

WHO WE ARE

ORIGINS

The inspiration behind e-Fusion stems from the personal experience of our CEO, Ernest BOADI, when he purchased his electric vehicle. The challenges encountered while looking for charging stations on the roads gave birth to e-Fusion.

VALUES

e-Fusion is the perfect alliance between environment, performance, and human. Our commitment to sustainability, our pursuit of excellence, and our appreciation for individuals are the pillars that define our identity

OBJECTIVES

At e-Fusion, our goal is simple: to facilitate access to charging stations for all electric vehicle users. We strive to make electric charging convenient, efficient, and accessible, thereby contributing to the transition towards more sustainable mobility.
