Why should you do a metaverse event ?

The Covid era has triggered the emergence of the live streaming market, as industry leaders transformed their in-person events into virtual ones

<https://nftevening.com/the-fabricant-wow-rlty-host-a-3-day-metaverse-fashion-event/> it's a new and better way to gather several hundreds/thousands of people online in a quality way

Web3 keeps driving innovation at a rapid pace, thus gathering attention. Its online communities are becoming powerful and are keen to gather in Metaverse experiences

MMORPG is exploding and players are spending an increasing amount of time socializing in virtual worlds. Metaverse events are thus becoming a preferred alternative to IRL events, as they offer more gamified and easily accessible experiences.

What are the key pillars of a metaverse event?

01

Social interaction

Enable chat, voice and vision to improve interactions between attendees

02

Content

Customize event space and deliver rich content (live stream, video, photo, presentation, ...)

03

Transactions

Leverage Web3 capabilities to offer in-event transaction and external portability

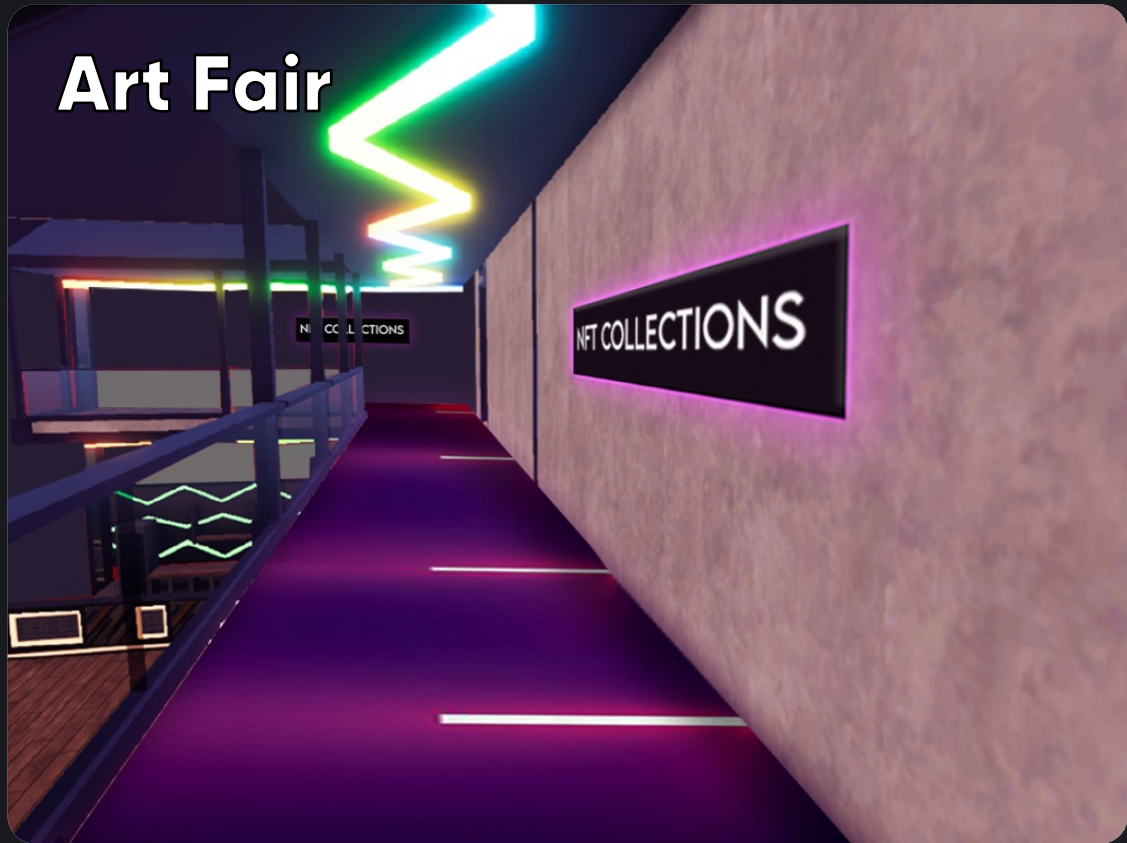

04

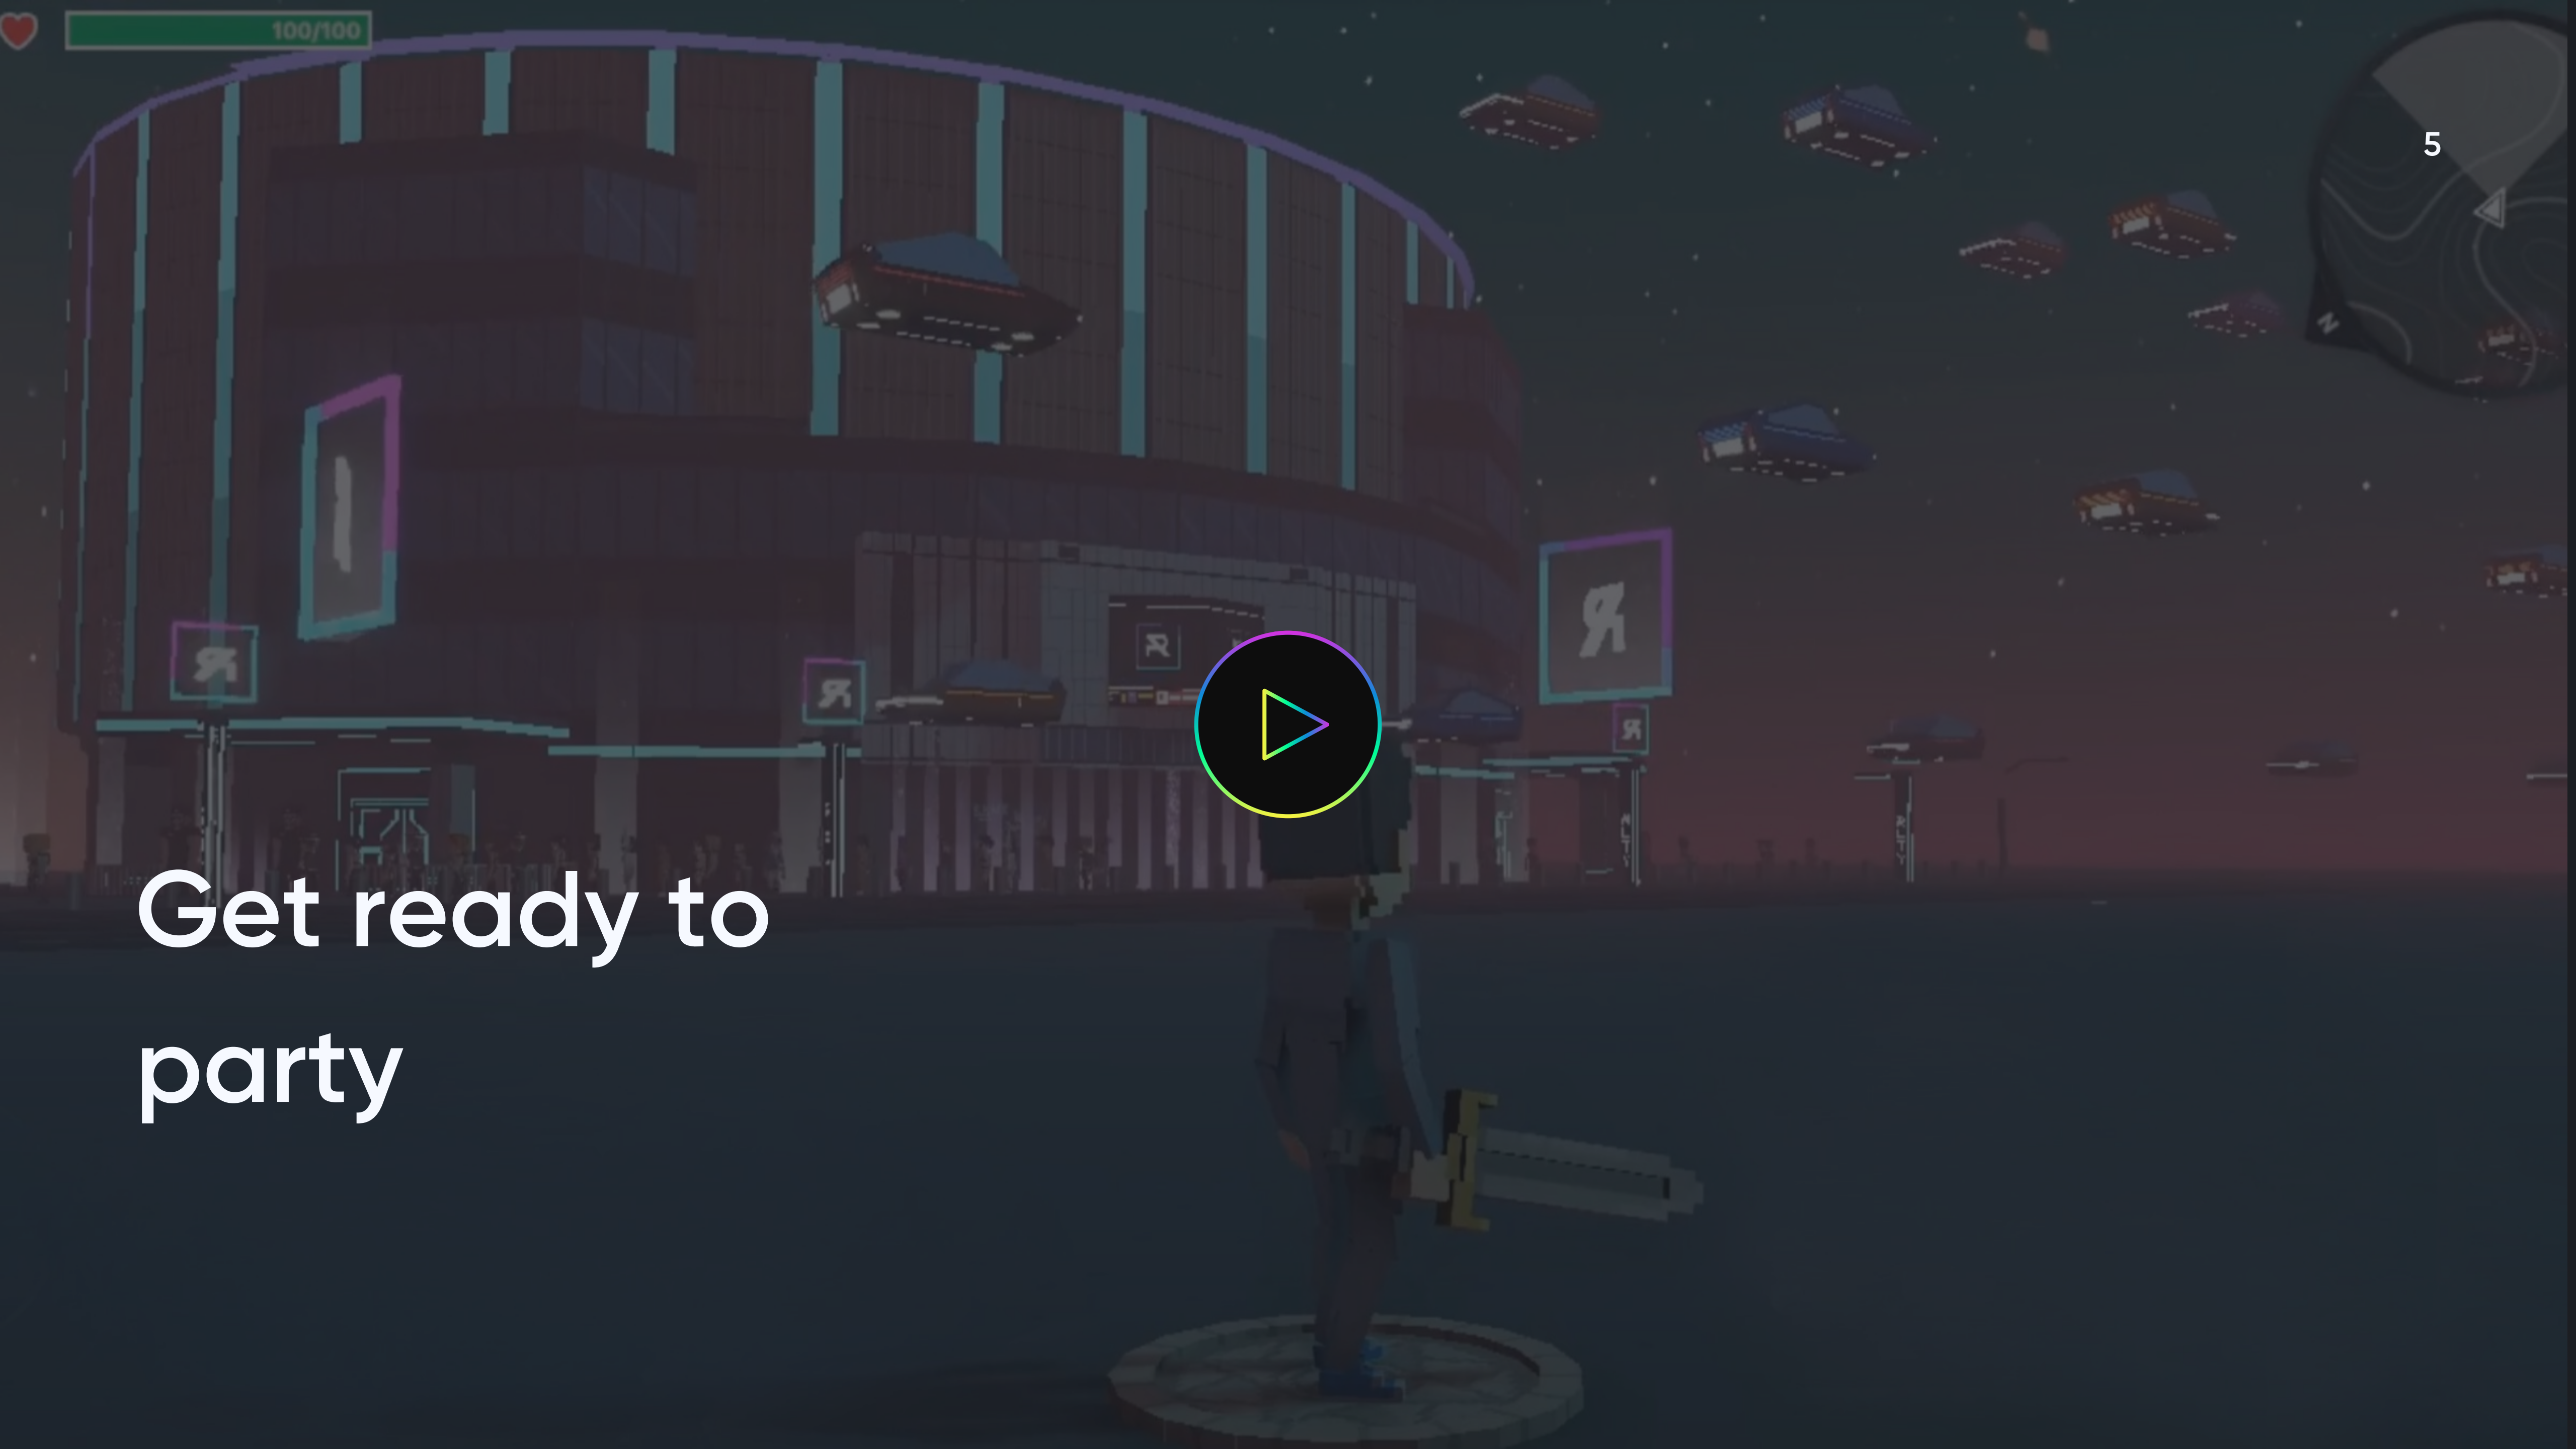

Gamification

Enrich experience through a unique gamified approach

Workflow**

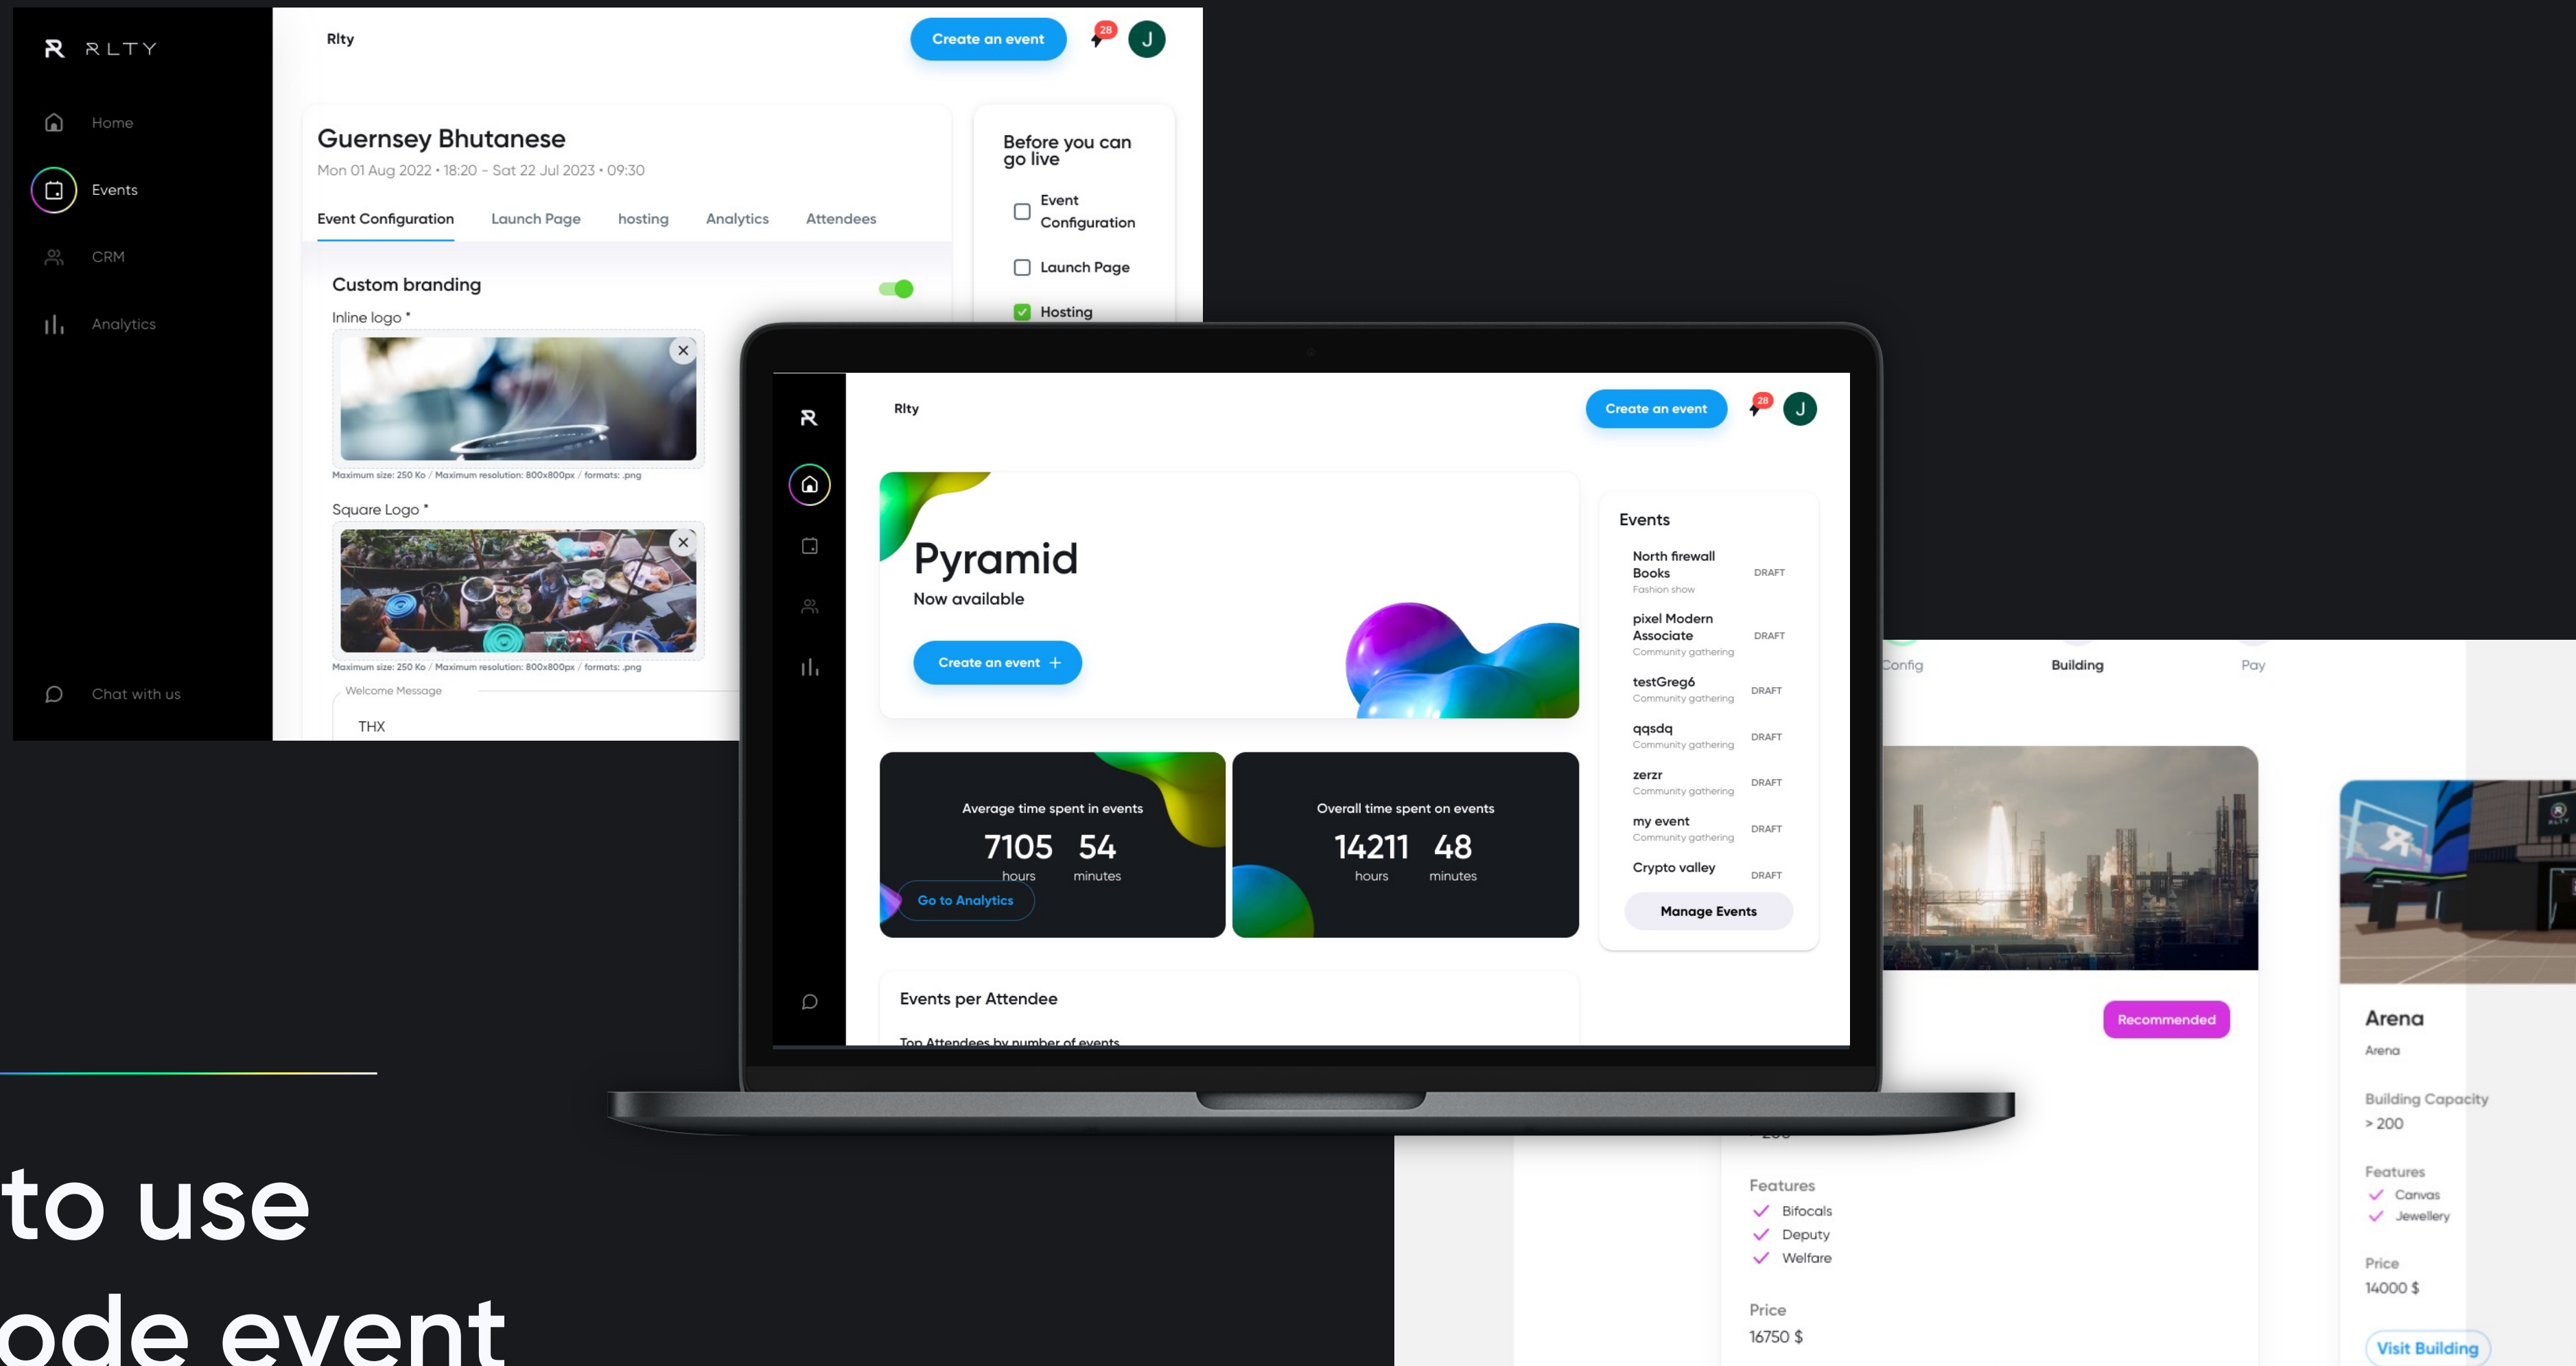

**No-code cross-
metaverse
event builder**

**Proprietary
Metaverse
Environment**

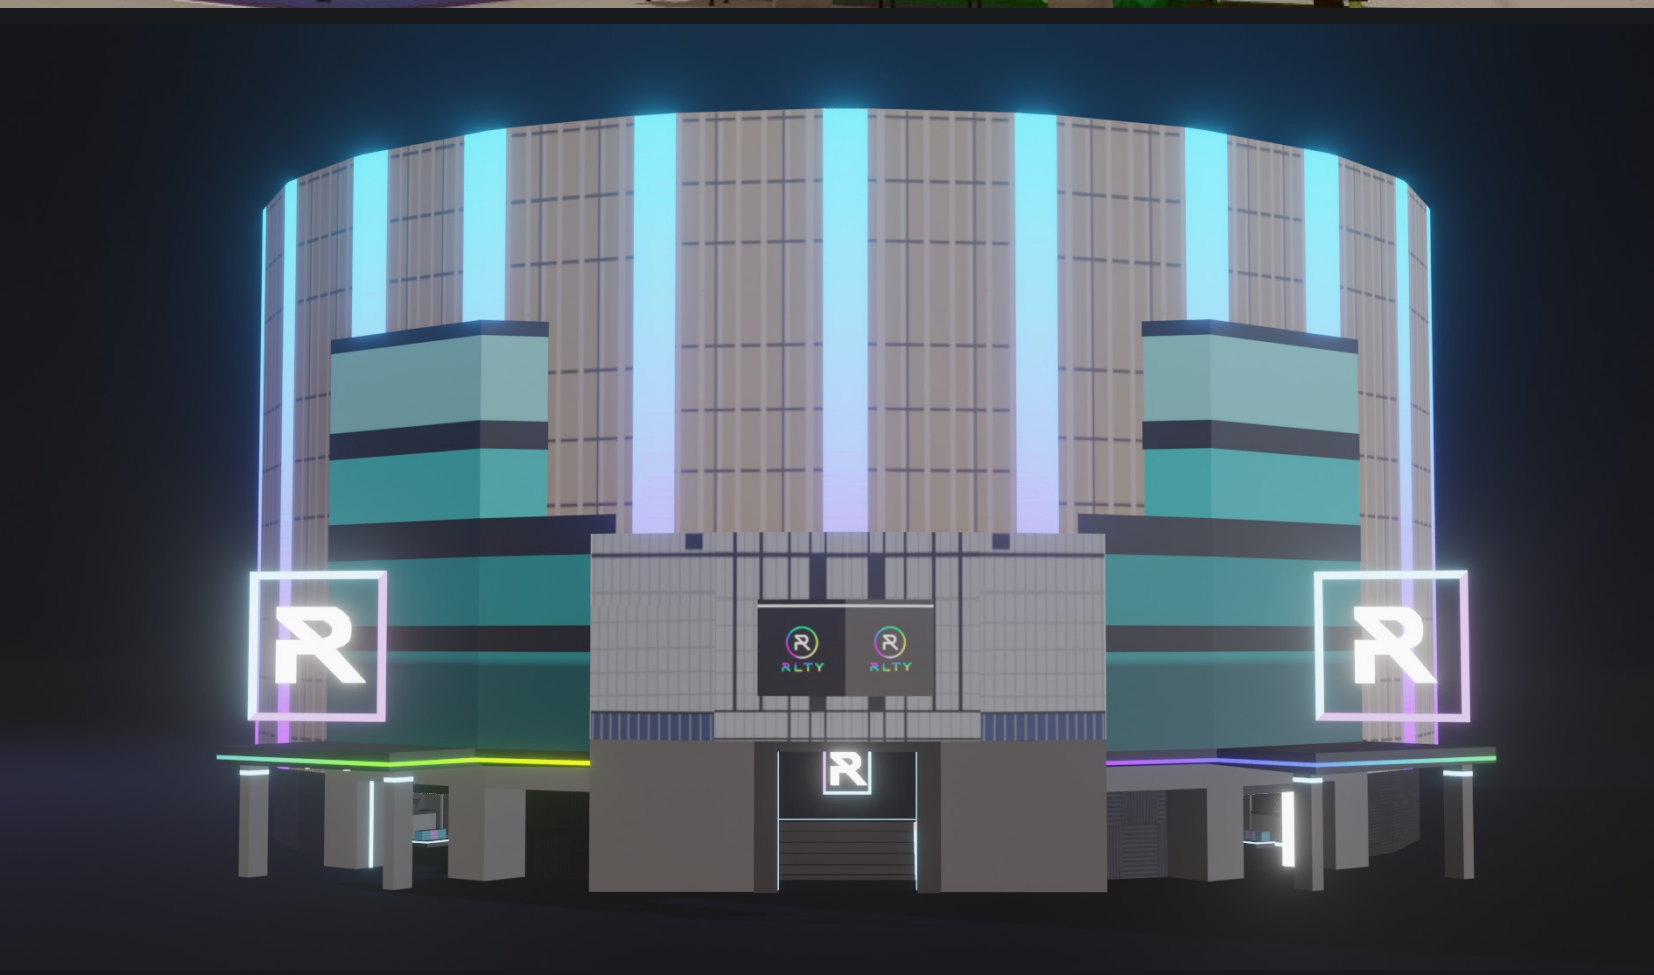

Leveraging the most advanced technologies in VR, Cloud computing, Blockchain and Video Games, we have built a complete set of tools to create metaverse events in an easy, scalable, secure and fully customizable way. The end-user experience remains our priority so we keep building everyday to improve our events and their underlying technology

A fully managed event creation process

- 1 Deploy and test your event on **RLTY test environments**
- 2 Automate **land booking** and deployment
- 3 Market your event through our **launchpad**
- 4 Monetize your event through **NFT ticketing**
- 5 Access **Analytics** data after your event
- 6 Wide range of **features** specific to the event and **capacity of users**

Admin rights management

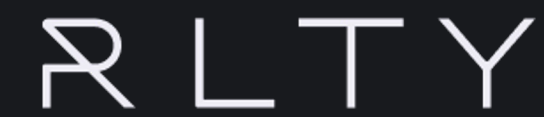

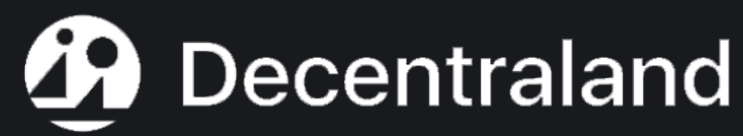

Scene Access control

Donation box

Jukebox

Attendees "labelling"

Metaverse agnostic platform

Empowering a full team to deliver

Through a dedicated interface, each party can access the right content to bring its contribution to the event

Collaborators

Give access to your collaborators and manage ACL rights

Designers

Onboard 3D artists to deeply reshape our buildings according to your needs

RLTY Support

Interact live with our support team and event specialists

Developers

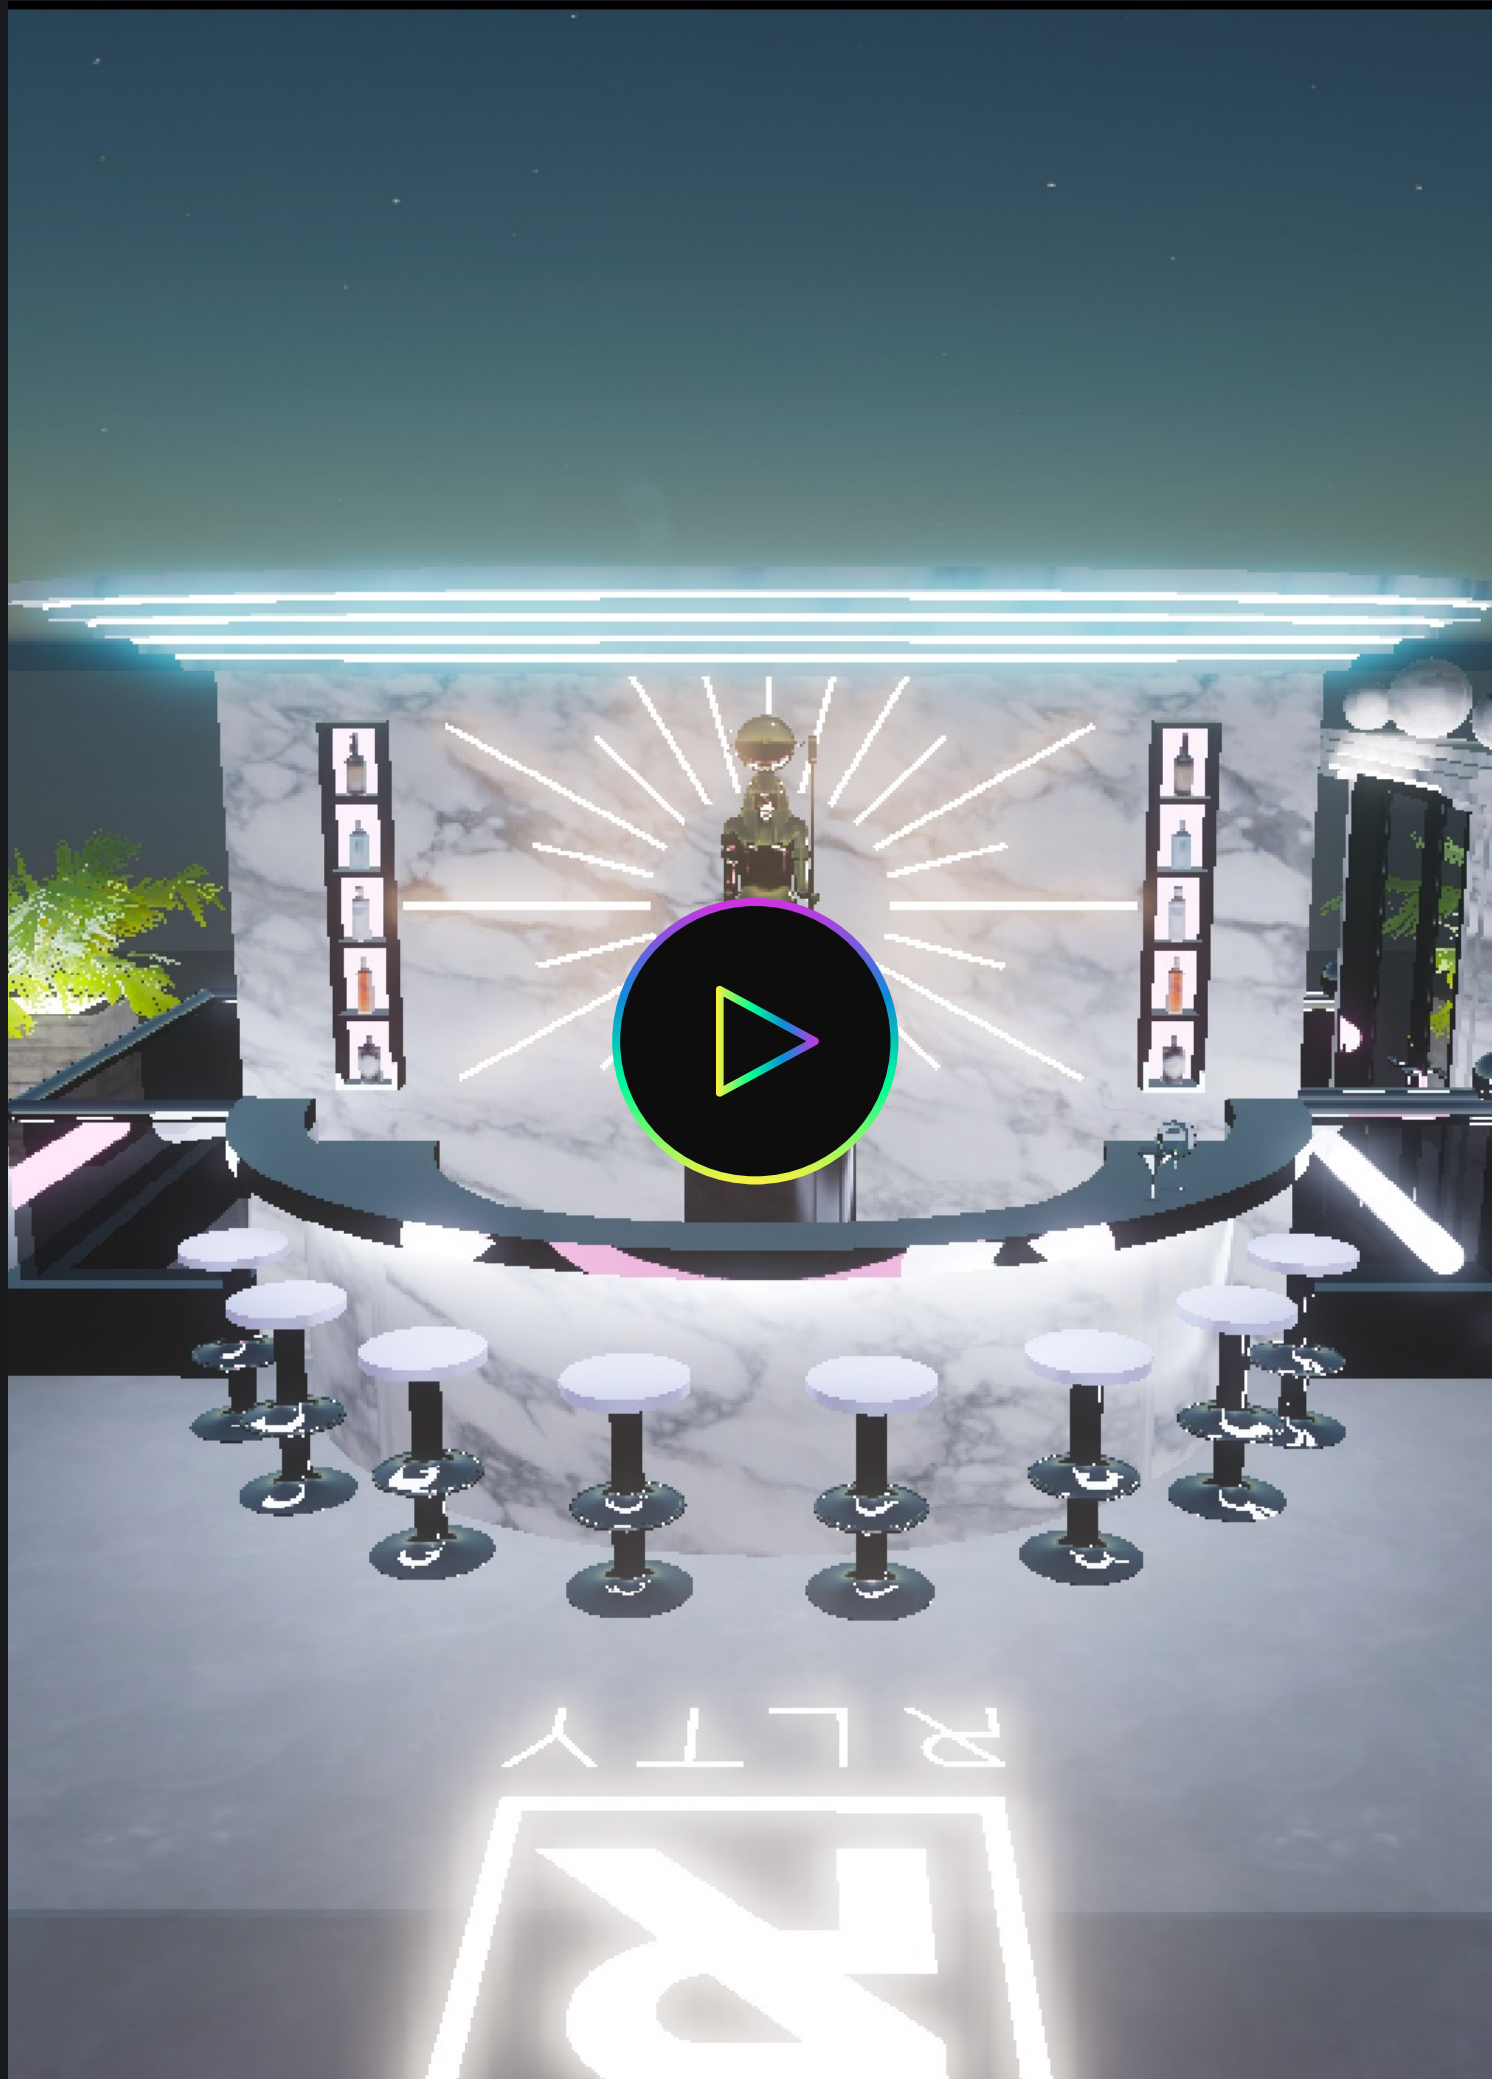

Willing to build a custom experience ? Developers can create on-demand features on top of our platform

RLTY proprietary environment

Each metaverse offers a wide set of functionalities, a huge community to address and a strong brand exposure. Still, in order to further improve the user experience in a metaverse event, we've built a fully dedicated environment which offers improved graphics, greater security control, unlimited scalability, additional functionalities and a more eco-friendly approach. This ecosystem is fully integrated with our no-code platform and as easy to use as any other metaverse platform, at no extra cost.
