Gouti

Much more than a project management tool

Project portfolio Management

available in ☁ SaaS or ▤ On Premise

Gouti offers

Transversal views

Standardized processes

Multi-projects planning

Resources management

Standardized reporting

**Full project follow-up**

Discover Gouti

Several transversal views

Benefit from transversal views of your project and portfolio information.

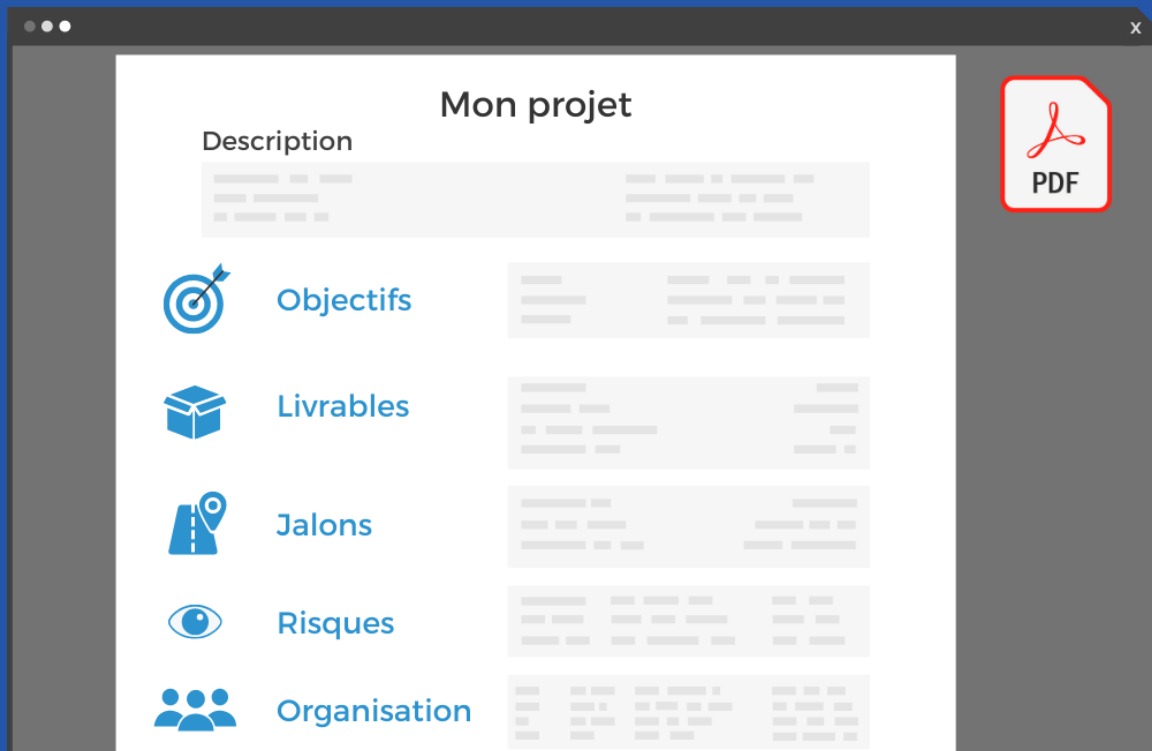

Indicators and summary charts allow you to visually monitor your portfolio.

Standardized processes

Standardize your project management processes using pragmatic formalisms and methods.

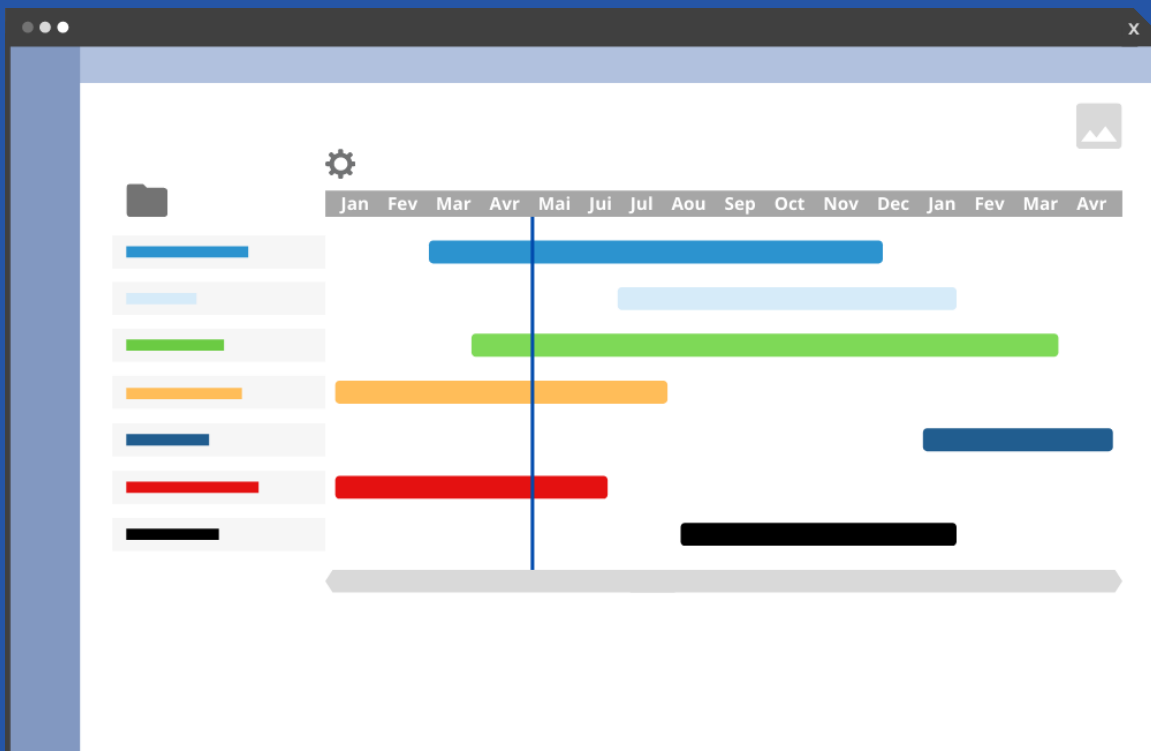

The Project Charter is a framework document that defines the scope of the project when it's initialized in Gouti.

Multi-projects planning

Visualize the global planning of your project portfolio in a dedicated macroscopic view.

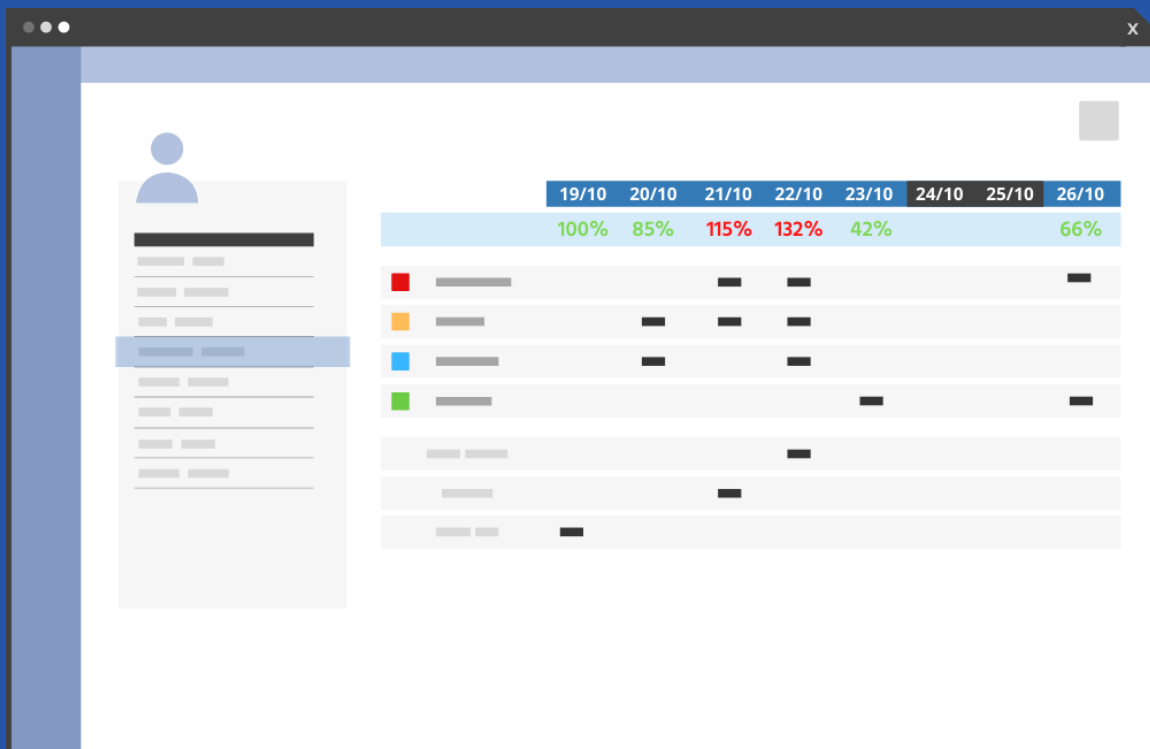

The multi-projects view allows you to visualize the global synthetic planning, the scheduling of all the tasks as well as the progress of each project.

Resources management

Manage the different resources of your organization. This includes all your collaborators , workload, costs and time spent on projects.

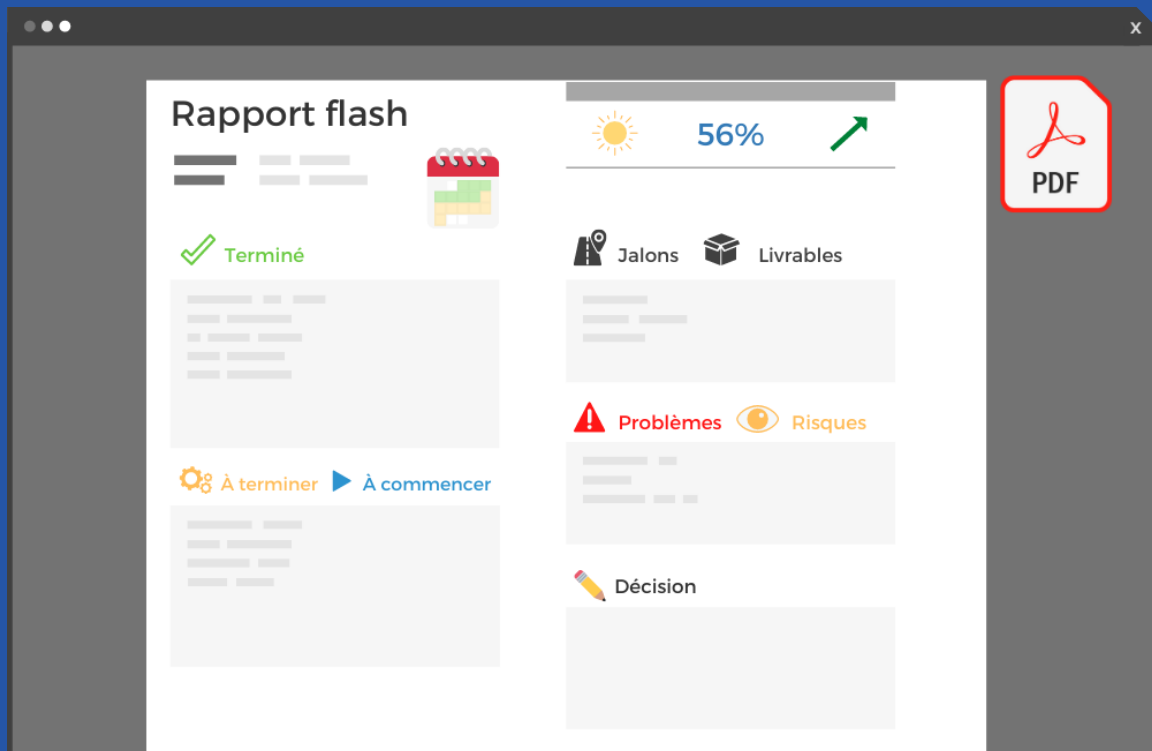

Capacity planning allows you to view the occupancy rates of collaborators on project tasks and generic tasks, such as vacations.

Standardized reporting

Standardize reporting and project communication with pre-filled, editable reports that can be exported to PDF.

The flash report allows you to report on the project's progress in a few clicks. It presents the main progress indicators over a selected period.

Full project follow-up

Track your project portfolios in detail, viewing their workload, cost, risk and change requests.

Charges

prévisionnelle ▬
consommée ▬
restante ▬

Each project benefits from detailed views on workload and costs, between forecast and actual. Summary pages offer consolidated views

Gouti is still ...

- **Risk management** and **action plan**
- Management of project **deliverables**
- **Billing** follow-up
- Shareable **project templates**
- User **groups**
- Project **milestone** tracking

- Exports and imports to **Excel**
- Project **access rights** management
- Project **delay report**
- Planned **reference dates**
- Projects and activities **categories**
- ...   (access to the list of features)

Customized requests

Do you have particular needs in terms of functionality or requests for specific adaptations?

We make specific developments for Enterprise Licenses according to the demand.

Our approach

1

We show you
First of all, we want to take the time to understand your issues and/or problems and then we give you a demonstration of Gouti and its solutions.

2

We make you test
How do you know if it's the right solution without trying it? We provide you with an unlimited Enterprise trial license so that you can test Gouti internally on real projects with your collaborators.

3

We train you
Are you afraid of a lack of support from your team or difficulties in using the tool?
We offer complete training to make you autonomous and quickly operational on Gouti.

4

We accompany you
All our customers are monitored from the discovery phase and throughout the contractual period. A dedicated contact person accompanies you on Gouti and informs you of any changes.
