you manage
stakeholders

1

A user will log into a secure web application.

2

He collects results from your data according to your dashboard specifications.

3

Or those already available within the application.

4

The user will eventually get his results in short time avoiding all multiple interactions.

- 1.** The system will quickly deliver the user's results without requiring repeated interactions.
- 2.** Originally, assigned collaborators focused on delivering results for the user.
- 3.** They are now free to work on understaffed projects or projects set aside due to a shortage of time and resources.
