**Palomar is a design company founded in Florence, Italy in 2001.**

The products we design and manufacture — a collection of nomadic objects — are radically innovative for the new meanings they aspire to bring to our everyday life and experience.

Through a research that can be described as “post-digital”, **every project designed by Palomar represents a sort of countermelody to the overwhelming digital technology mainstream**; a way of saying that new physical and analogic objects can coexist with the digital technology and its presumed imperatives, enriching our experience with a more human, more ironic and more attractive dimension.

**THANK YOU!**
