OpenAirlines
Save Fuel, Save Money, Save the Planet!

www.openairlines.com

One platform to empower all your team in your fuel program.

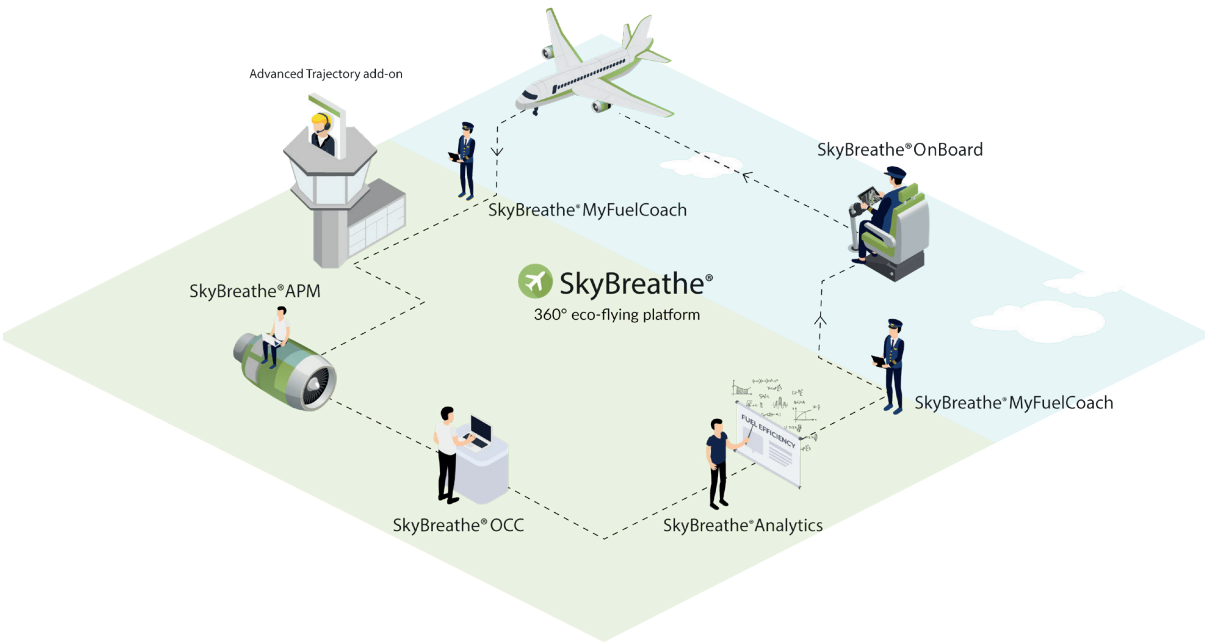

SkyBreathe® is much more than just a fuel efficiency software, it is a complete platform that gives you all the tools you need to build and grow a successful fuel efficiency program without having to juggle many different tools.

All the integrated products have been thought to involve all stakeholders, and spread a vibrant green culture in your airline to reduce fuel consumption, CO2 emissions, and costs.

“SkyBreathe® has proven to be a key tool to implement our fuel conservation plan. In 2019, we saved about 3200 tons of fuel, which represents **between 4 and 5%** of our total consumption and **our pilots love it!**”

Emmanuel Cachia
Head of Flight Operations at Transavia
transavia

SkyBreathe® 360° eco-flying platform

SkyBreathe® Analytics
Identify fuel saving opportunities, monitor progress and take action through a powerful Big Data and AI fuel management software.

SkyBreathe® MyFuelCoach
Empower pilots with a mobile app that let them see how well they performed, learn how they could improve and better prepare pre-flight briefings.

SkyBreathe® OnBoard
Engage pilots at the right moment with an EFB application that provides real-time support for fuel-saving during the flight in a seamless, and natural way.

SkyBreathe® OCC
Take control of your on-time performance, understand root causes for delays and perform in-depth analysis about your operations.

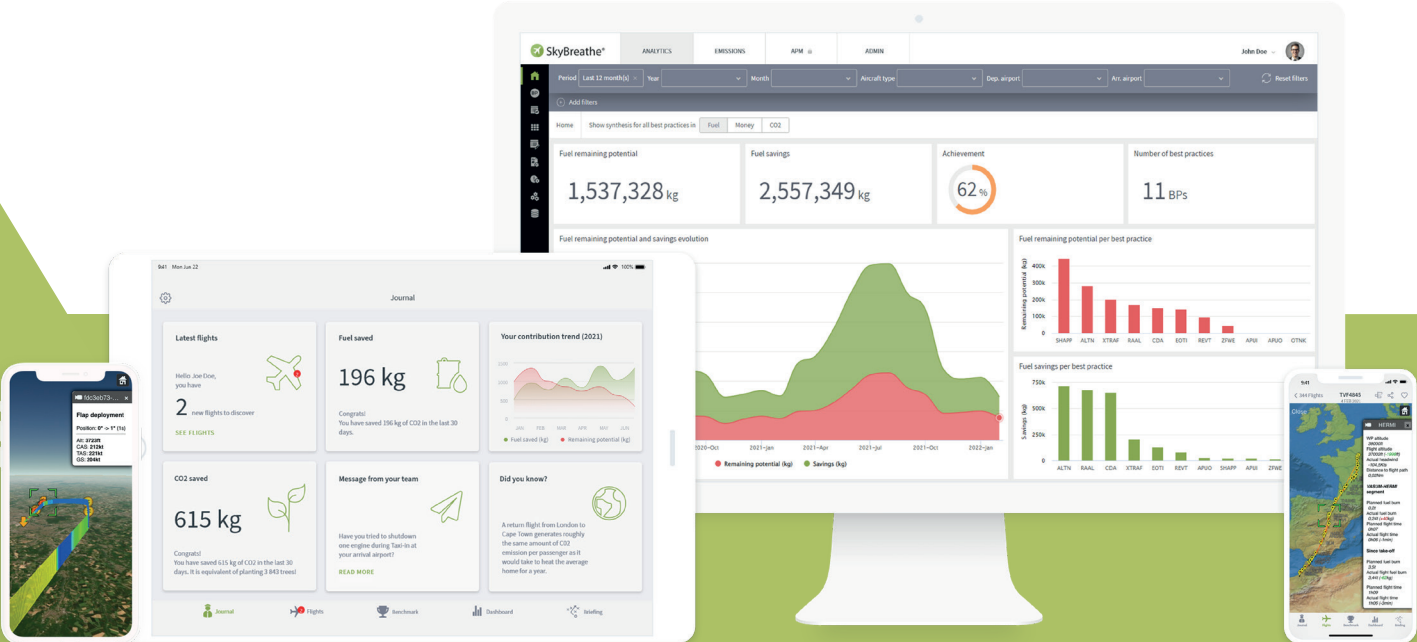

“Pilots are much more aware of their fuel performance and how they can **improve**. They feel **engaged** in the process. In less than 3 years, we saved more than **35 million USD** thanks to SkyBreathe®.”

Francesc Torres
Director Flight Operations Technical Support & Dispatch at Cebu Pacific
cebu pacific

Add-on Advanced Trajectory
Benefit from a coherent set of extra features around trajectory analysis. Take flight analysis to the next level by using plenty of additional functionalities to identify new savings opportunities.

SkyBreathe® APM
Continuously monitor aircraft performance with an up-to-date view of the entire fleet health. Get notified of abnormal deterioration and get indicators for pro-active maintenance.

SkyBreathe® for chief executive officer & chief financial officer

Reduce your **#1 cost** by up to **5%**

Succeed in your digital transformation while becoming a leader in environmental excellence.

SkyBreathe® for head of flight operations & chief pilot

Improve flight operations performance

Prioritize your fuel saving opportunities by targeting areas with the greatest potential first.

SkyBreathe® MyFuelCoach™ for pilots

Improve performance while complying with internal best practices

Mobile access to your eco-flying app, for your eyes only. Track your progress to see your achievements and remaining potential savings.

SkyBreathe® for fuel managers & operations engineers

Save time and improve your operational performance

Quantify and increase fuel savings by up to 5%
