

France conference

Quantum

Press Invitation

Paris, June 10, 2025

The France Quantum Conference returns to Paris for its 4th edition, highlighting the international rise of quantum technologies.

The **4th edition** of the France Quantum Conference, **co-founded by OVHcloud**, will take place on **June 10, 2025**, at **Station F**, the world's largest startup incubator, located in Paris. This must-attend event will bring together over **1,000 attendees** and **60 quantum experts** for a full day of **talks** and **networking**. It's the perfect opportunity to discover the latest technological advances, explore real-world use cases, and strengthen collaborations within the ecosystem.

2025 Theme: "2025: The International Year of Quantum Science and Technology: How to join the race?"

A preview of our lineup:

David De Almeida
Head of Science and
Research in SNCF's
Technology, Innovation and
Group Projects Division
Groupe SNCF

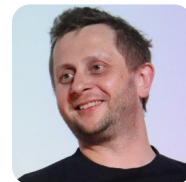

Laurent Darmon
Head of Innovation and
New Activities
Crédit Agricole S.A.

Thomas Ehmer
Innovation with Quantum
Merck Group

Jérémie Guillaud
VP Firmware
Alice & Bob

Octave Klab
Founder & Chairman
OVHcloud

They're talking about it:

"We need to build a strong quantum ecosystem in France and Europe, while encouraging key players to scale up their investments. The stakes are strategic, we must act now."

Damien Gromier, Founder & President - France Quantum

"For several years, Crédit Agricole has been investing in quantum to anticipate major transformations in the finance sector. France Quantum is a key event to shape a future where these technologies are game-changers."

Laurent Darmon, Head of Innovation and New Activities - Crédit Agricole S.A.

"We are building a true sovereign ecosystem with our startups, corporate clients, and partners to create business opportunities. The message is clear: if you wait until everything is ready, it will already be too late. The market will have already shifted, and your competitors will have taken action."

Octave Klab, Founder & Chairman - OVHcloud

About France Quantum Conference:

France Quantum Conference brings together French quantum stakeholders to:

- Highlight public-private collaborations and the best use cases across various sectors.
- Strengthen the visibility of the French and European quantum ecosystem internationally.
- Accelerate the adoption of quantum technologies by businesses.

Who are the stakeholders in the ecosystem that enable the development of use cases?

- Industry players
- Startups
- Researchers
- Public actors
- Investors

About OVHcloud :

OVHcloud is a global player and the European leader in Cloud, operating over **450,000 servers** across **43 data centers** on **4 continents**, serving **1.6 million clients** in more than **140 countries**. A leader in trusted Cloud solutions and a pioneer in sustainable Cloud with the best performance-price ratio, the Group has relied for over 20 years on an integrated model that gives it full control over its value chain: from the design of its servers to the construction and management of its data centers, as well as the orchestration of its optical fiber network.

This unique approach allows OVHcloud to independently cover all of its clients' needs, providing them with the benefits of an environmentally conscious model with frugal resource use and a carbon footprint that achieves the best industry ratios. Today, OVHcloud offers state-of-the-art solutions that combine performance, price predictability, and complete data sovereignty, supporting their growth with total freedom.

Practical Information:

Date: June 10, 2025

Location: Station F, 5 Parvis Alan Turing, 75013 Paris

Access: Metro line 6 (Chevaleret), RER C (Bibliothèque François Mitterrand), buses 62 and 89
