![AMA] Digital Accelerator
amaxperteye.com

Who we are

We are a fast-growing, **international company** with big ambitions. We are **15 nationalities** collaborating on projects across **offices** around the world. We are **the Digital Accelerator** that is making remote support easy and efficient for more than 400 industrial organizations and medical institutions worldwide. **#WeAreAMA**

What we offer

AMA's XpertEye suite addresses a wide variety of applications such as **Assisted Reality, Dynamic workflow management,** and **Worldwide online scheduling**. AMA's innovative solution combines human skill-based expertise with head-mounted technologies.

Smart Workplace

Assisted Reality

Xperteye — Lite —

Remote assistance on BYOD

«Click & connect to collaborate»
Cooperate remotely on any device using a secured link in a web browser.

Xperteye — Essential —

Hands-free collaboration with smart glasses and voice control

«See what I see»
Quickly connect to remote experts, show the issue through the camera of your smart glasses and benefit from their expertise to jointly solve issues.

Xperteye — Advanced —

Remote assistance with smart glasses, a dedicated smartphone, and external video sources

«Transfer knowledge at once»
Rely on multiple video sources to visually collaborate, facilitate decision-making and accurately solve problems remotely.

Dynamic workflow management

Xperteye — Proceed —

Workflow management through mobile and wearables

Digitize your work instructions, checklists and SOPs in no time and go through them step-by-step on your connected device (smart glasses, smartphone, tablet, PC).

Worldwide online scheduling

Xperteye — Schedule —

Online booking and scheduling

Book your XpertEye session with a remote expert and benefit from simplified synchronization with other existing tech platforms you already use (Google Calendar, Outlook, iCal, Office 365).

The AMA difference

AMA brings together experts that are driven by passion, inspired by innovation and go the extra mile to bring you an outstanding **customer experience**. Our market-leading innovation, high-quality service and compelling total cost of ownership make it a perfect fit for any **industrial organization**.

Multi-device support

Our solution runs on a wide range of smartphones, smart glasses, tablets, and laptops and is able to connect to multiple external video sources.

Flexible deployment options

Our solution can be deployed with the same level of security as SaaS, on-premise, on your private cloud or on a closed network.

Dedicated assistance & onboarding

Benefit from a seamless onboarding process, from technical set-up and training to your first successful usage of the solution.

Transparent pricing

Our different pricing plans and leasing options offer maximum flexibility adapted to your use case.

Use cases

Remote assistance

Emergency support, diagnosis, guidance, equipment setup & maintenance

Training

Step-by-step instruction, do what I do, on-the-job training, skill upgrading
