

METAflow

Your Copilot for Navigating Cytometry Data

Trust the collaborative platform that respects your data structure

Discover your desired populations with a few clicks

Novel intuitive interface

Enhanced performance & robustness

Efficiency & compliance

You are just a few clicks away from your populations of interest

- STEP 01** ● **LOAD YOUR FILES**
Conventional, spectral and mass cytometry
- STEP 02** ● **CREATE YOUR WORKFLOW**
- STEP 03** ● **GET OBJECTIVE RESULTS**
 - + Generate objective results
 - + Save time to critical insights
 - + Simple or complex panels
 - + Robust rare cell detection

Let METAflow's AI identify and generate statistics for populations of interest across a multitude of files.

Still lost in the space of cytometry data analyses?
Concerned by

- ▼ Managing new and legacy data?
- ▼ Reproducibility?
- ▼ Navigating complex data?
- ▼ A lack of technical expertise?

Let METAflow fix these issues and see what you can get with only 5 clicks

It is all about augmented intelligence

- ✓ A comprehensive solution designed by cytometrists
- ✓ Powered by an innovative, seamless, algorithm suite
- ✓ Preserves the structure of your data, averting artifacts from concatenation
- ✓ Reach conclusions and derive critical insights with ease, get more objective results
