

FLEXHORIZON

FLEXIBILITY
AS A SERVICE

Flexhorizon

Our mission is to make possible a decarbonized, collaborative, highly adaptable and resilient energy system.

Modulate energy usage of distributed power assets during high demand or grid stress with our modular platform:

Digital twins of physical energy assets

Demand Response and Balancing services interface

Real time micro-grid management tools

Control, monitoring and analysis of consumption data

Bespoke optimization tools for large scale flexibility portfolios

Customize Equipment Management And Receive **Green Cashback Incentive:**

Specify the functioning, usage or comfort constraints of your equipment

Specify the frequency of the adjustments that we are allowed to make

Stay in full control of your equipment at all times

Receive a payment from us, the "green cashback"

Payment is given in both euros and carbon reduction
