

EXPERTISE

Since 2017 I have been developing expertise on Cryptocurrencies including the financial technologies around them. I finished my masters degree with the Dutch National Police on the topic of cryptocurrency and the international struggles it creates. I have been working for the FIOD since January 2023. Specifically, I work for the Financial Advanced Cyber Team of the FIOD. A specialized high tech unit that focuses on high impact and advanced cases. As such, my task is to support the team in all matters related to cyber.

Relevant Experience

Together with the Dutch National Police I have developed protocols and strategies on how to combat crypto related crime locally and i.a. what relevant information we need from a report by a victim of a crypto related crime.

I have been giving workshops, guest lectures, demonstrations and presentations for almost 3 years now on financial cyber. Relevant examples include .e.g. the ONE Conference, several workshops for the police, the prosecution and the ministry.

Once every two years I, together with a select amount of colleagues, create and publish (internally) a crime report for financial cyber. This determines the landscape and our future strategy. I am responsible for our 2 year strategy on the topic of financial cyber.

WORK

CYBERCRIME ADVISOR | FINANCIAL INTELLIGENCE AND INVESTIGATION SERVICE (FIOD - NETHERLANDS)

I work as a cybercrime advisor for the FIOD. On this topic I advise teams on matters related to cyber including .e.g. policy, tools, capabilities etc. I do this largely for the Financial Advanced Cyber Team of the FIOD.

EDUCATION

BACHELOR INTERNATIONAL RELATIONS AND MASTER INTERNATIONAL SECURITY
