NERUZH

"Neruzh" is a state program that has been implemented since 2018.

The goal of the project is to promote professional repatriation, which will contribute to the economic progress of Armenia and the development of the start-up ecosystem.

During the 5-day event, program participants have the opportunity to learn about the benefits of the Armenian business environment, receive exclusive individual mentorship, present and develop their business idea.

The 4th program will be implemented in summer 2023.

FROM IDEA TO BUSINESS

The program provides funding and other resources to start-up technology companies and research groups to commercialize their ideas and create new value in the economy.

In particular, grant competitions will provide start-up companies with funding at the idea and growth stages to ensure product development and market access.

The goal of the program is to create an entrepreneurial ecosystem in Armenia that plays a key and significant role in the development of the innovation system.

The 2023 program has already been launched.
