

The story for a product may be invented 'out of whole cloth',
but some products are simply born out of a genuine story...

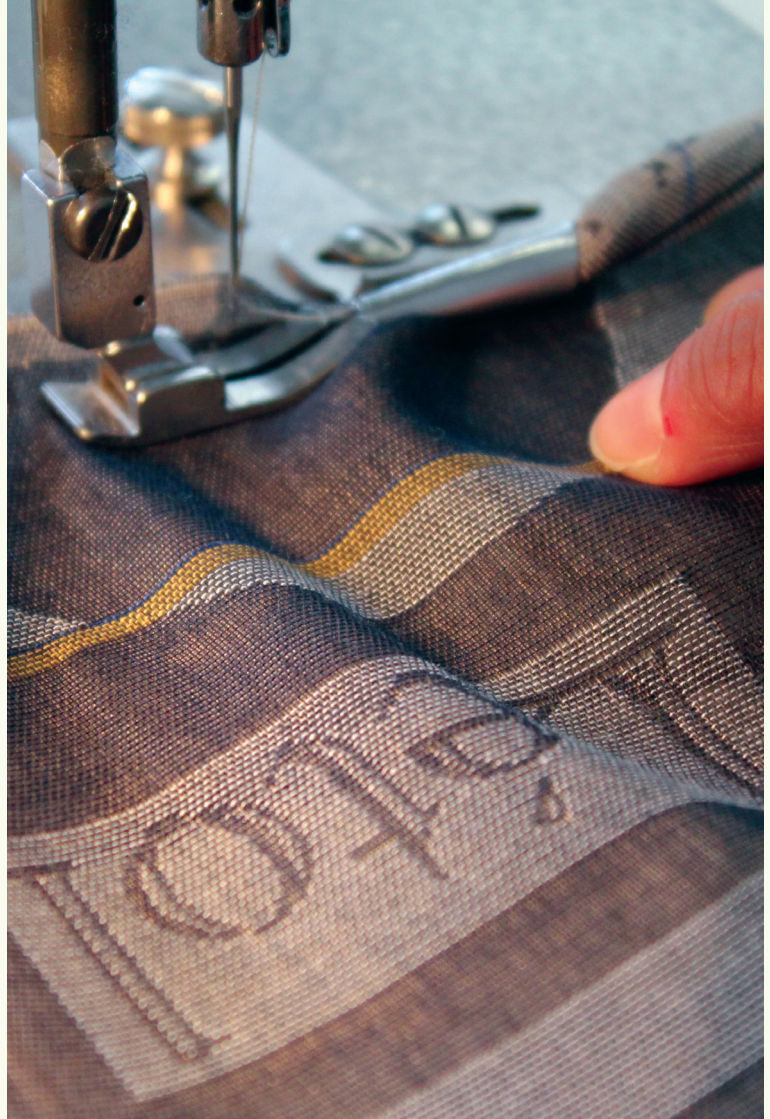

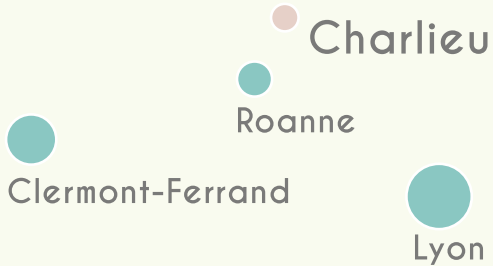

Once upon a time **Létol**...

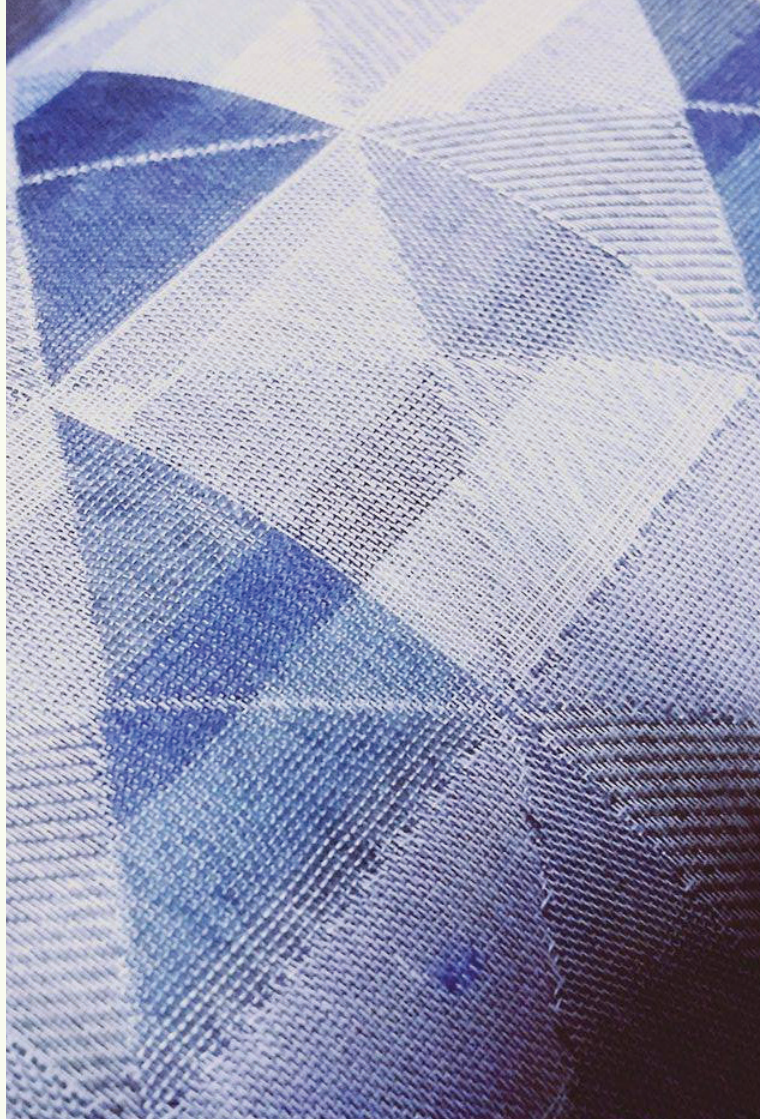

It is necessary to preserve our heritage, to highlight it and to give it a new breath of life...

It is in Charlieu, a small town in the north of the Loire county and a weaving land for centuries, that the *Létol* stoles are designed, weaved and manufactured.

Jacquard Weaving

Thanks to the jacquard weaving know-how, *Létol* has created an organic cotton fabric that ensures comfort and heat all year long.

Patterns and colors come to life with the refinement of interwoven warp and weft, that ensures the *Létol* stoles to be wash and time-resistant...

Jacquard Weaving

Létol, 100% eco-fashion accessory.

The organic cotton thread is Ecocert certified and is dyed 10 miles from Charlieu in a specialized factory that follows the GOTS (Global Organic Textile Standards).

The *Létol* stoles guarantee total innocuousness to our health and the one from the Earth.

It is possible to create, manufacture
and consume some other way...

Létol, an eco-fashion brand.

Remettre l'**homme**
au cœur de l'économie

Eco-friendly

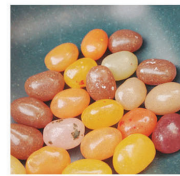

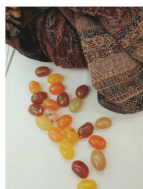

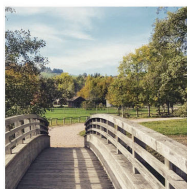

Létol is an easy-care product that can adapt to all situations of all generations men and women.

Curling up into your Létol stole means taking the gentle risk of becoming attached to it to, and even to be addicted to it...
