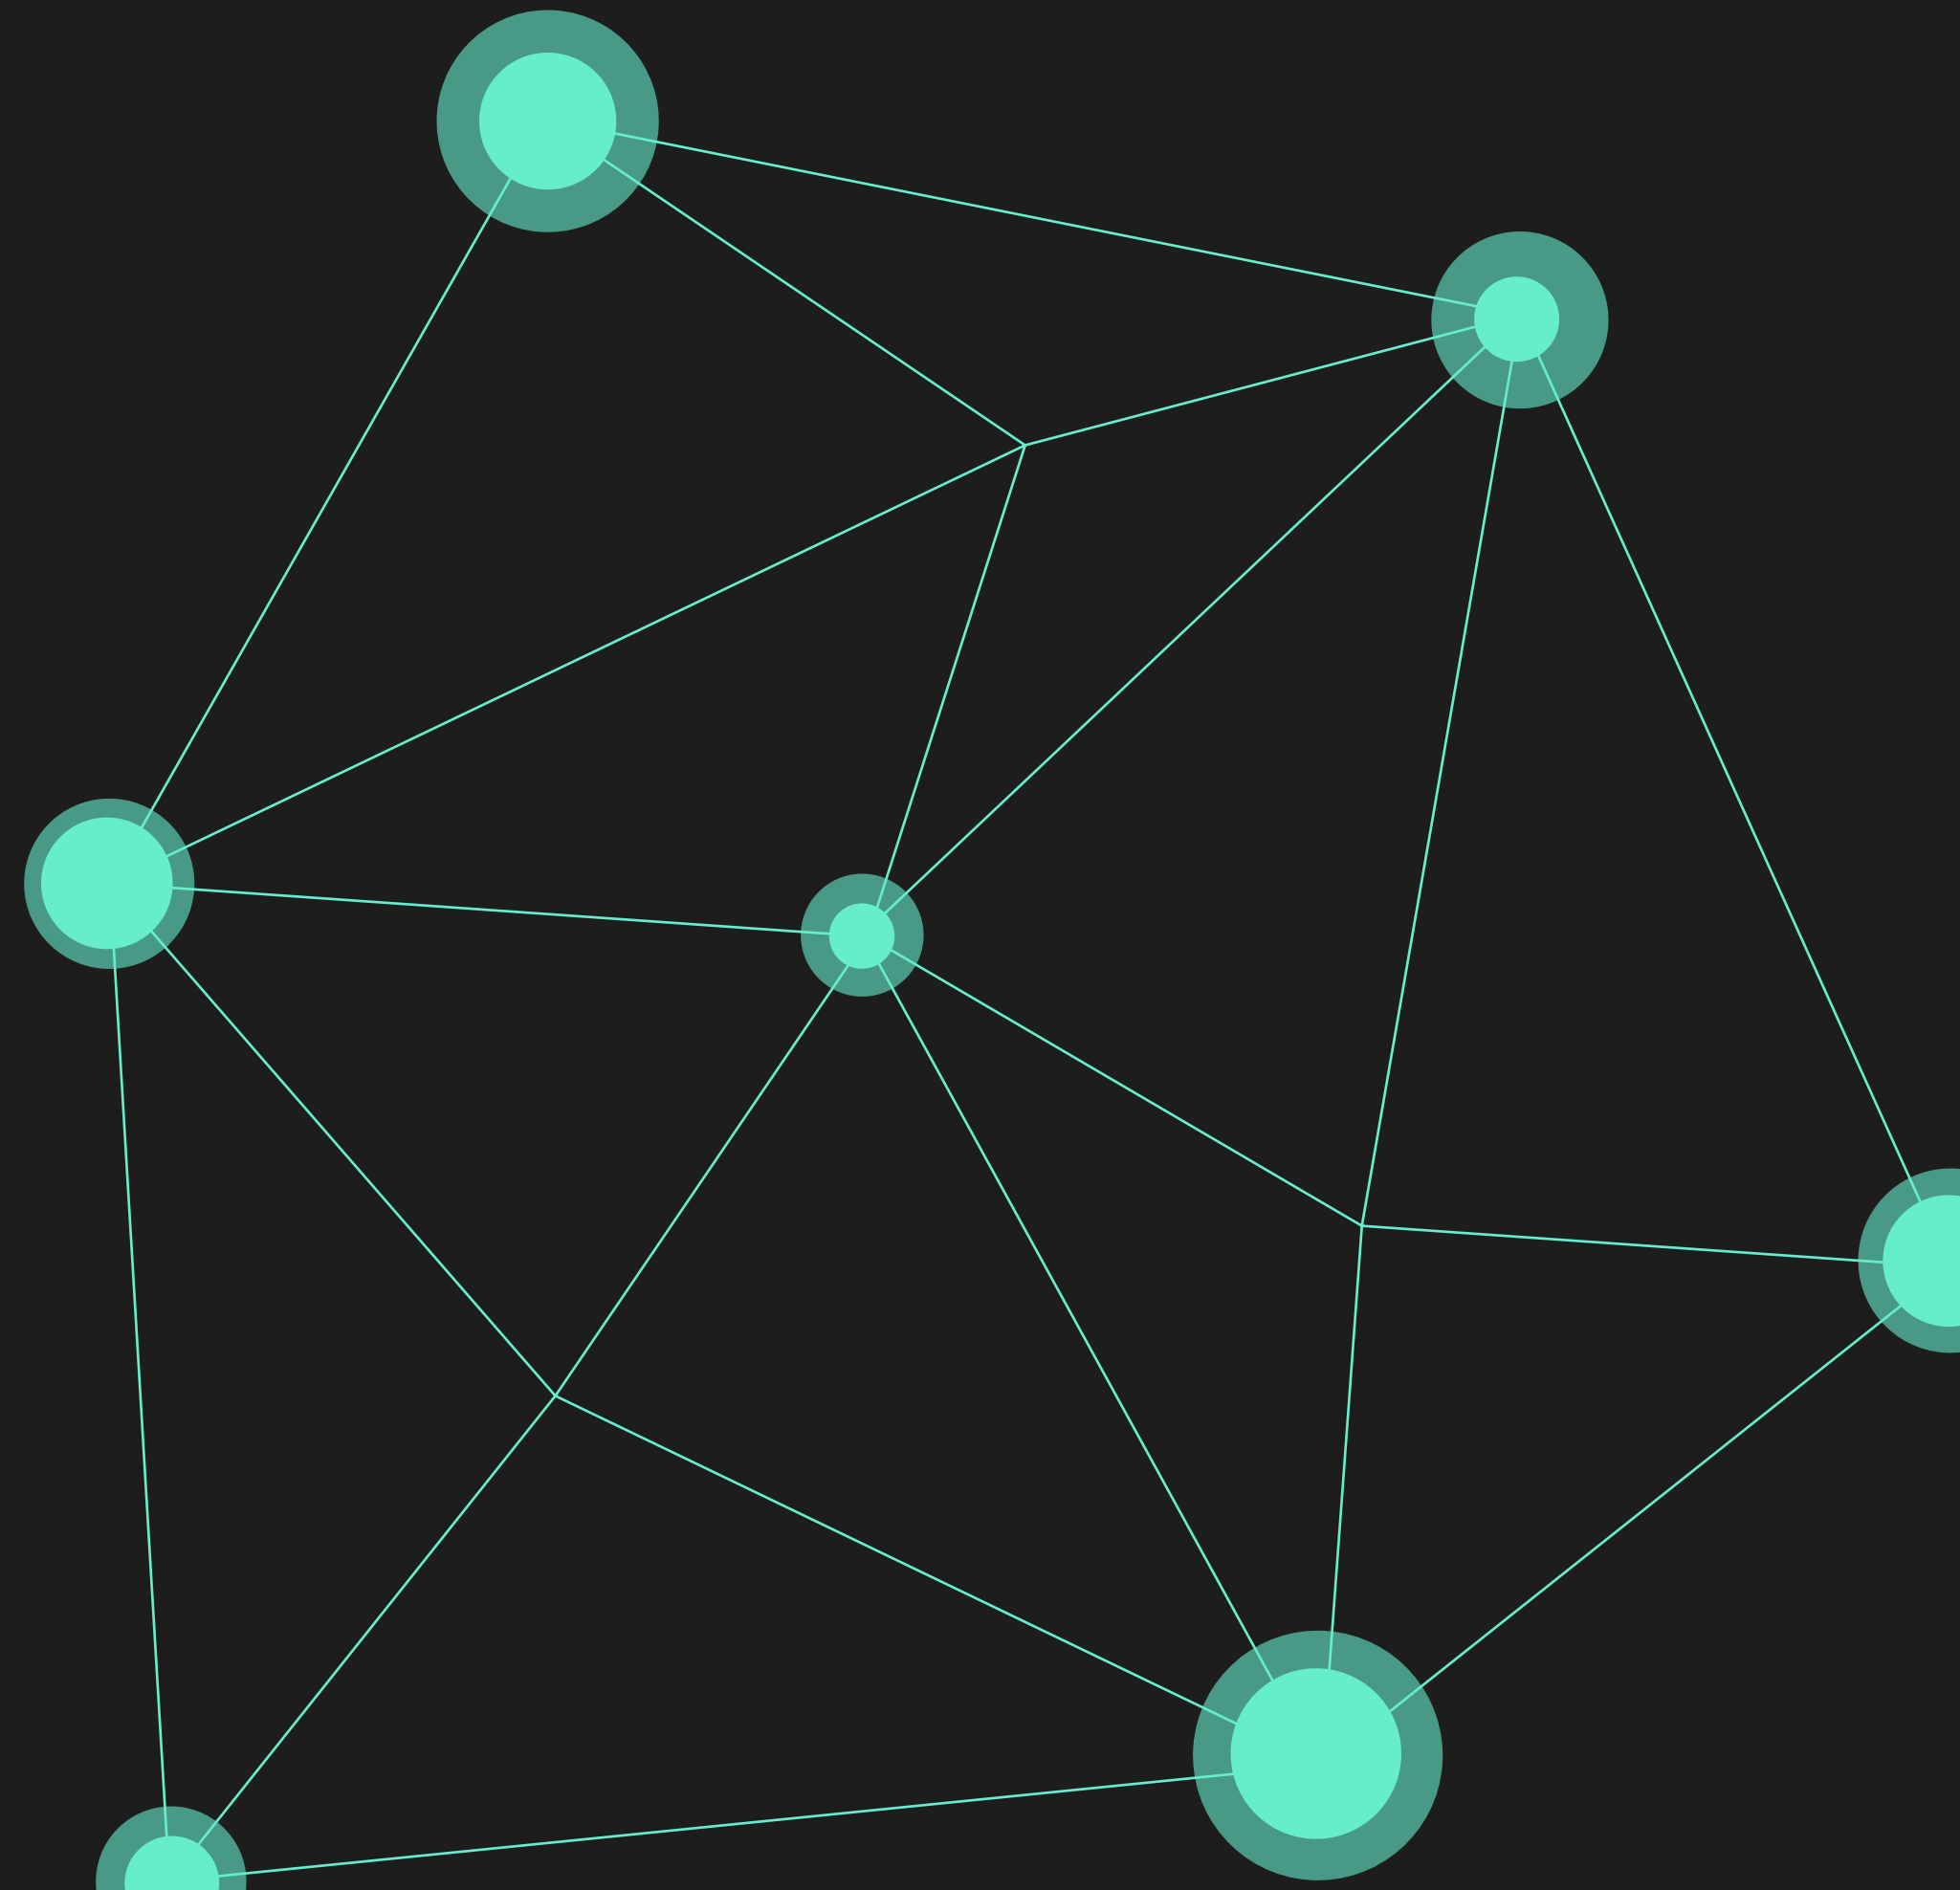

We help companies understand **how to leverage** Blockchain technology and **how to implement it** in their business, accompanying them during the research and development process.

# We propose the best technological solutions

We provide **customized** Blockchain solutions for each client, developed by our team, ensuring flawless service **development** and **maintenance** over time.

# Our method is **analytic** and **innovative**

- **We analyze the problem**, the need and the vision. We go deep to understand exactly what technology and tools the company needs to grow.
- We plan all the actions to be done to carry out the project and bring it to light by combining **entrepreneurial experience** and **technical know how**.

# How can you **apply** the Blockchain?

We provide **software** solutions by implementing  
Blockchain technology in several sectors.

Discover some →

# 1. Industrial 4.0 sector

Thanks to the Blockchain we are able to **perfect data and product traceability** systems.

We innovate industrial processes by bringing **safety**, **digitalization** and **technological evolution**, elements capable of revolutionizing the reference market of companies. We support **eco-sustainability** thanks the traceability of machinery consumption with the aim of optimizing it for economic and CO2 savings.

## 2. Financial sector

**Decentralized finance** (or DeFi) is the first sector in which the Blockchain has found application.

Banks, insurance companies and investment firms can benefit from the **speed**, **security** and **transparency** of the transactions made on Blockchain.

# 3. **IT** sector

The **big data** generated by modern technological systems are enormous and exploited only to a small extent compared to the real possibilities.

Thanks to the Blockchain, any information can be **collected** and **tracked** at the service of companies to optimize and enhance their processes.

# 4. Gaming sector

Gaming, a sector that already bills more than 2 billion dollars a year, **is set to grow** more with the support of the Blockchain.

Our knowledge allows us to set up the so-called "**Play-To-Earn**", video games based on the tokenization of game elements.

**Planet Wars**, our video game, belongs to this branch of the Blockchain.

# 5. Real estate sector

Even the real estate sector, by its nature illiquid, can benefit from an improvement thanks to smart contracts.

Blockchain tokens greatly facilitate **the management of real estate sales and investments.**

Real estate can also be partitioned into various tokens, allowing small investors to enter this market.

# Our clients

**Companies** and **entrepreneurial realities** we have worked with,
