# AMMP OEM

Remote monitoring for distributed energy

What is AMMP?

AMMP provides digital solutions for distributed energy globally. Our SaaS platform offers remote monitoring and management for energy users, energy service companies, and vendors of renewable energy systems.

Best-in-class cloud monitoring

Outstanding user experience

State-of-the-art security

Cost-effective implementation

Web and mobile interfaces

Beautiful dashboards for live access to all systems. Zoom in and get a close look at details for an individual system. Or zoom out and see the big picture. Your choice.

System configuration and control

Automated onboarding flow. Remote system configuration and firmware updates. Real-time alerting functionality. Remote troubleshooting of issues.
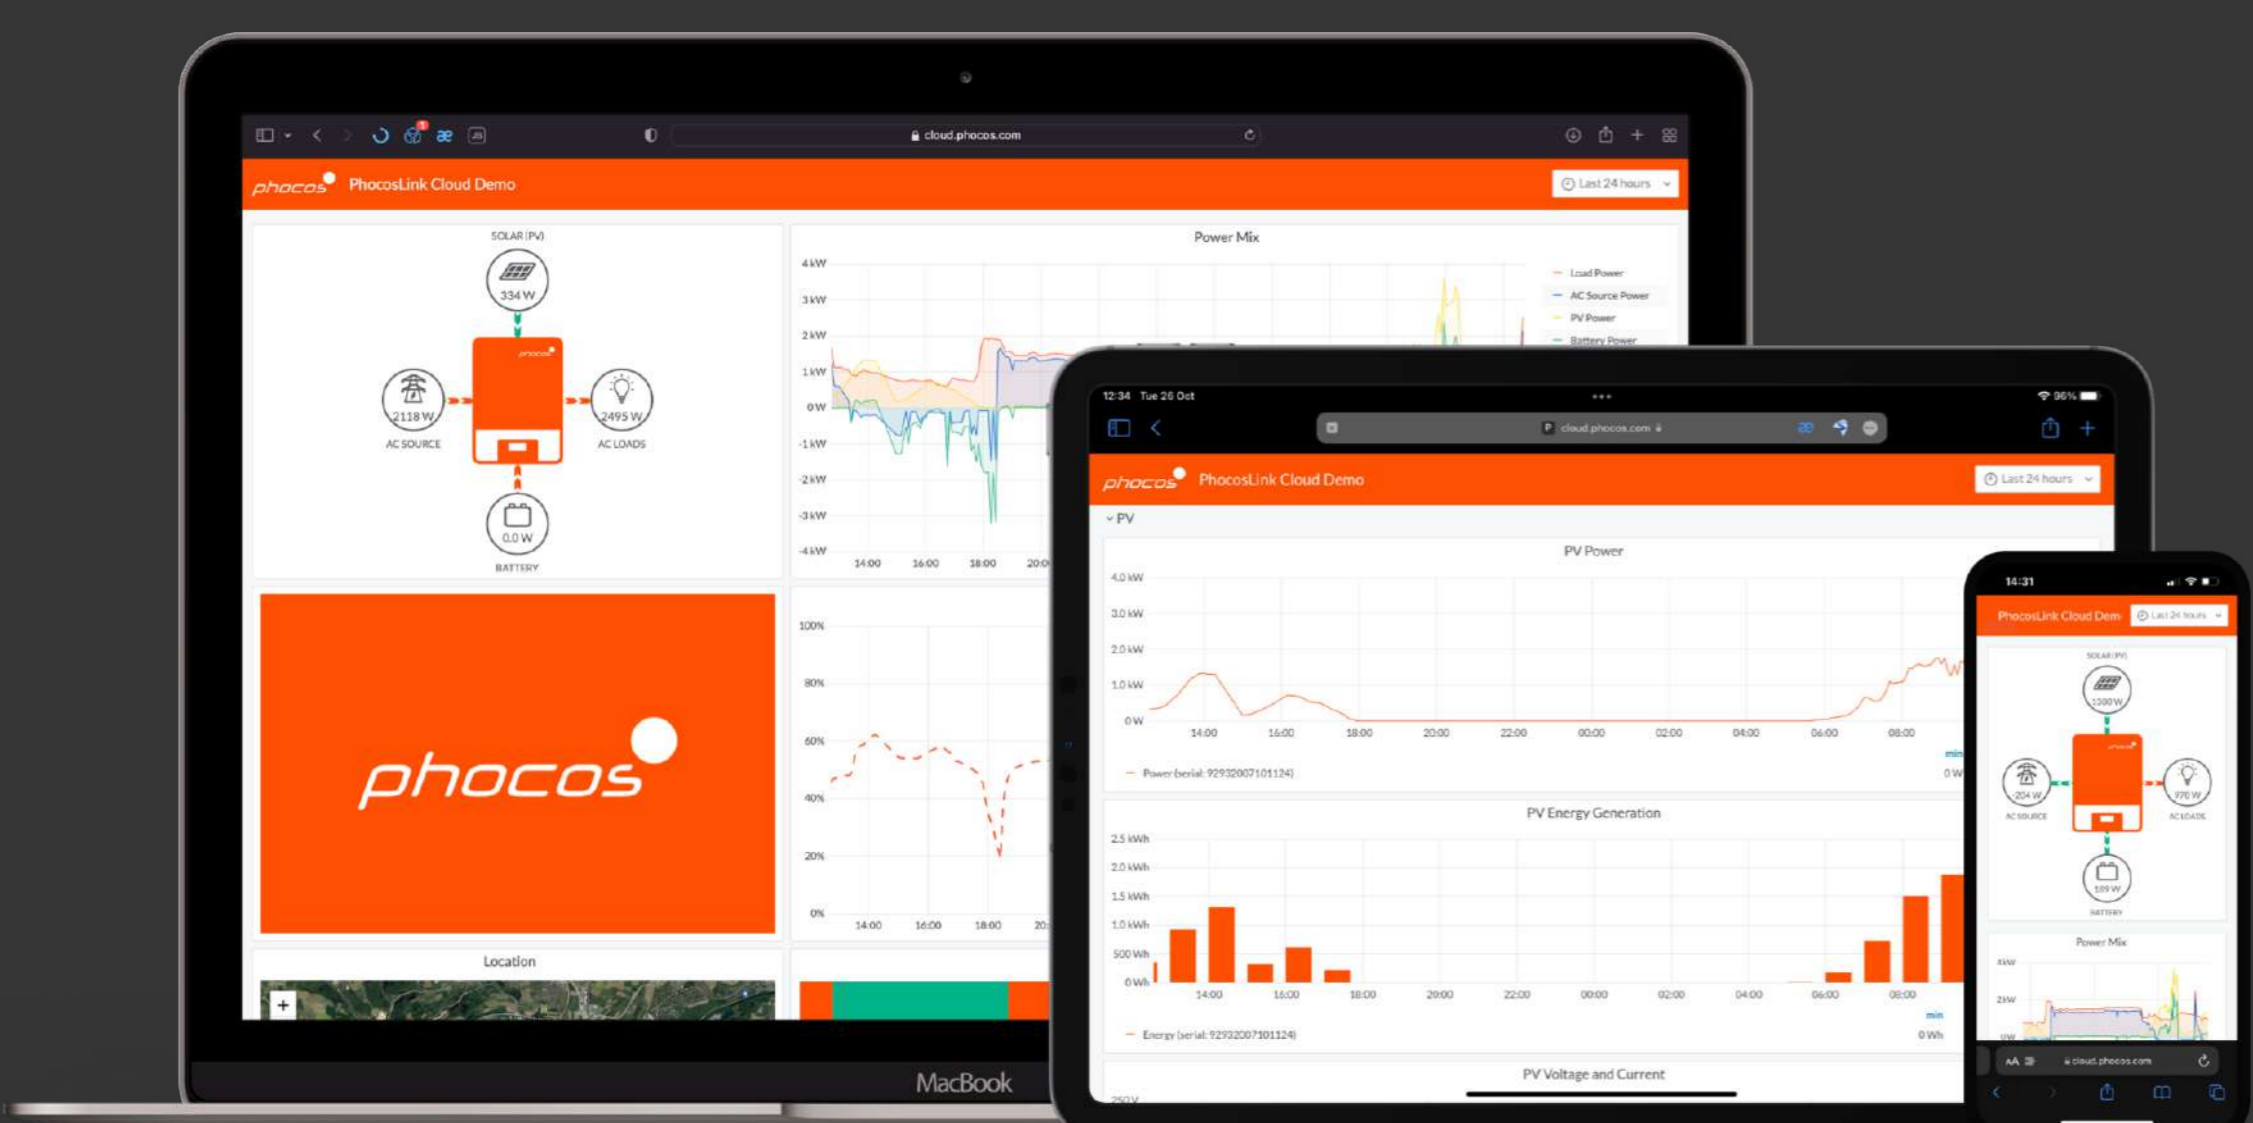

Value-added integrations

Real-time alerting engine integrates with your favorite tools. Asset management and reporting solutions. Integrations with advanced analytics and maintenance services.

Case Study: PhocosLink Cloud

Phocos is a leading provider of reliable, innovative energy solutions. All Phocos systems can be monitored in real-time through **PhocosLink Cloud**, a remote monitoring platform developed by AMMP.
