SIRET 899 476 782 00029

An unique experience

Losonante

Immersive

The listener immerses himself in a sound capsule. Losonnante offers a possibility of enhancing places without generating sound conflicts.

Sensory

Losonnante offers a multi-sensory experience by hearing through touching. A device that allows you to differentiate yourself and create sharing moments.

Memorable

Trying it, it is talking about it! The experience meets the attractiveness issue of sites and events.

Click on the video

This video shows the spontaneous reactions of people trying the device.

Listening through the body

Losofnante

Sounds perception

Hear something else, hear differently. A new and fun way to visit while promoting attention, memory and concentration.

Bone conduction

The sound is not projected through the air, it travels along the elbows, arms, hands to the ears.

Emotions first

Become one with your immediate environment. Innovative listening that highlights vibrations, feelings and emotions.

"[...] all the imagination is set in motion [...] it is something very strong that we feel deep down."

Jean Pierre Barbier, Isère Department President

"Visitors really enjoyed Losonnante all summer, we have lots of great comments, people are intrigued!"

Claudine Beaudoin, Innovation and development direction at Musée de la Civilisation du Québec

"The devices are subjected to intensive use which has stimulated R&D at Losonnante. The new version is functional and robust."

Vincent Blech Exhibition curator at Universcience

Quiet

Perfect for noisy indoor or outdoor spaces, Losonnante offers the possibility of enhancing spaces without generating sound conflicts. The visitor creates his own sound bubble. ⁵

No accessories

No headphones or smartphones, use your elbows and place your hands on your ears. A moment out of time, alone or two users, where you will become one with the sound.

Solid

The device has a Corian cover, a solid, hygienic and shock-resistant material. It is also waterproof with an electrical connection IP65 standards.

Our Whisper range

Losoñante

Whisper Box

Waterproof bone conduction device, Corian® cover, touch sensitive interface with a LEDs display. We advise to integrate the device in an 80 cm or 110 cm high stand.

Whisper Nomad

Device equipped by a 1.5kg waterproof battery IP67 12V, to integrate in the furniture.

Whisper Video

Whisper Video device allows you to play a video file while maintaining the triggering functionality with your elbows. The HDMI connection ensures excellent image quality and synchronization with sound. It works indoors and on mains power only.

Reading detection

Elbow detection triggers play.

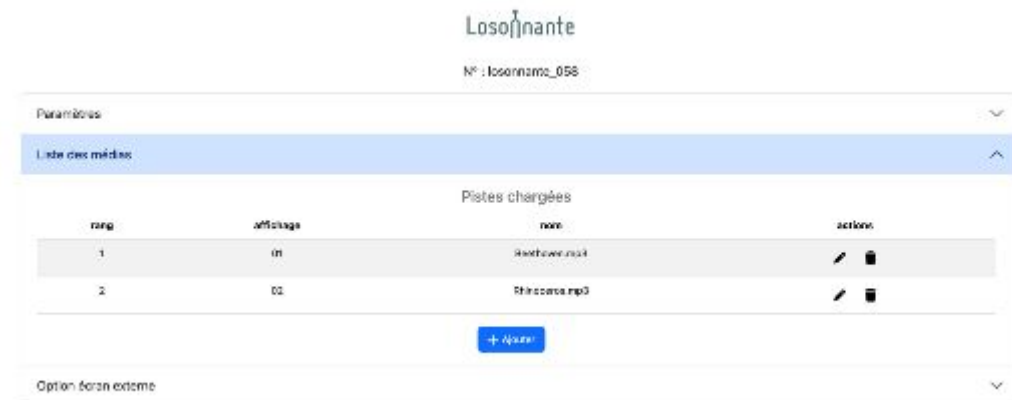

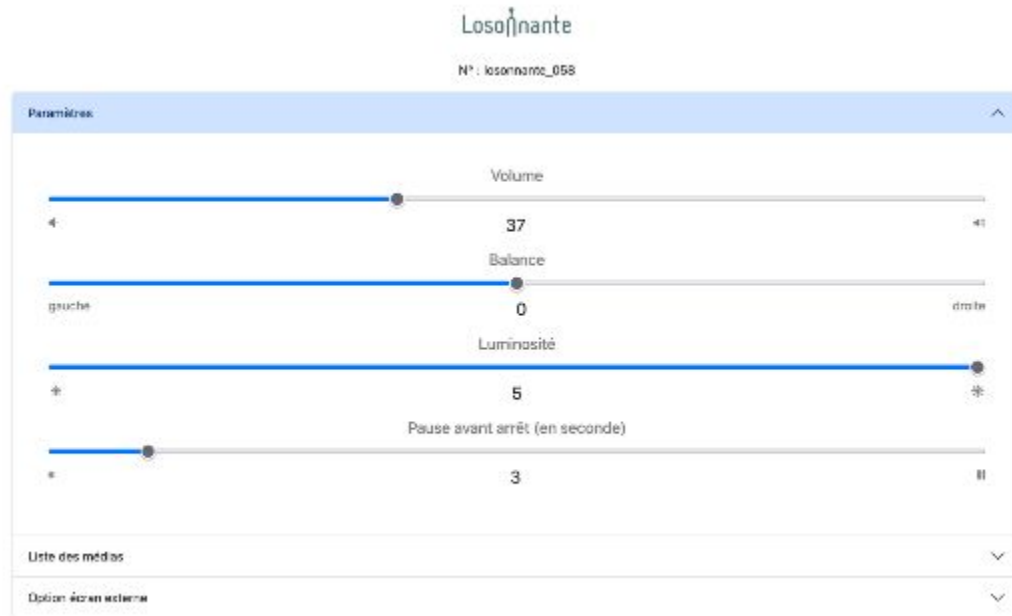

Tracks change

Navigation from one track to another is done by pressing the “next” and “previous” buttons.

Reading pause

If you raise your elbows, playback pauses for a set time.

Intuitive interface

The system is multitask to manage different sounds or languages.

Easy files loading

The sounds are integrated into the box by depositing the mp3, wav, mp4 files.

Autonomous settings

A web page accessible through the device's WiFi network allows you to modify the settings.

Whisper desks

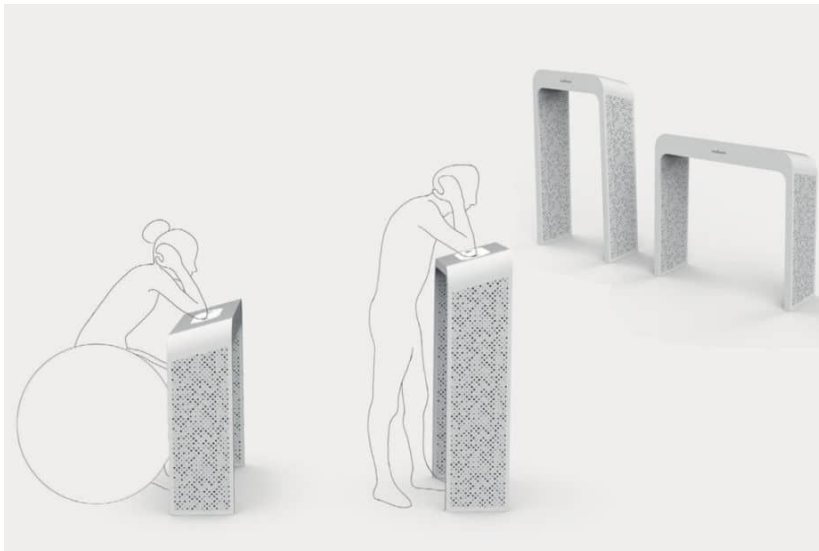

A range of desks: an optimized ergonomic with an angle allowing you to look up. Fixing directly to the floor or on a base. Electrical connection possible in the feet of the furniture.

For indoor use:

An elegant and solid wood finish desk with the wood variety of your choice.

For outdoor use:

A 3mm steel desk with anti-corrosion paint, tamper-proof screws.

Freedom of integration

The device can also be integrated into a custom support allowing a great scenographic freedom. Any type of material can work.

Installation

On-site travel, assembly/disassembly of terminals, configuration and adjustments.

Sound integration

Optimizing the listening by compressing and filtering your own sound files.

Sound creation

Sound creations with music, sound effects, creation of historical atmospheres or specific sounds.

Delivery

Turnkey delivery with instructions and remote assistance.

Rental

Daily or monthly rental of the box with or without the Whisper Desk.

Maintenance

Annual maintenance contract including preventive, corrective and upgradeable maintenance.

You have a specific idea or project? We also carry out tailor-made projects.

Variety of contents

All types of sounds are intelligible: singings, songs, texts, sound effects, musics. The most beautiful stories are experienced in your ear: testimonies, narrations, tales...

Creativity focus

Daring and sound creativity help to optimize the experience by engaging the senses. Whisper Box works in stereo and spatial sound for an unusual immersive experience.

Somes minutes so precious

Quality sound creation and production involve the listener in a confidential and intimate listening experience. We advise you in your sound project.

Cultural sites and museum

The need

Promote the site that recreates the Roman fortifications around Alesia by bringing the battle back to life.

The solution

A Whisper Box and a desk are installed opposite to the fortifications. The sound reconstruction work was carried out by focusing on the Romans' point of view by being in their camp. Research on the sounds of Gallic Carnyx was also carried out.

Touristic sites

The need

SMIDDEST (Syndicat Mixte pour le Développement Durable de l'Estuaire de la Gironde) wanted a solution to listen to the works created by the Compagnie des Musiques Télescopiques at the Cordouan lighthouse. They were welcomed in residence at the lighthouse to immerse itself in the unique atmosphere of the place and make sound recordings.

The solution

For this project, the equipment was transported by barge and received by the lighthouse keepers, who took charge of the final set up due to the inaccessibility of the site out of season. We then coordinated remotely with the keepers to ensure the set up and installation of the device.

PHARE DE CORDOUAN

Museography & Scenography

The need

Listening to food texture noises in the Main Hall, which was extremely noisy during the Banquet exhibition. The idea was to make these food textures heard by bone conduction. After Paris, the exhibition went on tour for 4 years (Lyon, Canada, etc.).

The solution

A text written and read by the journalist and Chef Arnaud Daguin was recorded and then translated into English and Spanish. Two multi-track devices were set up at different heights to be accessible to all. The furniture was designed by the Cité des Sciences team.

Les Jardins de l'Oratoire

Leisure & theme parks

The need

In the new immersive space, Terra Botanica wanted to play on the senses and to offer listening to birds. The team was looking for a sound solution adapted to the outdoor environment to discover 3 bird songs of different species.

The solution

We installed 6 devices outdoors at two different heights: children and adults. We advised the park team in their furniture design in accordance with the environment of the bird canopy. A naturalist narrates the characteristics of the birds.

Make the difference with the sound

Events & Festivals

The need

Adding sound to a screen that displays an anamorphic animation presenting the new BMW iX2. The event agency JCDecaux Live was looking for a simple audio broadcasting solution compatible with 3D technology that does not generate noise pollution.

The solution

Losonnante broadcasts only to users of the terminal without impacting the public space and without disturbing users of the paved square. The terminal allows you to mark the right point of view to take advantage of the anamorphic effect.
