

 RISEMOUSSE®

*R&D FOR EXTREME CHALLENGES*

**RISE 1.0** Risemousse mousses have no expiration date, do not crumble, and do not tear, while respecting the environment thanks to innovative EVA materials in the LX formula, making them unique compared to competitors. Each type of Risemousse mousse reaches its specified softness in the indicated bar pressure after just a few minutes of use, returning to its original hardness when cooled, preserving its durability. For optimal performance of Risemousse mousses, the use of a rim lock and Risemousse gel is recommended. The mousses are not approved for use on public roads.

Through advanced materials with its own formula and a constant commitment to research, Risemousse offers mousses designed and manufactured in Italy to ensure exceptional performance and reliability on any terrain.

### ENDURO

Risemousse Enduro offers safety in off-road conditions. Ideal for tackling challenging terrains in classic enduro.

SIZE	BAR	WEIGHT
90/90-21 • 80/100-21	0,8 / 0,9	910 g
90/100-21	0,8 / 0,9	935 g
120/90-18	0,7 / 0,8	1460 g
140/80-18	0,7 / 0,8	1660 g

### ENDURO MAXI

Risemousse Enduro Maxi is designed for tyres with a larger internal carcass, perfect for use in classic enduro.

SIZE	BAR	WEIGHT
90/90-21 • 80/100-21	0,8 / 0,9	1100 g
140/80-18	0,7 / 0,8	1660 g

### CROSS

Risemousse Cross guarantees performance and safety on motocross circuits, adapting to most terrains.

SIZE	BAR	WEIGHT
80/100-21	1,0 / 1,1	910 g
100/90-19	1,2 / 1,3	1260 g
110/90-19	1,2 / 1,3	1460 g

**RISE 2.0** The Rise 2.0 mousses mark a turning point in the industry, with an exclusive design and innovative technology that redefine the performance of traditional mousses. Developed to ensure greater resistance, adaptability, riding comfort, and superior durability. Continuous research allows us to create unique products to tackle the most extreme challenges with reliability and performance.

### ARIZONA

Risemousse Arizona is designed with a "SILK" treatment formulated by lab technicians to withstand the high speeds and temperatures typical of Rally racing.

SIZE	BAR	WEIGHT
90/90-21	1,1 / 1,2	1100 g
140/80-18	1,4 / 1,5	1660 g
140/80-18 ARIZONA+	COMING SOON	

### X-EDITION®

Risemousse X-Edition is the ultimate mousse for Hard Enduro. With a patented design, it offers exceptional grip.

SIZE	BAR	WEIGHT
90/90-21	0,5 / 0,6	880 g
120/90-18	0,4 / 0,5	1200 g
140/80-18	0,4 / 0,5	1480 g
140/80-18 X-EDITION+	COMING SOON	

### CLIMBER

Risemousse Climber, with its removable blocks, allows you to adjust the simulated pressure to your preference. Ideal for those who have tried the Enduro version and seek a more specialized product.

SIZE	BAR	WEIGHT
140/80-18	0,4 - 1,0	1615 g

### MINICROSS

Risemousse Minicross offers reliability and high performance on motocross circuits, ensuring safety on various terrains at the best quality-price ratio.

SIZE	BAR	WEIGHT
80/100-12	1,2 / 1,3	633 g
60/100-14	1,0 / 1,1	400 g
90/100-16	1,2 / 1,3	1200 g
70/100-19	1,0 / 1,1	1050 g

NEW

### B-SURE®

B-SURE, based on Risemousse's off-road competition experience, supports the bike in case of puncture, allowing you to travel up to 100 km at an average speed of 50 km/h.

SIZE	WEIGHT
3.50-10 • 90/90-10	120/90-10 • 130/70-10
100/80-16 • 110/70-16	120/80-16 • 130/70-16
140/80-17 • 150/70-17	<b>(170/60-17 COMING SOON)</b>
140/80-18 • 150/70-18	110/80-19 • 120/70-19
90/90-21 • 80/100-21	

10 YEARS WARRANTY\*

### INFINITY

Infinity is the anti-puncture system in ETPU for E-Bike and MTB, designed to protect inner tube and rim from punctures and pinch flats, supporting flat riding for a limited number of kilometers.

SIZE	WEIGHT
27,5"   29" x 2,20/2,50 INFINITY+	935 g
27,5"   29" x 2,20/2,50 COMING SOON	

\*only when used with an inflated inner tube

NEW

## DOUBLE-K SOFT

Risemousse Double-K is the world's first dual-compound mousse. The yellow base has greater hardness to protect the rim, while the upper part is made of a softer compound to simulate a pressure of 0.4/0.5 bar, ideal for muddy and soft terrains.

SIZE	BAR	INFO
140/80-18 YELLOW	0,4 / 0,5	COMING SOON

NEW

## DOUBLE-K MEDIUM

Risemousse Double-K is the world's first dual-compound mousse. The blue base has greater hardness to protect the rim, while the upper part is made of a standard compound to simulate a pressure of 0.7/0.8 bar, suitable for medium enduro terrains.

SIZE	BAR	INFO
140/80-18 BLUE	0,7 / 0,8	COMING SOON

NEW

## DOUBLE-K HARD

Risemousse Double-K is the world's first dual-compound mousse. The red base has greater hardness to protect the rim, while the upper part is made of a harder compound to simulate a pressure of 1.2/1.3 bar, ideal for harder and drier terrains.

SIZE	BAR	INFO
140/80-18 RED	1,2 / 1,3	COMING SOON

## ACCESSORIES

## SILICONE GEL

Risemousse's biodegradable silicone gel improves mousse durability and performance, ensuring high quality and low environmental impact.

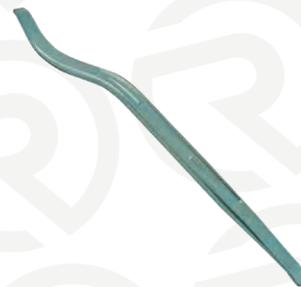

QUANTITY
75 ml      500 g      1000 g

## SOLVENT

Risemousse SICURSOLV is a pure, odorless synthetic solvent ideal for removing silicone gel or grease.

QUANTITY
100 ml

## LEVER

Risemousse levers are durable and easy to use, designed for mousse and tyre mounting and dismounting.
