

Pet mess ... meet pet solution

The Bona Pet System™ is a complete floor cleaning solution for the everyday mishaps that occur with pet ownership. We love our pets no matter how much mess they make - muddy paw prints, shedding, urine stains.

Our all-in-one system eliminates everything from bad odours to stubborn stains while still being safe for your furry friends and gentle on your floors.

5 Top Tips for Cleaning Floors with Pets

Follow these tips and you'll soon discover the relief that Bona brings to you and your furry friends.

- 1. Use a floor cleaner that's safe for pets.** Choose a safe cleaner with quality ingredients to reduce the potential for your pets to inhale or ingest.
- 2. Keep pets properly groomed.** Frequently brushing your pets avoid a lot of fur getting onto your floors. To prevent scratches, be sure to keep pet nails neat and trimmed.
- 3. Add an extra round of dusting.** Fur on floors is unavoidable for pet owners. Therefore, it's important to dust prior to wet cleaning.
- 4. Prevent messes in pet zones.** Keep areas with heavy pet traffic protected. Use pads or mats around food areas and attend to pet messes immediately to avoid floor damage or lingering odours.
- 5. Protect floors with rugs and mats.** Protect entryways and other areas where pets are most likely to stay with floor mats which trap dirt and debris from pet paws.

Recommended by Flooring Professionals since 1919

Bona has over 100 years of expertise in professional wood floor care and when looking for the best to care for floors, many flooring contractors recommend using the Bona System.
