

DATA DOME

CAPTCHA

The Only User-Friendly, Privacy Compliant, and 100% Secure CAPTCHA

Signals from all endpoints across every mobile app, website, and API protected by DataDome inform our detection engine and CAPTCHA in real time to block advanced bots without hurting your user experience.

Finally, a CAPTCHA built by a security company.

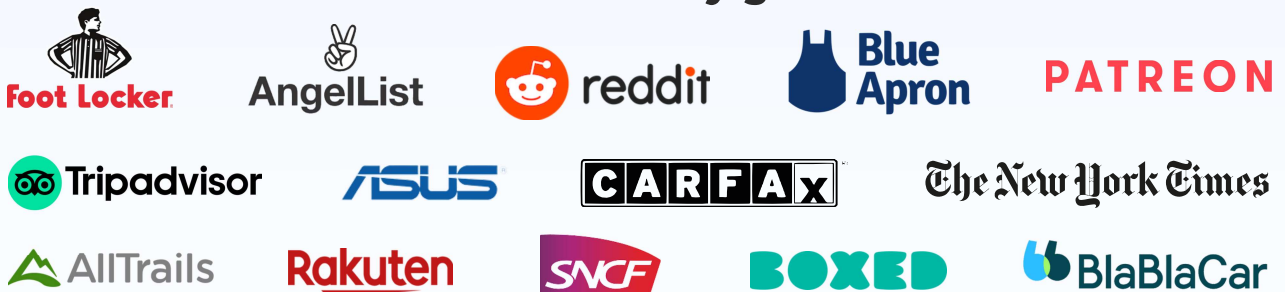

"The new DataDome CAPTCHA is superb. It renders much faster and interactions with it are more responsive than our previous third-party CAPTCHA. Bots can't solve it, and humans can with minimal hassle. It's just what a CAPTCHA should be."

**Matthew Niehues, Product Engineer,
Fidelity Solutions**

DataDome is trusted by global brands:

With customer, analyst, and award recognition:

DataDome's CAPTCHA is built on 3 key pillars:

1

100% Bot-Proof Security

50% of "users" that pass reCAPTCHA and other CAPTCHAs in the market are bots. Our CAPTCHA closes the feedback loop with our detection engine to ensure zero bots slip through. By processing 1 trillion signals per day to flag new and advanced threats in real time, our solution decides within 2 ms whether *or not* to block a request.

2

Data Privacy Compliance

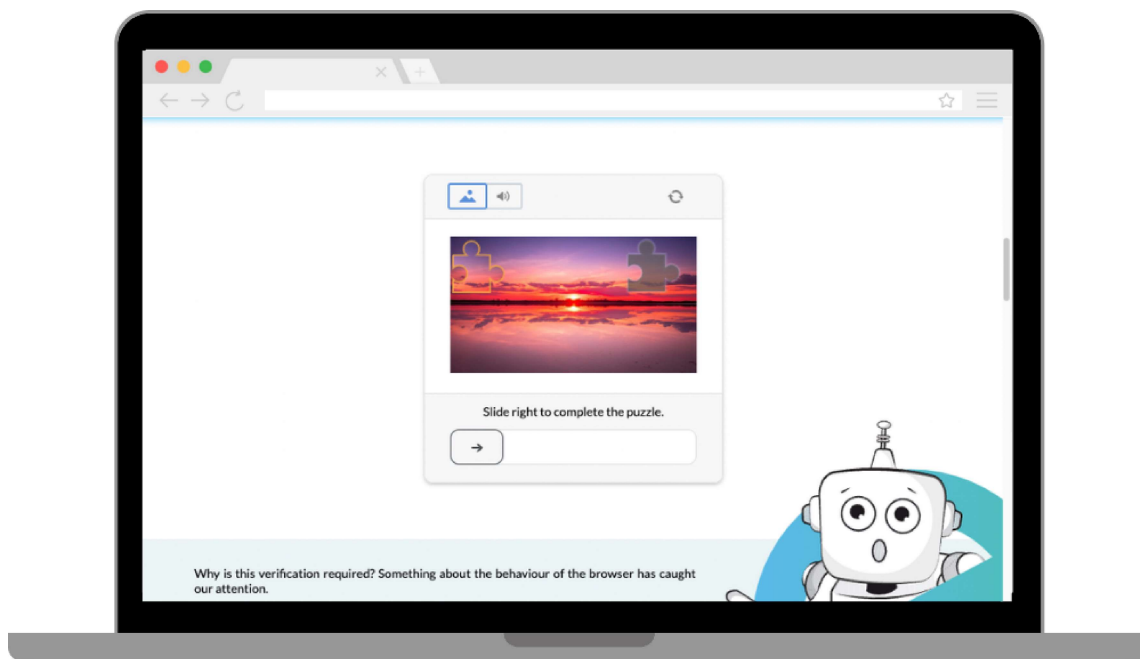

Compliant with local data privacy laws around the globe—including GDPR. We do not collect any personally identifiable information (PII). The non-PII data collected is for detection only, not shared with any third party. The default 30-day data retention period can be easily adjusted in the dashboard.

3

User Experience (UX) Optimized

99.99% of users are protected by DataDome without being challenged. If a human is challenged, they solve DataDome's CAPTCHA 10x faster than other challenges, including reCAPTCHA. DataDome's CAPTCHA also takes less than half the time to load versus other CAPTCHAs on the market.

Audio CAPTCHA in 13 Languages for Accessibility

Valentin Haüy association's Accessibility division found DataDome's CAPTCHA to be:

"Very well designed for the visually impaired."
