

Look at the invisible

We are Lutèce Dynamics
A team of 5 experienced
researchers in optics and
biology that have a unique
perspective on the problem
and want to diffuse the
technology around the
community.

Let's get in touch
support@lutedynamics.com

Welcome to the future of real-time, label free and non invasive imaging

Our technology transforms the way scientists look at cells and study their metabolic response to external stimuli, enabling faster, more precise decision-making.

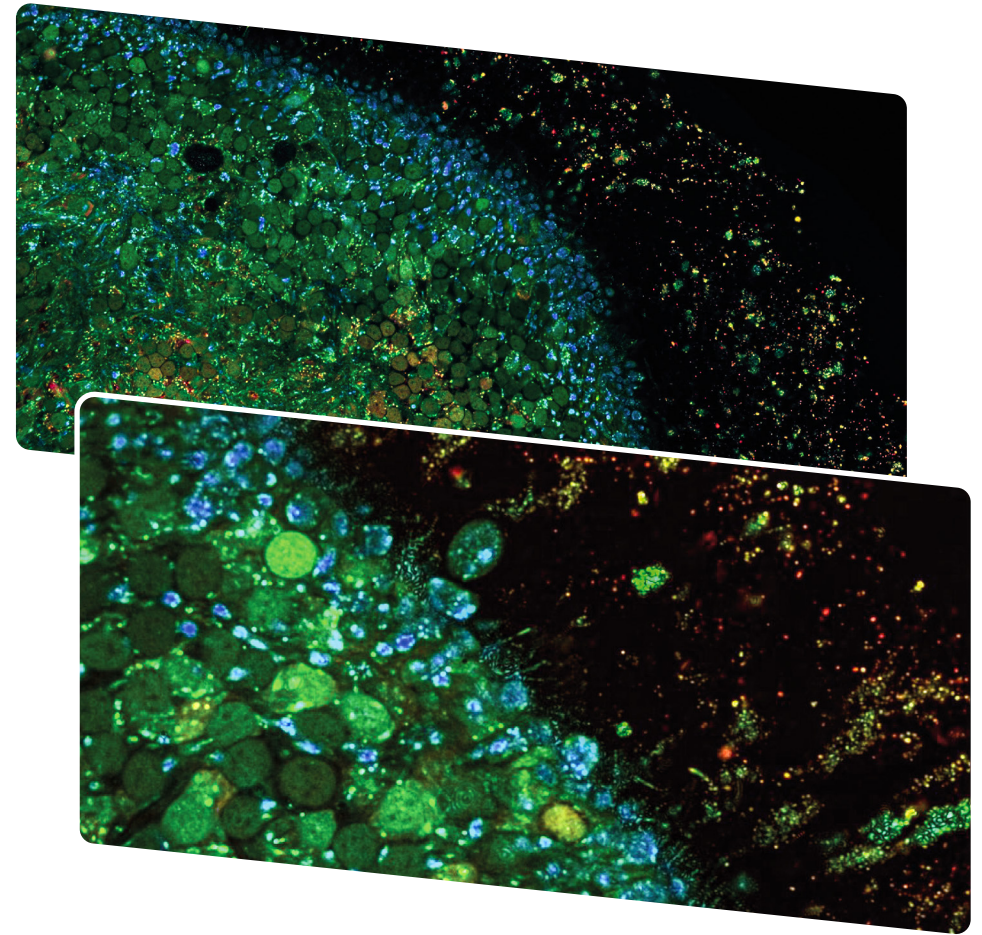

No need to tag your sample with fluorophores

Inspect the sample at high resolution in all directions

Follow sample growth and model diseases on long term

Book a test

Interested?

You can book a free testing session, where you will be able to test the module with your own sample.
