Key benefits

No code install

Run your website translation project easily without relying on your developer/IT team.

Multilingual SEO

Boost your international visibility with Weglot's multilingual SEO features.

Machine translation

Accelerate your project with a first layer of machine translation from leading providers like DeepL.

Full editing control

Edit your machine translations, add your own translators & teammates or order pro translation directly inside Weglot.

Automatic workflow

Never waste time on manual tasks. Any new content added to your site is automatically detected and translated.

Visual translation editing

Use the in-context editor to translate your content on a live preview of your website.
