

TECHNOLOGY

Innovation for **Industry**

**Your partner to reach industrial
excellence and turn your
innovations into reality.**

- Design
- Automate
- Manufacture
- Support

About us

R&D Technology is an expert in the design and manufacture of your production equipment, whether for single units or series production.

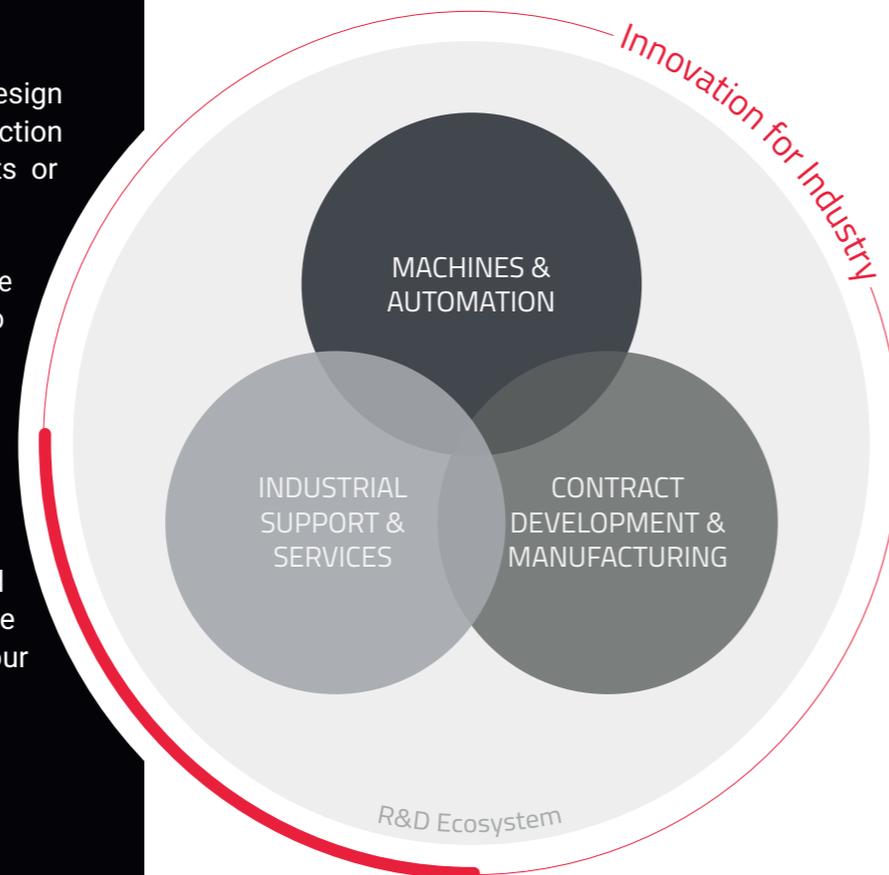

“Innovation for Industry”, our signature embodies our commitment to industrial progress and places our customers at the heart of everything we do.

Our three areas of expertise, based on our strong ecosystem, help you to meet your technical, economic and strategic challenges. Let’s combine your vision and know-how with our core competencies:

- Design
- Automate
- Manufacture
- Support

THREE COMPLEMENTARY EXPERTISES TO MEET YOUR INDUSTRIAL CHALLENGES

R&D Technology helps you turn your ideas into innovations and your ambitions into solutions. Take advantage of our experience to reinvent yourself, drawing on our three main areas of expertise.

MACHINES & AUTOMATION

- Customised production equipments
- Robotics / Cobotics
- Flexible automated assembly
- High-speed assembly
- Vision & Control systems
- Retrofit / Revamping

CONTRACT DEVELOPMENT & MANUFACTURING

- Innovation & Development
- Series production
- Quality assurance
- Delivery & Aftersales

INDUSTRIAL SUPPORT & SERVICES

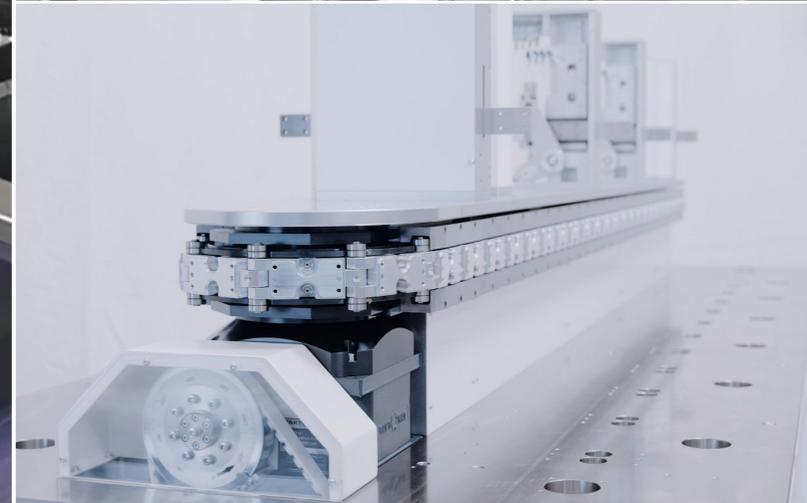

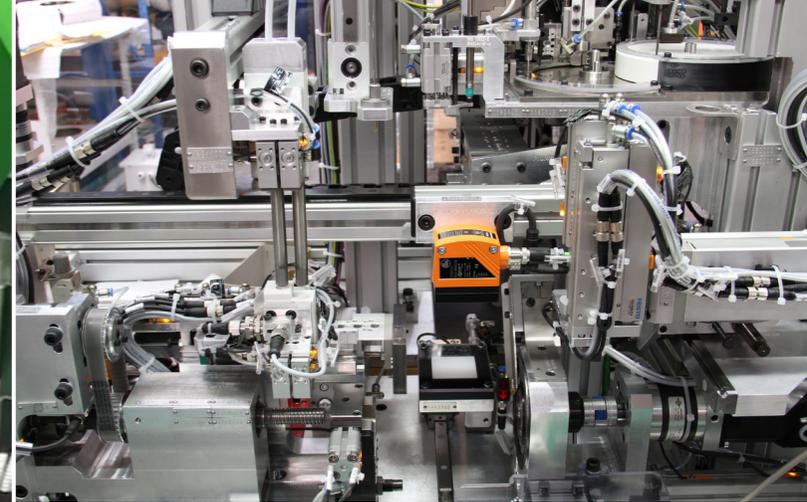

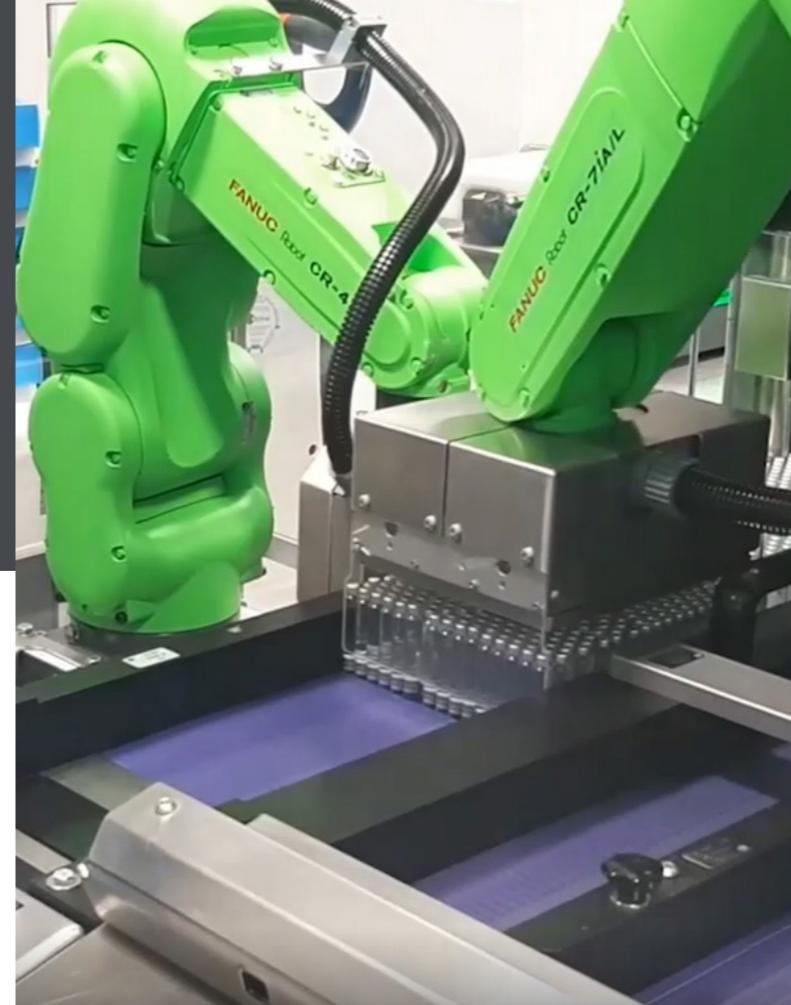

- Design Thinking
- Industrialization consulting
- Design & Engineering
- Automation & Programming
- Support & Services

MACHINES & AUTOMATION

We design and manufacture your production machines and automation solutions to optimize your processes and achieve your industrial objectives.

+ CUSTOMISED PRODUCTION EQUIPMENTS / SPECIAL MACHINES

Backed by our passion for technology, we design and manufacture state-of-the-art equipment for whenever a standard solution isn't the right fit.

+ ROBOTICS / COBOTICS

With its recognised know-how in multi-brand industrial robotics integration, R&D Technology designs and builds robotic or collaborative cells.

+ FLEXIBLE AUTOMATED ASSEMBLY

The result of a technological challenge, our Evolubox® cells open a new way in the automated assembly of small and medium series.

+ HIGH-SPEED ASSEMBLY

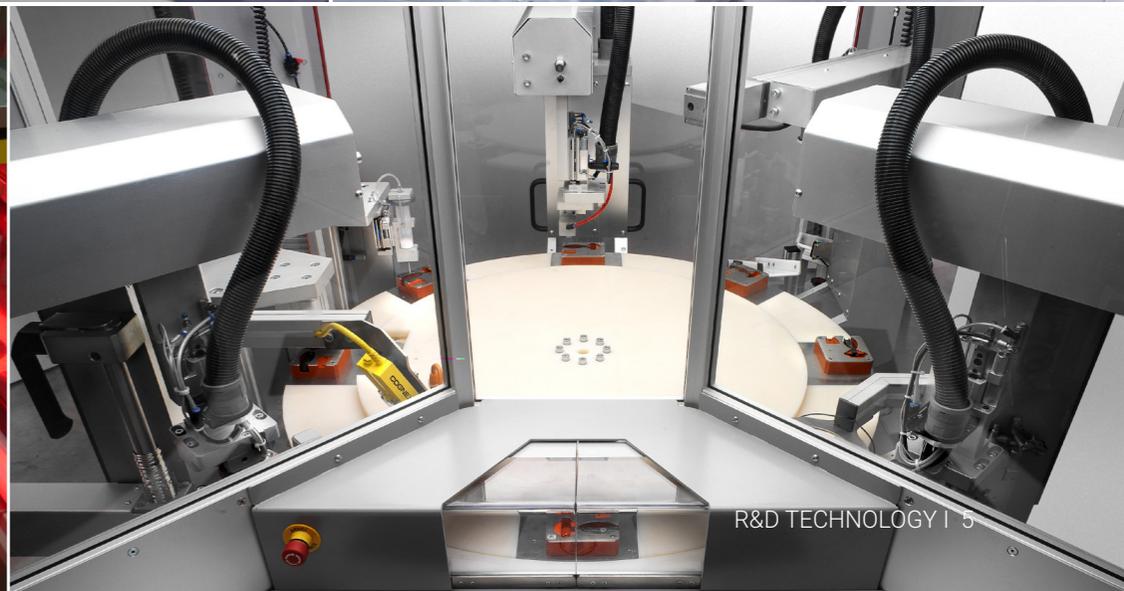

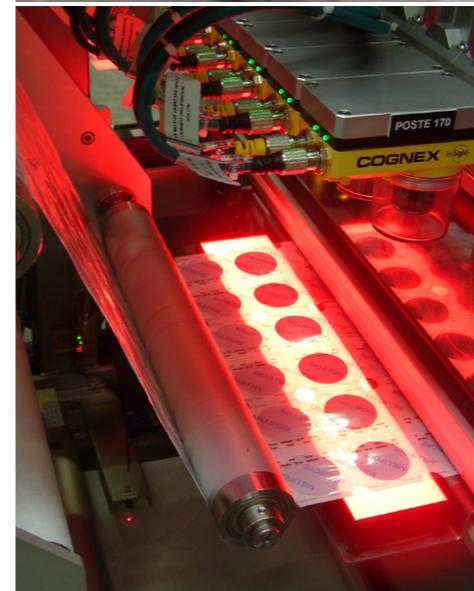

The new "Cam Driven Line" hybrid cam assembly system ensures high performance and precision in your high-speed assembly operations.

+ VISION & CONTROL SYSTEMS

Our expertise in the latest vision and control systems guarantees you more efficient processes and controlled production for constant quality.

+ RETROFIT / REVAMPING

We modernize your equipment by integrating new technologies and functionalities to optimize its performance, durability and compatibility with current standards.

CONTRACT DEVELOPMENT & MANUFACTURING

Outsource the manufacture of your complex products and equipment, whether they are designed by your teams, by our engineers or through co-development. R&D Technology accelerates innovative projects, from idea to mass production...

INNOVATION & DEVELOPMENT

- Audit, Ideation
- Feasibility
- Mechanical, Electrical, Automation design
- Prototypes
- Budget forecast

SERIES PRODUCTION

- Industrialization
- Sourcing
- Instructions & Process
- On-demand production

QUALITY ASSURANCE

- Risk analysis
- Certifications
- Release test
- FAT / SAT
- IQ / OQ / PQ
- Traceability

DELIVERY & AFTERSALES

- Strategic stock
- Custom packaging
- Worldwide delivery
- Spare parts

R&D Factory - We guarantee the series manufacturing of your most sophisticated equipment in our workshops, while maintaining absolute confidentiality. Dedicated areas, highly skilled technical teams and our proven, rigorous processes are at your disposal. From design to delivery, we handle your entire series production, meeting the highest standards. A sense of detail and excellence for a 100% French production.

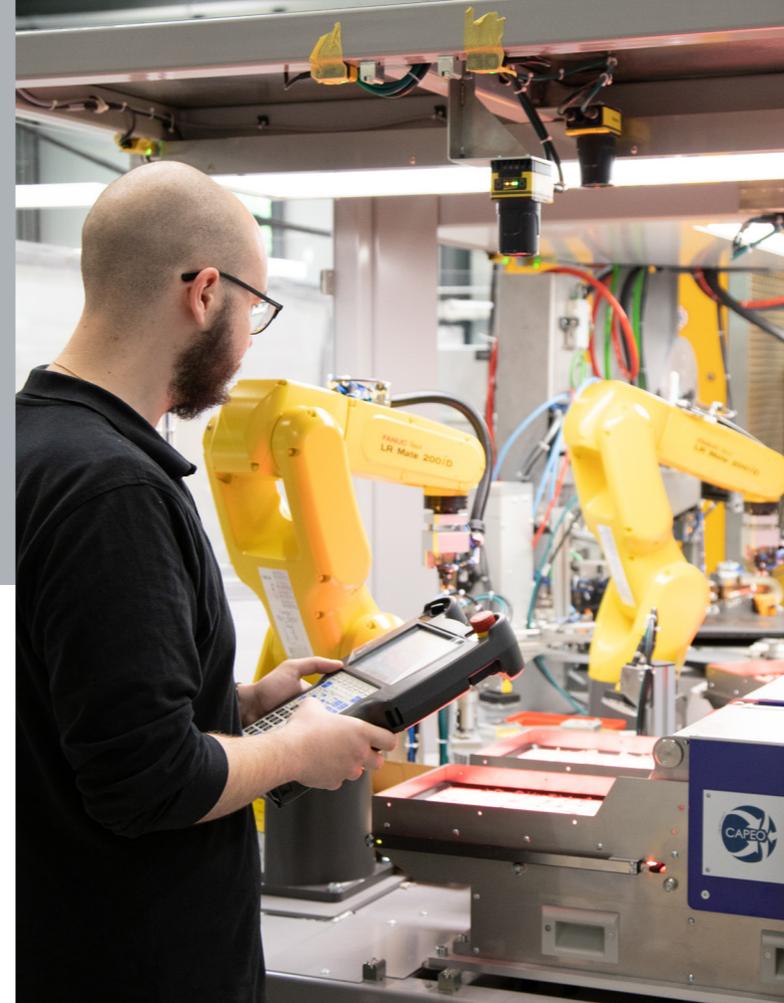

R&D Software - Working with us means accessing a powerful proprietary IT system to save time and keep your mind at ease. Our software is a real dashboard monitoring every stage of production in real time, and optimizing every process. We guarantee you flawless quality and traceability.

INDUSTRIAL SUPPORT & SERVICES

R&D Technology stands out as a unique partner supporting you at every stage of your industrial projects. Our know-how and qualified experts provide you with strategic advice and proven practical skills.

STIMULATING INNOVATION

Design Thinking

- Strategic thinking
- Process & product innovations
- Workshop Solutions
- Design Workshop

OPTIMIZE YOUR PRODUCTION

- Industrialization consulting
- Productivity audit
- Ergonomics

WORKING WITH OUR EXPERTS

- Pre-studies, feasibility studies
- Mechanical engineering
- Automation & Programming
- Prototyping / POC

ANTICIPATE : SUPPORT & SERVICES

- Training
- Maintenance contracts
- Quick assistance in mixed reality
- Spare parts

AN ECOSYSTEM DESIGNED FOR YOU

You're at the heart of our R&D Ecosystem!

R&D Technology is constantly growing and strengthening its expertise in order to adapt to market fluctuations and the evolving needs of industrial players.

For over 25 years, we've been building an ecosystem around our 5 core values:

Excellence, Ethics, Passion, Commitment and Innovation.

Dedicated, passionate teams for each of our customers. Qualified and passionate about their field of expertise, our talents guarantee you total commitment to achieving your goals.

Infrastructures that foster collaboration and innovation.

In 2019, R&D Technology inaugurated its new headquarters, offering modern facilities to meet all your project needs in excellent conditions. Ideal spaces for the development of innovative projects.

Our workshops and various locations in France enable us to gain in flexibility, increase our production capacity and improve our services. These environments enable us to integrate cutting-edge technologies offering ever-greater performance and innovation.

Committed partnerships and networks! Continuously improving support is our motivation. R&D Technology has forged strategic partnerships to give you access to complementary expertise and specific resources. We keep in mind the objective of reducing risks and optimizing costs. We gather around us the best

skills : Competitive clusters, French research players...

Providing you with technologies of excellence. In our commitment to offering our customers state-of-the-art solutions, we have established alliances with suppliers to integrate their unique technologies. Adapting,

learning and mastering them is part of our daily work to develop solutions tailored to your needs.

R&D Technology, your industrial partner.

**MEDICAL, PHARMACEUTICAL,
MEDTECH, BIOTECH**

COSMETICS

**ELECTRONICS, ELECTROMECHANICS,
HOUSEHOLD APPLIANCES**

AUTOMOTIVE

FOOD INDUSTRY

**MECHANICS, ENERGY, PLASTICS,
CONSUMER GOODS...**

INDUSTRIAL SECTORS

Each industrial sector presents specific challenges and demands for which R&D Technology innovates in order to provide adapted solutions.

With a wealth of experience from various projects and a continuous development of skills, our teams design and manufacture with passion solutions answering the needs and problems of our customers.

From manufacturing workshops to clean rooms, we help large groups, ETIs, SMEs or project leaders to improve their industrial performance and to bring their projects to life.

R&D TECHNOLOGY GROUP

More than 25 years ago, on the corner of a table, with a PC and a lot of ideas, the creators of R&D gave the initial impetus to what was to become a formidable human and technological adventure.

Today, the Alsace-based group continues to expand, and now operates from 4 sites in France.

Innovation is the daily business of our multidisciplinary technical teams. Whatever your process, industry or need, R&D Technology develops reliable technical solutions to meet your objectives.

**Your partner
to reach industrial excellence
and turn your innovations into reality.**

18^{M€}

equipments installed

INNOVATION & CONVIVIALITY

Jean-Luc, Marc and Philippe ROSER, 3 associated brothers, breathe a deeply human dimension into the whole Group. At R&D Technology, innovation and conviviality go hand in hand. Our strong values are the foundation on which we build our growth and our projects.

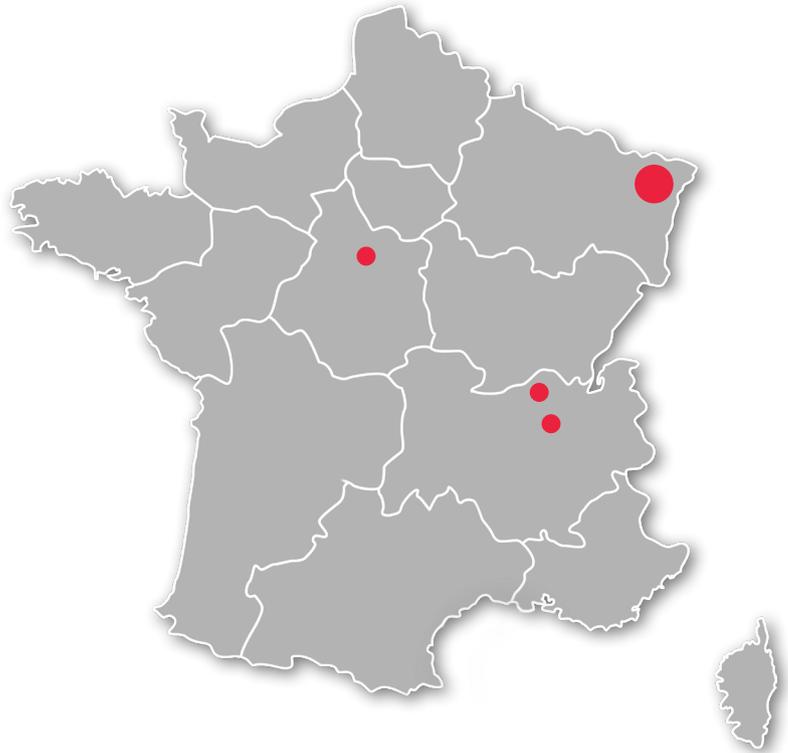

TECHNOLOGY

Innovation for **Industry**

Expert in the design and manufacture of your production machines...
R&D Technology is also your Contract Development and Manufacturing (CDMO) strategic partner.
We manufacture your complex, innovative equipment in series.

Let's turn the industry of the future into a reality!
