

## Exchanging Lessons from the Energy Crisis in Accelerating Efficiency

Energy Efficiency Hub Special Event at the IEA's 8th Annual Global Conference on Energy Efficiency

**Location :** Versailles Palais des Congrès, 10 Rue de la Chancellerie and livestream

**Date :** 6 June, 2023, 12 :00 – 13 :30 CET

**Description:** What have governments learned from their efforts to rapidly scale up energy efficiency measures since early 2022? The Energy Efficiency Hub regularly brings officials and experts from Members together to share their experience. This session will bring a global perspective to policy approaches that have proven effective and challenges that remain.

### Agenda

2 min	<b>Introduction from moderator</b> Kris McCoy, Counsellor (Industry, Science and Resources), Australian Embassy Paris & Permanent Delegation to the OECD
5 min	<b>Keynote address</b> Clare McLaughlin, Energy Division Head, Department of Climate Change, Energy, the Environment and Water, Australia
5 min	<b>Scene-setting presentation</b> Brian Motherway, Head of Energy Efficiency, International Energy Agency
30 min	<b>Lightning Round Presentations (3-5 minutes)</b> <i>Describe your experience with one of the most important measures you have taken in the past year or two to accelerate deployment of energy efficiency. What worked and what did not?</i> <ul style="list-style-type: none"> <li>• Ben Copp, Natural Resources Canada</li> <li>• Tudor Constantinescu, European Commission, Directorate-General</li> <li>• Paul Bonnetblanc, Ministry of Ecological Transition and Territorial Cohesion, France</li> <li>• Abhay Bakre, Bureau of Energy Efficiency, India (TBC)</li> </ul>
30 min	<b>Moderated discussion</b> <ul style="list-style-type: none"> <li>• <i>What is one key challenge in energy efficiency you need to tackle now, and what approach are you considering?</i></li> <li>• <i>What have the other panelists touched on that you would like to know more about?</i></li> </ul>
5 min	<b>Closing remarks</b> Clare McLaughlin, Energy Division Head, Department of Climate Change, Energy, the Environment and Water, Australia
