MODE

THE FUTURE OF WORK.
SECURED.

Businesses are adapting to new communication needs to facilitate productivity and collaboration. By 2024, Gartner estimates that 75% of enterprise meetings will be conducted remotely. But conventional communication apps weren't designed for the changing security needs in the new work environment.

As more information is shared over communication platforms, better security is required to protect the data. And with the emergence of quantum computing, even current end-to-end encrypted communication is at risk.

Mode provides a secure and trusted workspace where teams can communicate confidently with post-quantum data protection for today and tomorrow.

WHAT WE OFFER...

Mode is a secure communication platform with post-quantum end-to-end encryption for messaging, video calling, and file sharing. Collaborate securely, wherever you work.

MESSAGING

Instant messaging to keep teams connected and chats secure.

VIDEO CALLING

Video calling and screen sharing to keep meetings and conversations private.

FILE SHARING

Protect multimedia and documents shared between team members.

ADMIN PORTAL

Manage workspace accounts and configure global security settings.

mode.io

GO **BEYOND** CONVENTIONAL SECURITY …

POST-QUANTUM SECURITY
Secure all communication data against quantum-enabled cyberattacks with post-quantum protocols.

MULTI-LAYERED ENCRYPTION
Modern protection with post-quantum readiness by layering ECC and post-quantum protocols.

DECENTRALIZED PRIVATE KEYS
Private encryption keys are generated and stored on user devices for enhanced data privacy and workspace security.

PERFECT FORWARD SECRECY
Each message, file, and call is encrypted with a unique key to limit the breach of full communication threads.

SECURED DATA AT REST
All communication data stored on device is secured using SQLCipher with AES-CBC plus SHA512.

ENCRYPTED METADATA
Minimize and encrypt most metadata for privacy beyond the conents of your communications.

✓ Contact Verification

✓ Data Retention Control

✓ Redact & Revise Messages

✓ Password Protection

✓ Advanced Brute-Force Security

✓ Autolock After Inactivity

✓ Group Chat Lifespans

✓ Randomize FIlenames

✓ Private Clipboard
