

## Who we are ?

For 20 years we have been using recycled cardboard to make educational materials: pre-cut models provided with intuitive instructions and glue ! Our models are sold in schools, from Year 1 to Year 6, where each student builds their model independently. The educational value of our models greatly explains their success!

## What we bring to the table :

- 1 A pack of 26 cardboard models to build.** There are 40 different models you can choose from to do a group activity. Glue and instructions are provided. These packs are sold under the brand "Kit et Colle".

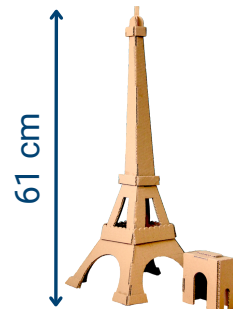

from 82 to 110€

- 2 Models packaged individually.** There are ten different models (different from the ones above) and they are intended for the general public. The product contains glue, instructions and accessories if needed. These products are under the brand "Mazette, quelle maquette!". (Corporate gifts, gift shops...).

Example :  
Giant Eiffel Tour

- 3 Custom models, buildings, vehicles, boats, castles...**  
You have the possibility to create your model in collaboration with us !  
For example, the barge, pictured below, was designed with the Val de Loire Region. (on quote)
