

**A single point
of contact for
your building
digitalization
needs.**

MY
DIGITAL
BUILDINGS 

A comprehensive, standardized solution

01 International reach.

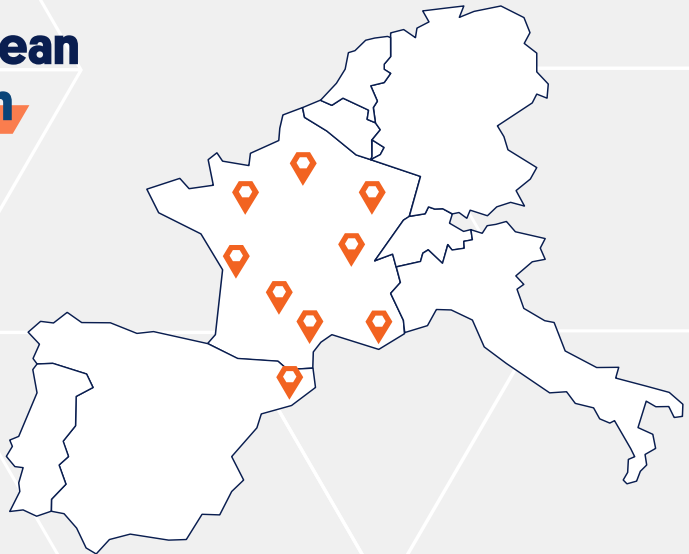

02 Fast and efficient processes for capturing and digitizing your spaces.

03 Standardized spatial data.¹

04 A unified platform: Centralize and leverage your spatial data seamlessly.

Our European expansion

¹ Deliverables include point clouds, 2D plans, 3D models/BIM, and virtual tours.

- **One survey, multiple deliverables** (point clouds, 2D plans, 3D models, BIM, and virtual tours).
- Achieve reliable deliverables through point cloud-based processes such as « **scan to BIM** » and « **scan to plan** ».
- **Benefit from project oversight by a multidisciplinary team** with expertise in 3D surveys, BIM management, and building and industrial engineering.

Our consulting services

We analyze **your objectives and data usage needs** to deliver a clear roadmap for your digitalization projects:

- **Audit and integration** : Evaluate your processes and incorporate spatial data seamlessly into your workflows.
- **Technical studies and complementary services** : Support your deliverables with clash detection, data extraction, and analysis services.
- **BIM support** (audit; strategy & roadmap; BIM documentation preparation).

A unified platform to centralize and leverage your spatial data

- **Visualize** your digitized assets and associated spatial data, and gain a comprehensive view of your digital portfolio and its spatial information.
- **Manage** spatial data easily, and control your building data, including its storage and access.
- **Collaborate** seamlessly through a web interface. Navigate, measure, and explore your environment in the representation mode that suits your needs—whether in 2D, 3D, or virtual tour.
- **Share information** : your buildings, spaces, views, and contextual information with project entities.
