Nebula Biocides

THE INVISIBLE THREAT

- Up to 30 % of surfaces are contaminated with bacterial spores in healthcare settings
- Bacterial spores are transmitted via surfaces, where they can survive for months
- These pathogens are resistant to alcohol and steam disinfection

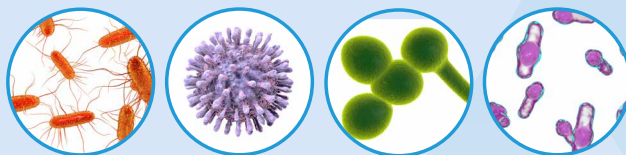

Infections with sporeforming bacteria are associated with high morbidity, mortality and rising healthcare costs.

THE SOLUTION

Disinfectants based on the novel active agent peroxinitrous acid (ONOOH)

bactericidal virucidal fungicidal sporicidal

Strongest Sporosan® technology kills all pathogens – no exceptions

Fastest Disinfects in less than 1 min, even at high organic load conditions

Versatile Available as concentrate, tabs or ready-to-use solution

Two components · One active agent · Zero spread

2 Concentrates

3 Tabs

1 Ready-to-Use
