WITH WORLD VISION

Focus on Cultural Museum Development

Tianjin Hengda Wenbo Science& Technology Co., Ltd. is located in Tianjin Binhai High-tech Industrial Development Area, with a registered capital of 50 million yuan. We are a national level high-tech company specialized in R&D, manufacturing and marketing audio and video tourism device which strives to provide the most advanced services and technologies including: smart management system, museum and tourist attraction digitization projects designing, portable audio guide and multimedia guide device etc. With our branch company in Beijing and two offices in Guangzhou and Shanghai, we are experts in helping our clients build the integration intelligent system.

For over a decade, we have been focusing on the research of the museums, and tourist attraction. Our technology has always been the leader in the industry. The distinguishing feature of our products, such as scalable and custom-made, meet the needs of our clients. We have provided tour guide device, integration system and smart museum system resolution to more than 3000 clients. Our professionalized products are not only applied to museums and exhibition halls but also used for national level reception. We firstly proposed the smart museum system all over the country and so far our smart system has made tremendous contributions to dozens of museums.

20 YEARS' EFFORT

ONLY FOR QUALITY

Technology The very first audio guide device of China was manufactured by Hengda. For over a decade, Hengda has been the frontier in the information and technology field combining the world's most cutting-edge technology with the industry development. From terminals to integration system and smart museum system platform building, Hengda provides a complete solution and professional integrated service.

Market With the experience in this field for more than ten years, Hengda is extremely familiar with the market. We have won a high level of trust from our clients and have built a solid customer system, because we are customer-centered and always focus on our customer's needs.

Team Our company is composed of a group of over 400 well trained, vigorous talents with great creativity who graduated from top ranking universities across China. 95% of our staff have a bachelor degree or higher education background and over 30% of our R&D staff have a intermediate professional title or above. We are a stabilized team with high qualified staff which ensured the innovation of our technology as well as the reliability of our products and service.

Service We promise a 24x7 service for our customers which includes: pre-sales consulting service, customized design service, on-site service, after-sales service, product cycles service and system upgrade service, etc.

Quality Hengda Wenbo Company has put the advanced management concept and system of the industry and the first-class quality standard and method applied to every link of the research, development, production and testing. Our products comply with the rules of ISO9001 and China Compulsory Certification. The outstanding corporate image and the excellent quality and ability have always won the clients' best compliments for us.

SERVICE EXPERIENCE FOR MORE THAN 4000 CLIENTS

Our company has a vast product line covering museums, planning museums, natural museums, science museums, art museums, history museums, memorial halls, archives, exhibition centers, scenic areas, historic sites, cemeteries, large conferences, national level or government level reception missions and foreign affairs etc.

- Once-click update

AUDIO WAND

simple visit experience

WAND

AUDIO

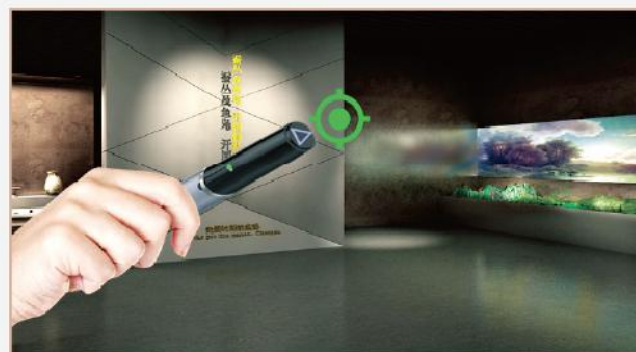

NFC touch trigger

NFC triggering works well in high density exhibition environment with just a touch experience, no signal interference during the visit, precise triggering within your control, shows the explanation "listen where you can touch"

IR trigger

The "Unreachable" exhibits are no longer embarrassing. Through infrared high-directional interactive recognition, shows the details of the exhibits "listen where you can point"

Bluetooth positioning, self-help explanation

Allow you to concentrate on your visit and listen to the commentary with hands free experience, automatic triggering with accurate position tracking. Walk into the exhibition hall, get an overview of the exhibition and a brief introduction to the theme, "listen where you can go"

Guide returns to minimalism brings visitor wonderful experience

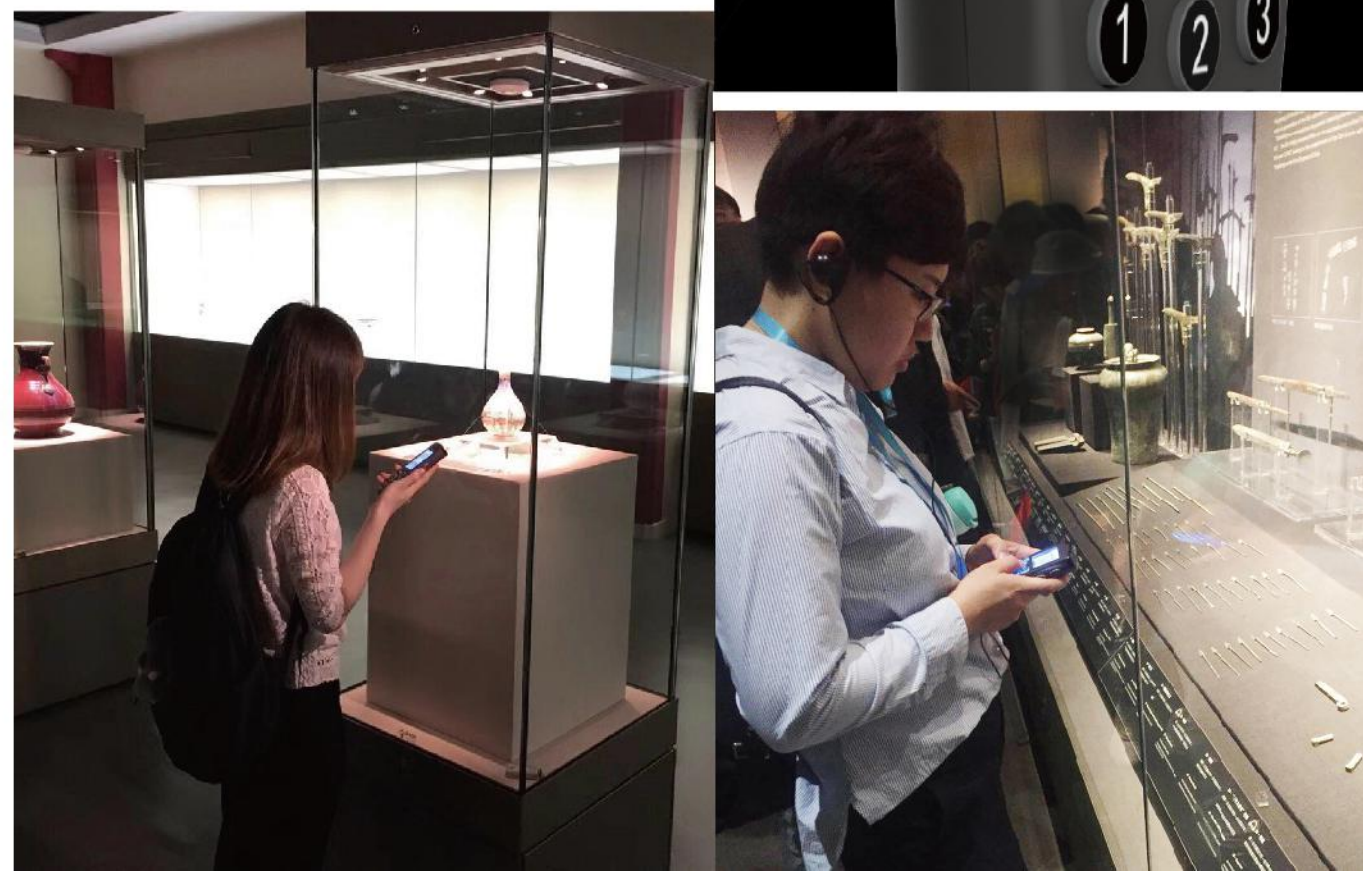

listen where you can go/listen where you can point/listen where you can touch
