Your industrial need

Increase the use of your production and maintenance business applications (SAP, MAXIMO, APRISO, O-365, and others) by your technicians and plant operators in order to make the most of the investments you've already made in your Information Systems. Maximize the quantity and quality of operating data collected by your technicians and plant operators.

Your technicians' needs

- Get guidelines while keeping their hands free
- Get their eyes focused on their tasks
- Get assistance when searching for information, at any time
- Reduce their walking time to the computer station
- Generate real-time field reports vocally
