SPACE CAMP

"SpaceCamp" is a space-themed camp that gives young people opportunities to deepen their knowledge in the field of rocketry, astronomy and space technology. The goal of this educational program is to contribute to the development of the scientific potential of the State on the way of having a knowledge-based industry and economy.

The camp is designed for 15-18-year-old youths from Armenia, Artsakh and the Armenian diaspora who are interested in astronautics and space research.

edutainment

The program "University-Private Sector Cooperation for Training of Specialists" was launched in 2020, with the aim to jointly develop and implement new and successful educational/training programs with universities and technology companies in the Republic of Armenia.

In 2020-2022, more than 9,000 participants received technological education through the program.

According to the 2023 program, it is planned to train about 1,750 specialists in Yerevan and in the regions of the Republic of Armenia, as well as to provide the same specialists with employment opportunities in information technology organizations.
