

ACCOUNTS RECEIVABLE MANAGEMENT SOFTWARE - RISK & COLLECTION -

How to improve your financial performance while optimizing
your processing times in 2023?

HOOPIZ Credit Management

the ideal connected platform to manage all your risks and your customer collection.

HOOPIZ features allow you to...

Develop your turnover with complete peace of mind

Control the actual payment times of the customer portfolio

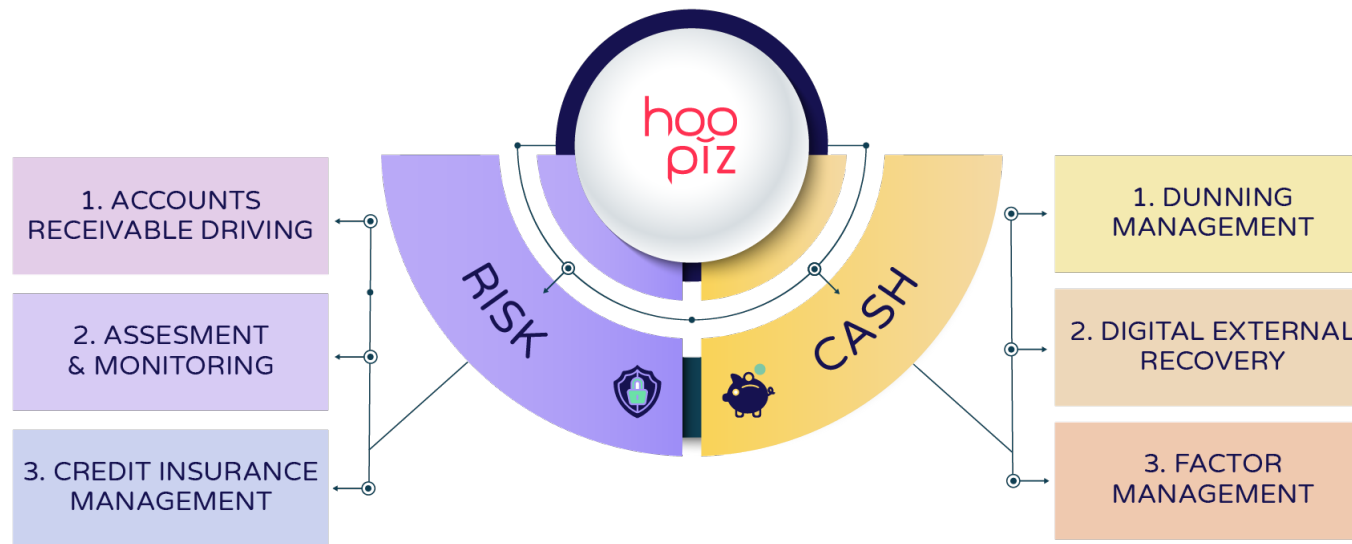

Get all the information you need to make the best credit decisions

Have all the financial services to control your cash flow (financial and solvency information, invoice financing, etc.)

Connect the credit insurance policy: reconciliation outstandings / guarantees, alerts, request for intervention, etc.

HOOPIZ Credit Management

HOOPIZ is collaborative, easy to use and adapts to all business organizations thanks to its optional modules.

RISK

Modules HOOPIZ Credit Management

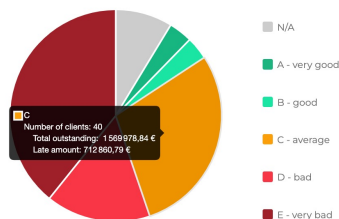

Module Accounts receivable driving

Capitalize on data visualization and intelligent data processing to assess your financial performance and make the right decisions at the right time.

Delays and payment indicators
(over the last 6 months)
Payment period

64
days of which

10
late

Module Assesment & Monitoring

Credit Management Review

Our customers benefit from a regular review with our Credit Manager Hoopiz at no extra charge. This ensures the best use of the platform and the implementation of best practices in line with the company's objectives.

Credit Management Expertise

HOOPIZ is the result of 30 years of experience in Credit Management by its co-founder Christophe Goffinon.

This "strong and recognized" business expertise has enabled the creation of a quality SaaS platform, useful where needed when needed, to make life easier for teams while having a concrete effect on financial performance.

In addition to the digital tool, HOOPIZ also offers its customers: **Advice, Diagnosis, Training and Outsourcing** collect, on demand and tailor-made.
