MES/MOM Solutions  
for Industry 4.0

# LET'S GO FOR INDUSTRY 4.0...

## KEY BENEFITS

- ✓ **Performance**
- ✓ **Reactivity**
- ✓ **Optimization of working conditions**
- ✓ **Traceability**
- ✓ **Continuous Improvement**

### Multiple Features

Unique and Custom MES/MOM solutions with **14 functionality features** that meet **ISA / 95 standards**.

### International

Solutions are available in **10 languages** and can be locally hosted with the **Core Model**, or hosted multi-site by the cloud.

### Customization

Our solutions can be completely customized for your industrial organization: Challenges, **Lean Management**, Key Performance Indicators, etc.

### Support

From **SMEs to large international groups**, our solutions adapt to the needs of all types of companies. We provide quality service and support for our customers every day.

### Integration

Total Integration with your **Information System (ERP, business applications, ...)**

### Real Time Management

An intuitive visual management solution that promotes collaborative work and **provides performance indicators in real time**.

### Experience

A team of experts always available (**project managers, developers, analysts...**) at the service of your industrial challenges.

### Excellence

The promise of operational excellence during **the service of a successful project** including the cost, time, features, etc.

## THEY TRUST US

« Better visual communication, better productivity, involvement of production operators: CIMAG Production is a progress tool that allows total traceability in the plant and helps to improve responsiveness. »

### Manuel Angulo

Director of Production at ELIAN, A. Schulman Group
