SUCCESS STORIES

Inverse Text Normalization for Automatic Speech Recognition

“ Working with DataForce gave us a scalable way to onboard experts in linguistics in a very tight timeframe, and they delivered excellent results across multiple languages. This project simply would not have been possible without their hard work and determination.

– STUART WOOD
Product Manager, Speechmatics

Synthesizing Voice Through Cloud-Based Innovation

“ The main focus for the research department at iGenius was to create a synthetic and customized voice for our main product, Crystal. Working together with DataForce and MediaNEXT gave us the confidence to create a large data set of phonetically balanced sentences and corresponding high quality audio clips to be able to train a high performance AI model with text-to-speech capabilities.

MARCO BOCCHIO PHD
Machine Learning & Data Science
Team Lead, iGenius
