## Transport & logistics

Kinéis operates its own constellation of 25 nanosatellites.

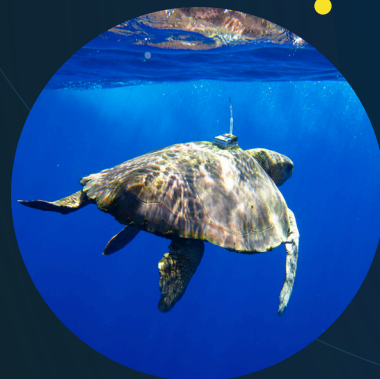

With Kinéis' IoT solutions, businesses can track their assets, monitor their operations, and receive alerts in near real-time. This can improve efficiency and reduce costs in industries such as agriculture, transportation, and logistics.

Currently, Kinéis is already connecting 20,000 devices with the help of 9 active satellites.

## Network & Infrastructure monitoring

## Smart Agriculture

## Environmental monitoring

## Maritime
