Just refill

Hi, we're Dopper.

We envision a planet with clean water for all, where plastic pollution is a thing of the past. Put simply, we want to end packaged water by getting people to drink tap water.

That's why we created the Dopper Bottle, and why we invented the Dopper Water Tap. To make drinking from the tap easy, engaging, and memorable.

dopper.

# Drink from the tap

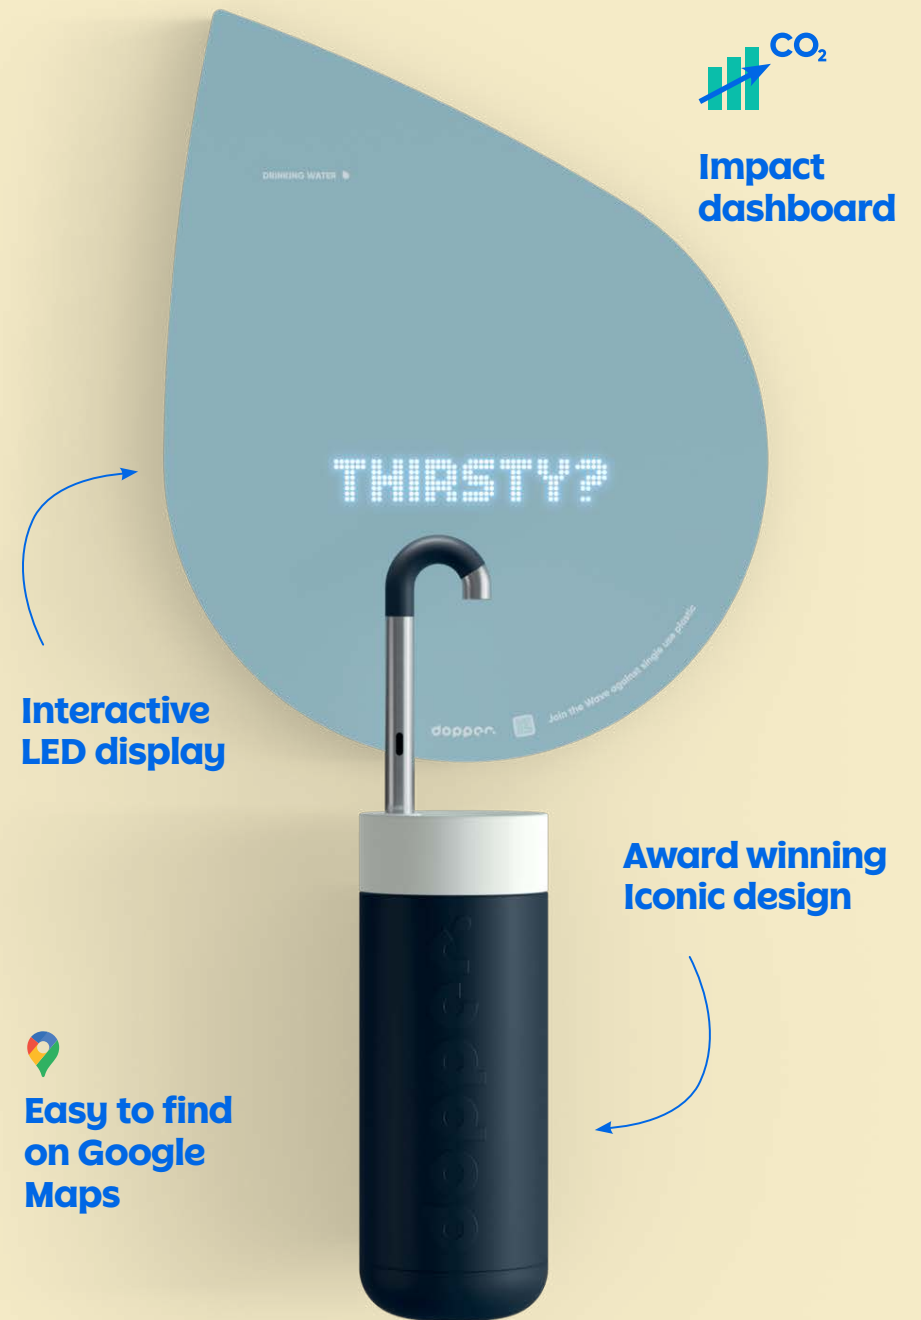

Together, we'll put an end to packaged water

Millions of single-use plastic water bottles are sold on a daily basis. If this behaviour continues, it's estimated that 27 million metric tonnes of plastic waste will end up in our world's waters every year, by 2040.

Clearly, something has to change.

By installing a Dopper Water Tap, you can be part of that change, and help make tapping the new normal.

**Designed and  
manufactured  
in the  
Netherlands.**

# A tap that talks (and celebrates)

The Dopper Water Tap offers a unique experience. Its droplet-shaped interface, loaded with over 200 customised positive messages, will interact with your employees or customers and motivate them to refill, rather than buy single-use plastic water bottles. They'll be drawn in, entertained, encouraged, and celebrated each time they refill, nudging them to return to your tap again and again.

# A tap that measures

Your impact counts. Your Dopper Water Tap is connected to your personalised impact dashboard via 4G, providing safe and secure connectivity. The dashboard is only accessible to the owner of the tap.

Your dashboard will show:

- The amount of water tapped in litres,
- The amount of plastic waste reduced in kilograms,
- The number of single-use plastic bottles reduced,
- The amount of CO2 reduced.

You can see your overall impact, or your impact per tap, and gain valuable insights that can be shared with your team and network.

# A tap that stands out

We want to make refilling more attractive and engaging. That's why we created an iconic design that stands out and inspires curiosity.

Available in 8 unique colours that draw inspiration from our iconic reusable bottles, the Dopper Water Tap is bright and engaging with an interactive Droplet interface that displays over 200 positive messages.

The Dopper Water Tap draws inspiration from our iconic reusable bottle collections, earning the 2023 IF Design Award, and Red Dot Design Award.

# Customise your Dopper Water Tap

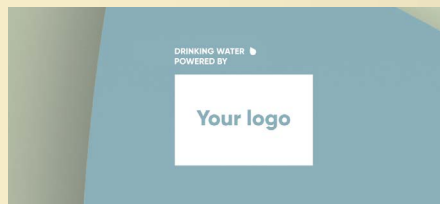

Looking to make your Dopper Water Tap stand out? We've got you covered. Customise your tap and make it clear that your organisation is actively working to create positive impact in the world.

The Dopper Water Tap is available in the following colours:

	RAL 5011	Deep Blue
	RAL 5014	Stingray Grey
	RAL 4006	Magenta Anemone
	RAL 0 50 50 40	Mud Crab
	RAL 5021	Cool Tortoise
	RAL 1018	Yellow Tang
	RAL 6025	Kelp Green
	RAL 1015	Sandy Eel

Want a custom colour? For orders of 10 taps or more we can make it happen.

The Droplet interface can be customised with your brand or company logo, further displaying your commitment to fighting plastic waste.

# Your Tap on Google Maps

Put your tap (and company) on the map by letting us add your Dopper Water Tap to Google maps, like we've done with all public water taps in the Netherlands. With thousands of searches every day for nearby water taps, your business will be highlighted to countless people in the area.

# A tap that we maintain for you

Every year, we will conduct a health check on your Dopper Water Tap, ensuring that it is functioning properly and delivering safe and clean drinking water for your employees, customers, and/or residents.

Dopper handles the maintenance of your tap with the service packages.

Moreover, regular maintenance and timely repairs can help extend the life of your Dopper Water Tap, reducing the need for premature replacements or unexpected repairs.

# Technical Specs

The Dopper Water Tap is designed and manufactured in the Netherlands, to last for at least 10 years, with the following specifications:

## Dimensions & Weight

- Height when installed: 215 cm
- Droplet width: 80 cm
- Depth: 31 cm
- Weight: 17.5 kg

## Interactive Droplet

- Dot matrix display with 1024 energy efficient LEDs.
- Secure data transfer to the online dashboard via 4G.
- Energy efficient, using only 25W.

## Materials & Finish

- Powder coated design.
- Stainless detailing.

## Functionality

- Hands-free operation by an infrared sensor.
- Unique drip tray to avoid overflowing
- Fills 1 litre bottles within 30 seconds.
- Automatic flushing every 48 hours for optimal hygiene.
- Automatic shutoff to avoid water spillage.
- Optional inclusion of a water filter.

# Installation Requirements

Installing\* your new Dopper Water Tap is as easy as using it, provided the location you choose meets the following four requirements.

- Water access through a 1/2" Angle Valve.
- Water drain of 40 mm.
- Wall capable of safely bearing a wall mounted Water Tap and the Droplet (17.5 kg).
- Electricity access by a double built-in wall socket.

\* All Dopper Water Taps are installed by our dedicated service partner.

A hand with several beaded bracelets is holding a white and orange bottle under a blue and silver water tap. The tap is mounted on a white base. In the background, a blue curved wall features the word 'CHEERS!' in large, pixelated white letters. Below the tap, the Dopper logo and the text 'Join the Wave' are visible.

CHEERS!

# Just refill, and make your impact count.

Are you ready to join the fight against packaged water? Great!

Order your Dopper Water Tap and let's change the way people drink water. Together we can turn tapping into the new normal.

Send us an email and we will get back to you within a few working days!

Want to go one step further? Order your own [branded Dopper Bottles](#) to ensure that everyone in your organisation can just refill, and drink from the tap.
