

i-max

One small change that changes everything

Style, intelligence and robustness
come together in this new electronic lock

ASSA ABLOY

Experience a safer
and more open world

Modern security, outside and in

Robust, innovative and elegant: the new electronic lock is a completely updated and upgraded access control device. With a more sophisticated design, multiple finishes and an extra-resistant locking

mechanism, *i-max* is perfect for environments where intelligence, design and functionality must stand out.

Locks are available with an optional integrated keypad for multi-factor authentication and convenience. Open with a PIN, your RFID credential, a combination of RFID + PIN for an extra layer of security, or a smartphone with the Openow app.

Wire-free and battery powered (from 90,000 to 126,000 cycles between battery changes, depending on RFID technology and system).

The control unit, batteries and locking mechanism are all securely integrated on the inside.

Locks have been certified according to EN1906 Category of use: Grade 4.

4
GRADE

RFID reader with LED (green/red/blue) or RFID reader with capacitive keypad and backlit LED for different warning signals.

Tailored to every type of exterior and interior door or access point (wooden doors, aluminium profile doors). Also offering custom solutions for glass doors and emergency exit doors.

Lift and lock 60°

Compatible with Euro, ANSI, DIN, tubular, multipoint, aluminium, glass, sliding, narrow profile mortise locks and emergency exit doors.

Modern, elegant design with multiple handle types and finishes to complement any building style. It also includes antibacterial coating.

Your environment, your lock

Designed to meet your access control needs at high traffic doors

Premises with high traffic volumes always need smarter, more resistant locking devices. Wire-free and battery powered, the new *i-max* electronic lock is ideal for such environments: hotels, touristic apartment buildings, unattended receptions and campings.

This electronic lock works with every management option, from Standalone to Wireless Online and Check-In by PIN. The new *i-max* makes hotels, touristic apartments and many other facilities safer and more efficient — reducing wasted time and expense while making premises more secure and convenient for owners, visitors and daily users.

Practical and convenient

- Certification EN1906 Category of use:
Grade 4 guarantees robustness against misuse
- The new electronic lock is designed to secure intelligent environments, with high traffic of people and a high number of accesses and events
- Facility managers can make real-time decisions and react instantly to an event
- The new lock has been designed to be installed in a comfortable and fast way in environments that can not stop their daily activity
- The Check-In by PIN solution allows guests to access their room with no need for reception staff, making it the perfect solution for small hotels or tourist flats that cannot have a 24-hour reception

Openow™ Compatible with all forms of intelligence

Welcome to the future of access control. Our electronic lock also offers a new way to open your doors — using the Openow™ BLE mobile app. Site users no longer carry separate credentials, just their smartphone. Security and facility managers boost their efficiency, sending, cancelling and modifying virtual keys whenever they choose.

The ASSA ABLOY Group is the global leader in access solutions. Every day, we help billions of people experience a more open world.

ASSA ABLOY Opening Solutions leads the development within door openings and products for access solutions in homes, businesses and institutions. Our offering includes doors, door and window hardware, locks, access control and service.

TESA ASSA ABLOY

The global leader in the development, supply and service of electronic access control systems for the hospitality market, including hotels, tourist apartments and more. With 35 years of experience in the hotel market, we offer a single comprehensive platform which exceeds the highest demands in security, design, ease of use and service for our clients.
