

CENTER OF EXCELLENCE IN
METAL MANUFACTURING

Your reliable partner on the
road to **zero-carbon emissions**

INNOVATION • DESIGN • INDUSTRIALIZATION • INTEGRATION

Over the past 20 years,
ACS Steel Group
has become a well-known
actor of decarbonation.

Its new entity **SteelHY**
works together with its partners
to design, industrialize, and integrate their storage and distribution systems
of **renewable energies** (hydrogen station, skids, containerization solutions, etc.)
and **decarbonation solutions** for the industry.

By investing in R&D and industry 4.0, SteelHY wants to become the French metal
leader in the development of **a competitive hydrogen and biogas chain of excellence**
in France and abroad.

SteelHY's first and main commitment is to reach the **zero-carbon goal**.

FOR YOU

The center of
metal manufacturing
for **decarbonation**
