

Gaia-X French Hub

Vivatech 2023

Gaia-X Abstract

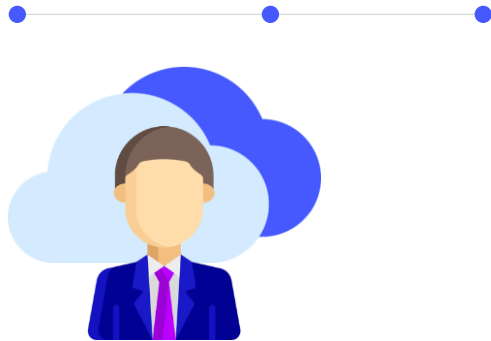

Established in **2021** as a **private not-for-profit** Association, Gaia-X brings a community around the common goal to **boost European data economy** by enabling the creation of **common data spaces**, in alignment with the **EU's data strategy**, and building a **standard for transparent, controllable and interoperable data infrastructures** for trustworthy data exchange.

Open to anyone but aligned to the European values of human-centricity, transparency, openness and sovereignty, Gaia-X's ambition is to deliver unprecedented opportunities for innovative data-driven business models **reducing the dependency from non-controllable technologies**

Do we master technology?

Concentrated Proprietary Opaque

Users **LET** control

Data

Not exploited, fragmented (everyone keeps their own data), no secure exchange mechanism.

Infrastructures

Separate, non-reversible, non-interoperable, closed architectures, private standards

Gaia-X – Taking back control of technology

Data Spaces

Facilitate cross-sector data spaces with interoperable, portable services.

Data Exchange

Verifiable contractual rules for data access and use.

Gaia-X Compliance

Definition of decentralized services to enable objective, measurable trust.

Label framework

Gaia-X Labels to facilitate market adoption through autonomy and self-determination.

Distributed Open Transparent

Users **KEEP** control

The Gaia-X universe - how to join Gaia-X ?

Gaia-X AISBL

The AISBL Gaia-X is an International Non-Profit Association (abbreviated to AISBL) and acts as the main entity of Gaia-X

Community Gaia-X

The Gaia-X community works together on a common platform in defined working groups. Here, members and non-members work side by side, both from a user and a supplier perspective.

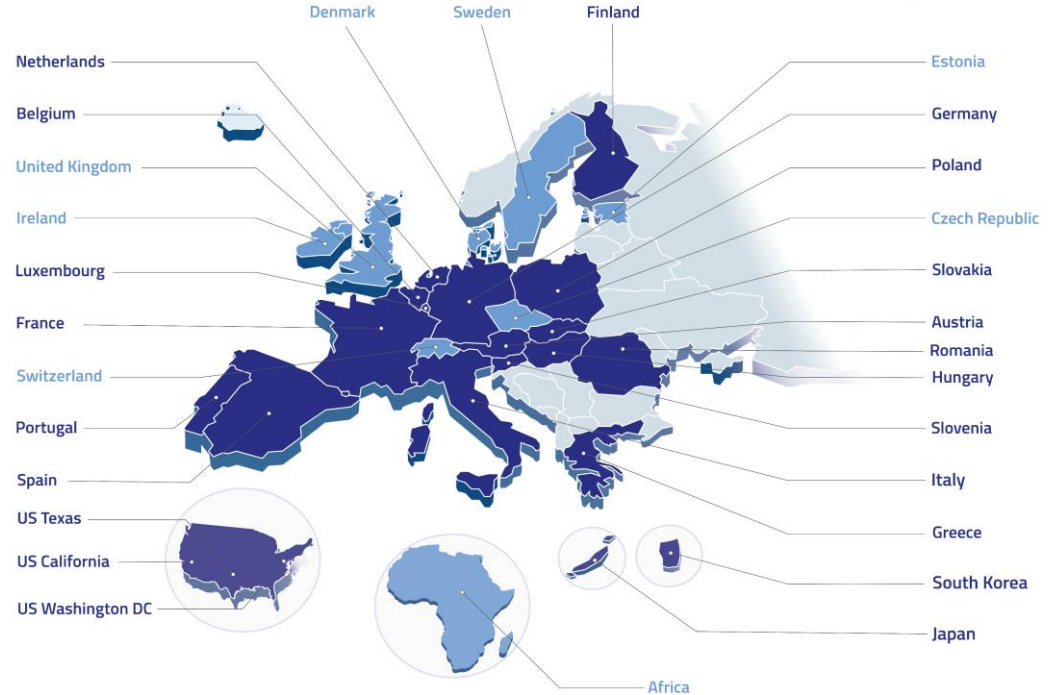

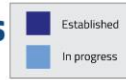

Gaia-X Hubs

The Gaia-X Hubs are the voice of the user ecosystems at national level. Their main objectives are to **develop the ecosystems**, to **bring together national initiatives** and to provide a central point of contact for interested parties in their respective countries. All Gaia-X Hubs are in close contact with each other to **ensure international alignment** of their activities and requirements definition.

Gaia-X Hub Network Expansion

Encompassed by International Hubs
16 EU, 5 Global

Main objective of the Gaia-X Hubs:
**Accelerate European data spaces with a
significant impact on the national and European
economy**

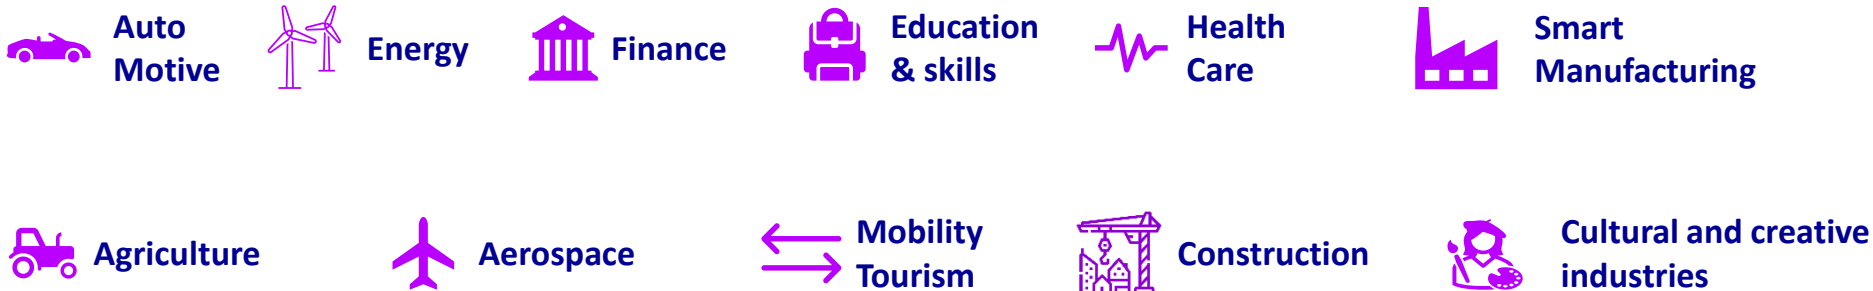

————— **Focus on the French Gaia-X hub**
