FORMAcultura

FORMAcultura was founded in 1999 with the ambition of enhancing cultural heritage and tourism in an innovative way. Our work group is composed of archaeologists, art historians, teaching experts, graphic designers and 2D and 3D modelers.

PRODUCTS

We make models to build, in paper and wood, that reproduce monuments and specific subjects on commission. The very high quality of the detail makes our products unique in the world.

Since 2021, the new line of wooden puzzles with specially shaped tiles has been added.

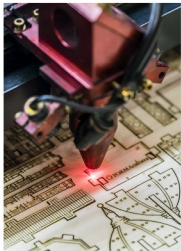

INNOVATION

The paper models are made with the innovative use of photographic textures for a realistic result.

The wooden products are cut and engraved with the latest generation laser technique to create perfect joints and detailed details.

MADE IN ITALY

Our production, from design to packaging, is artisanal and entirely made in Italy. To protect the environment we use FSC packaging, paper from responsibly managed sources.
