

The local and global network for sharing observations at sea, on the coast and on earth

SeeOnSea's objectives :

- Highlight the local environment
- Improve behaviour through the sharing of knowledge

For maritime and tourism professionals and the general public

Observations at sea, on the coast and on trails:

- fauna
- flora
- natural phenomena
- human footprint
- remarkable sites

Take part in nature protection !

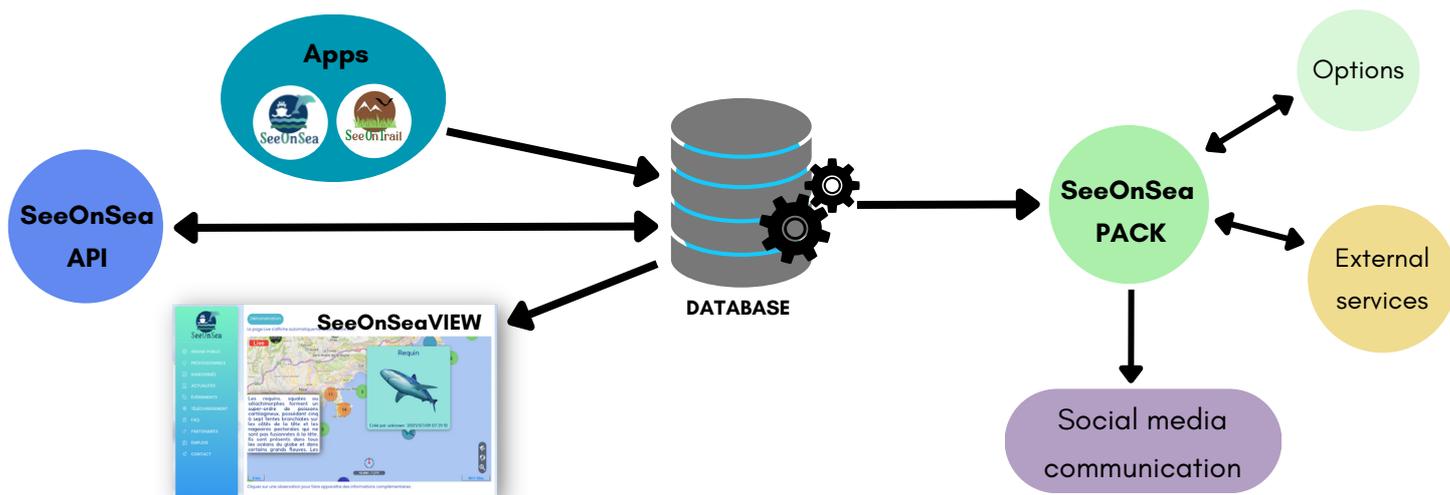

" Better understand your environnement to better protect it "

A lot of information are available, take into account the level of protection of the species and give appropriate advices

...and SeeOnTrail
