

A large, white, stylized letter 'Y' is centered on the page. The background is a dark blue field filled with numerous thin, glowing fiber optic cables that create a bokeh effect of light blue and white circles. The word 'Industrya' is written in a white, sans-serif font across the top horizontal bar of the 'Y'.

Industrya

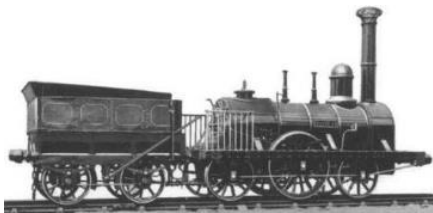

**A New Kind of
Corporate Venturing**

An investment fund
of €42M

Initiated and supported by John Cockerill
and well-known **private and public**
financial partners in Belgium

Bringing together their **expertise**
and **ecosystems** to support
start-ups/scale-ups in the industrial
and B2B sectors

200 years of industrial experience... To respond to the needs of our time

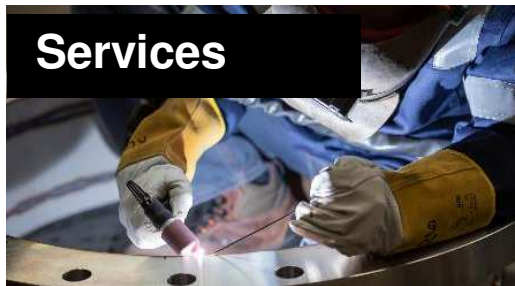

200 YEARS OF FUTURE

Learning from the **past** to build a better **future**

John Cockerill activities

An international Group

- ▶ 23 countries
- ▶ 51 nationalities

Investment Fund

€42M

Started : Sept 2020

Fund duration : 10y.

Investment period : 5y.

A unique concept

- ▶ An independent, hands-on investment fund
- ▶ To support, coach and incubate/accelerate start-ups and scale-ups
- ▶ With minority investments/shares in the start-ups/scale-ups

Hands-on partners

noshaq

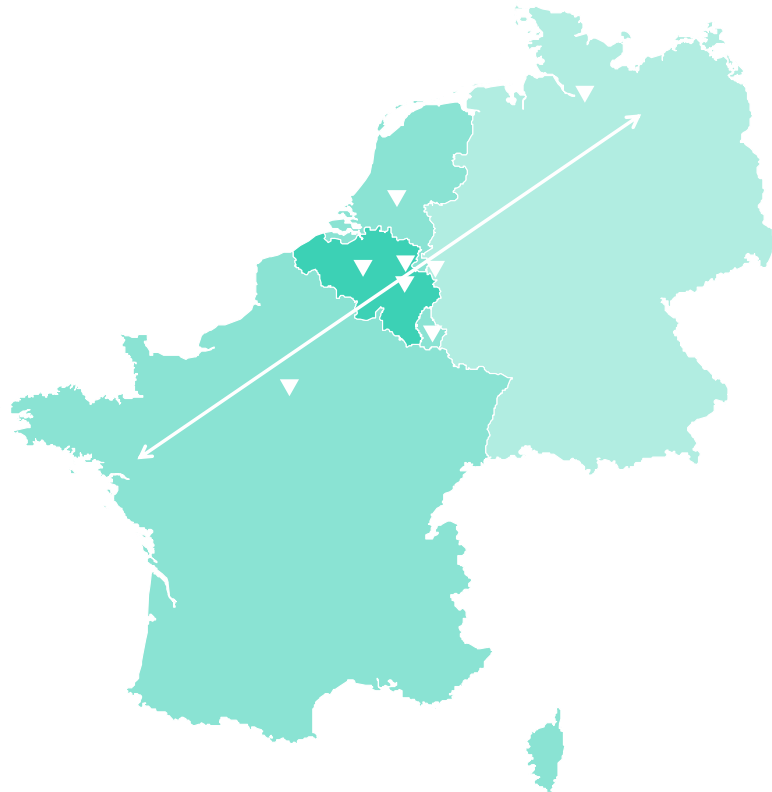

INCUBATHOR

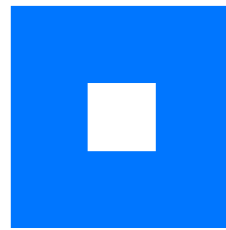

- ▶ Giving access to
 - the international John Cockerill Group network of expertise, mentoring
 - market access, clients, industrial partners
 - ecosystem of investment funds, corporate incubators and accelerators in the industry sectors

Geographic scope

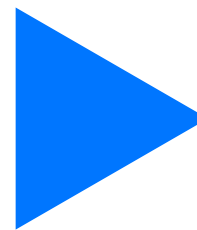

At the centre of the
European Industry 4.0
and the European start-up
ecosystem

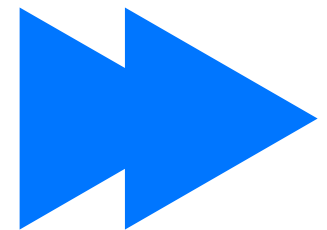

Directed towards...

Intrapreneurs

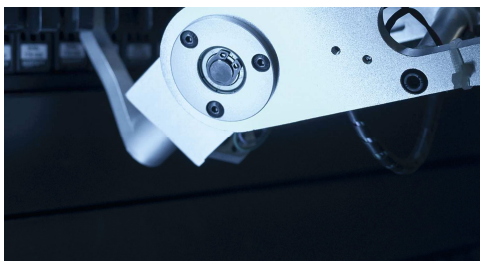

Start-ups

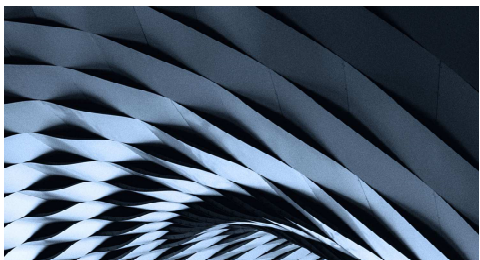

Scale-ups

Energy transition

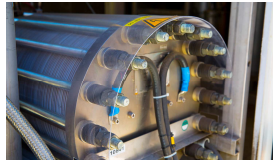

Industry 4.0
& digitalisation

Materials
& coatings

Solutions to meet
the needs of our time

Energy transition

Hydrogen production, distribution, storage and combustion systems

Storage & Batteries

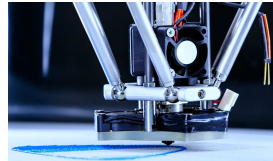

Renewable Energy

Autonomous production systems for electricity, drinking water and heat

Industry 4.0 & digitalisation

Additive manufacturing

Resistance to wear, corrosion and abrasion of 3D printed parts

Big data

Improving the reliability and energy efficiency of processes

Augmented reality

Remote support and expertise services

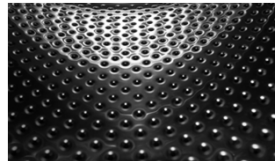

Simulation & modelling

Reliable simulation and modelling to optimise manufacturing procedures

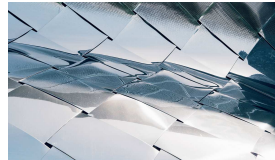

Materials & coatings

Materials

Performances improvement, new materials and cost optimisation

Coatings

New and improved surface coating and surface treatment

First investments

SUPAIRVISION

Windfarm maintenance
/drone inspection

VOCsens
Smart sensing solutions

Gas microsensors

[Confidential]

X-Ray inspection for
manufacturing lines
